1 translocation, Transmission of an unbalanced (Y;1) translocation in Britain, France, e52
10p13-14 deletion, Chromosome 10p13-14 and 22q11 deletion screening in 100 patients with isolated and syndromic conotruncal heart defects, e116
11q23, Prevalence of SDHB, SDHC, and SDHD germline mutations in clinic patients with head and neck parangangiomas, 178
15q11-13 deletion, A kid with AKU syndrome and a deletion/duplication within the 15q11-q13 region, 207
16p trisomy, "Molecular rulers" for calibrating phenotypic effects of telomere imbalance, 734
17q, Investigation of the GRB2, GRB7, and CSH1 genes as candidates for the Silver-Russell syndrome (SRS) on chromosome 17q, e113
20p13, Corneal dystrophy and perceptive deafness (Harboyan syndrome), CDPD1 maps to 20p13, 116
22q11 deletion syndrome, A novel atypical 22q11.2 distal deletion in father and son, e62
22q11 deletion syndrome, A novel atypical 22q11.2 distal deletion in father and son, e62
22q11 deletion, Chromosome 10p13-14 and 22q11 deletion screening in 100 patients with isolated and syndromic conotruncal heart defects, e116
22q11 deletions, Absence of 22q11 deletions in 211 patients with 22q11 deletion syndrome, 204
7-dehydrocholesterol, 7-dehydrocholesterol, Smith-Lemli-Opitz syndrome, e62
8994 polymorphism, The frequency of mtDNA 8994 polymorphism and detection of the NARP 8993 mutation, 204
8p23 1, 8p23 duplication reconsidered: is it a true euchromatic variant with no clinical manifestation?, 769
8q21.2, A cryptic deletion of 2q35 including part of the PAX3 gene detected by breakpoint mapping in a child with autism and a de novo 2:8 translocation, 391
α-transducin, Mapping of a novel locus for achromatopsia (ACHM4) to 1p and identification of a germline mutation in the α subunit of cone transducin (GNAT2), 656
aberrant splicing, A novel aberrant splice site mutation in the APC gene, 754
absent radius, Thrombocytopenia-absent radius syndrome: a clinical genetic study, 876
ACE, An investigation of ACE as a risk factor for dementia and cognitive decline in the general population, 403
achromatopsia, Mapping of a novel locus for achromatopsia (ACHM4) to 1p and identification of a germline mutation in the α subunit of cone transducin (GNAT2), 656
acrolenticular syndrome, De novo GLI3 mutation in acrolenticular syndrome: broadening the phenotypic spectrum of GLI3 defects and overlap with marfan models, 804
acrofacial dysostosis, Acrofacial dysostosis in a patient with the TSC2-PAK4 contiguous gene syndrome, 136
acro-renal-ocular syndrome, Ohkiso syndrome and acro-renal-ocular syndrome: clinical overlap, expansion of the phenotype, and absence of PX2 mutations in two new families, 68
ACVR1 gene: Identification of 13 new mutations in the ACVR1 gene in a group of 52 unselected Italian patients affected by hereditary haemorrhagic telangiectasia, e39
adenosylatacine dehydrogenase deficiency, Towards a suggestive facial dysmorphism in adenosylatacine dehydrogenase deficiency?, 440
age, Cytogenetic analysis of spermatozoa from males aged between 47 and 71 years, e63
aggrecan, Identification of a locus for a form of spondyloepiphyseal dysplasia on chromosome 15q26.1: exclusion of aggrecan as a candidate gene, 634
aldolase B, Molecular analysis of the aldolase B gene in patients with hereditary fructose intolerance from Spain, e56
alkaptonuria, Alkaptonuria in the Dominican Republic: identification of the founder AKU mutation and further evidence of mutation hot spots in the HGO gene, e40
Alport syndrome, Alport syndrome and mental retardation: clinical and genetic distinction of the contiguous gene deletion syndrome in Xq22.3 (ATS-MA), 359
Alzheimer’s disease, An investigation of ACE as a risk factor for dementia and cognitive decline in the general population, 403
Amelogenin, In vitro analysis of amelogenin therapy for the Arg120stop nonsense mutation in RP2 patients, 62
aneuploidy, Cytogenetic analysis of spermatozoa from males aged between 47 and 71 years, e63
Angelman syndrome, A patient with a supernumerary marker chromosome (15), Angelman syndrome, and uniparental disomy resulting from paternal meiosis II non-disjunction, e9
Exceptionally mild Angelman syndrome phenotype associated with an incomplete imprinting defect, e51
Severe phenotype in Angelman syndrome resulting from paternal isochromosome 15, e6
anophthalmia, National study of microphthalmia, anophthalmia, and coloboma (MAC) in Scotland: investigation of genetic aetiology, 16
anticconvulsant medication, Antiepileptic drug therapy during pregnancy: the neurologist’s perspective, 248
Assessing epidemiological evidence for the teratogenic effects of anticonvulsant medications, 247
The teratogenicity of anticonvulsant drugs: a progress report, 245
anticovulsants, Long term health and neurodevelopment in children exposed to antiepileptic drugs before birth, 251
APC gene, A novel aberrant splice site mutation in the APC gene, 754
Genetic characterisation of patients with multiple colonic polypos, 217
apolipoprotein E, Apolipoprotein E4 is only a weak predictor of dementia and cognitive decline in the general population, 639
arthritis, SNP S1103X in the cardiac sodium channel gene SCN5A is associated with cardiac arrhythmias and sudden death in a white family, 913
aspartoacylase gene mutations, Two novel aspartoacylase gene (ASPA) missense mutations specific to Norwegian and Swedish patients with Canavan disease, e65
assisted reproduction, Preimplantation genetic diagnosis in clinical practice, 6
association study, Apolipoprotein E4 is only a weak predictor of dementia and cognitive decline in the general population, 639
ataxia, Calculating predictive values for the large repeat alleles at the SCAB locus in patients with ataxia, 935
Linkage to 18qter differentiates two clinically overlapping syndromes: congenital cataracts-facial dysmorphism-neuropathy (CCFDN) syndrome and Marinesco-Sjögren syndrome, 838
ataxia-telangiectasia, ATM mutations in Finnish breast cancer patients, 192
ataxia-telangiectasia variant, A late onset variant of ataxia-telangiectasia with a compound heterozygous genotype, A8030G/7481insA, 57
atherosclerosis, Association of polymorphisms and allelic combinations in the tumour necrosis factor-α-complement MHC region with coronary artery disease, 46
ATM, A late onset variant of ataxia-telangiectasia with a compound heterozygous genotype, A8030G/7481insA, 57
ATM mutations, ATM mutations in Finnish breast cancer patients, 192
Ataxia telangiectasia, Constitutional alterations of the ATM gene in early onset sporadic breast cancer, 751
audiometry, Distinctive audiometric features between USH2A and USH2B subtypes of Usher syndrome, 281
audiotapes, The use of audiotapes in consultations with women from high risk breast cancer families: a randomised trial, 697
autism, A cryptic deletion of 2q35 including part of the PAX3 gene detected by breakpoint mapping in a child with autism and a de novo 2:8 translocation, 391
An aetiological study of 25 mentally retarded adults with autism, 281
No association between HOXA1 and HOXB1 genes and autism spectrum disorders (ASD), e70
autoimmune, Clinical and molecular features of the immunodysregulation, polyendocrinopathy, enteropathy, X linked (IPEX) syndrome, 537
autosomal dominant, Autosomal dominant (AD) pure spastic paraplegia (HSP) linked to loci, HSPG4 affects almost exclusively males in a large pedigree, e77
autosomal dominant cerebellar ataxia, Predictive testing in the context of pregnancy: experience in Huntington’s disease and autosomal dominant cerebellar ataxia, 522
autosomal dominant inheritance, Spondyloepimetaphyseal dysplasia with multiple dislocations (Hall type); three further cases and evidence of autosomal dominant inheritance, 688
Linkage to 18qter differentiates two clinically overlapping syndromes: congenital cataracts-facial dysmorphism-neuropathy (CCFDN) syndrome and Marinesco-Sjögren syndrome, 838

Novel mutations in the γ-crystallin genes cause autosomal dominant congenital cataracts, 352

cataracts, Craniofacial anomalies, cataracts, congenital heart disease, sacral neural tube defects, and growth and developmental retardation in two sisters: a new autosomal recessive MCA/MR syndrome?, 145

cationic trypsinogen gene, Mutations in the pancreatic secretory trypsin inhibitor gene (PSTI/SPINK1) rather than the cationic trypsinogen gene (PRSS1) are significantly associated with tropical calcific pancreatitis, 347

cationic trypsinogen gene, Mutations in the pancreatic secretory trypsin inhibitor gene (PSTI/SPINK1) rather than the cationic trypsinogen gene (PRSS1) are significantly associated with tropical calcific pancreatitis, 347

CBP gene, Molecular analysis of the CBP gene in 60 patients with Rubinstein-Taybi syndrome, 415

CCFDN syndrome, Linkage to 18qter differentiates two clinically overlapping syndromes: congenital cataracts-facial dysmorphism-neuropathy (CCFDN) syndrome and Marinesco-Sjögren syndrome, 838

CD14, Promoter polymorphisms in the CD14 receptor gene and their potential association with the severity of chronic periodontitis, 844

CD36 deficiency, Identification of cryptic splice site, exon skipping, and novel point mutations in type I CD36 deficiency, 286

CDG Ib, Protein losing enteropathy-hepatic fibrosis syndrome in patients with a proximal duplication of 15q, 382

CDG Ib, Protein losing enteropathy-hepatic fibrosis syndrome in patients with a proximal duplication of 15q, 382

CFCRD1 gene, Expression of wild type and mutant TSC2, but not TSC1, is associated with hyperuricaemic nephropathy, 568

cerebral cortex, Autosomal recessive primary microcephaly: an analysis of locus heterogeneity and phenotypic variation, 718

CFTR gene, Relationship between genotype and phenotype for the CFTR gene W846X mutation, e32

CFTR mutations, Splice mutation 1811+1.6kbA>G causes severe cystic fibrosis with pancreatic insufficiency: report of 11 compound heterozygous and two homozygous patients, e73

CGG repeat, A single base alteration in the CGG repeat region of the UMOD gene is responsible for medullary cystic kidney disease 2 and familial juvenile hyperuricaemic nephropathy, 582

chromosome 17, PKAR1A, one of the Carney complex genes, and its locus (17q22-24) are rarely altered in putative tumours outside the Carney complex, e78

chromosome 17q23, Association between markers in chromosome region 17q23 and young onset hypertension: a TDT study, 42

chromosome 18q21.1, Homozygosity mapping of a Dyggve-Melchior-Clausen syndrome gene to chromosome 18q21.1, 714

chromosome 22, Constitutional de novo interstitial deletion of 8 Mb on chromosome 22q12.1-12.3 encompassing the neurofilament complex type 2 (NF2) locus in a dysmorphic girl with severe colobomata, e6

chromosome abnormality, A school based study of children with learning disability indicates poor levels of genetic investigation, 19

Phenotypic effects of mosaicism for a 47,XXX cell line in Turner syndrome, 217

chronic mucocutaneous candidiasis, Familial chronic nail candidiasis with ICAM-1 deficiency: a new form of chronic mucocutaneous candidiasis, 671

clift, Analysis of the p63 gene in classical EEC syndrome, related syndromes, and non-syndromic orofacial clefts, 559

clift lip/palate, Maternal MTHFR genotype contributes to the risk of non-syndromic clift lip and palate, 368

clinical criteria, Relationship between clinical and genetic diagnosis of Prader-Willi syndrome, 822

CLN2 gene, Identification of novel CLN2 mutations shows their potential association with the severity of chronic CNS dysfunction, 836

CNS dysfunction, Comorbid VHL and SCA2 mutations in a large kindred: confounding risks of renal and neurological dysfunction caused by CNS VHL tumours versus SCA2 atrophic neurodegeneration, e37

coeliac disease, Genome screening of coeliac disease, 328

CTL4 and CD28 gene region is associated with genetic susceptibility to coeliac disease in UK families, 51

Coffin-Lowry syndrome, Coffin-Lowry phenotype in a patient with a complex chromosome rearrangement, e41

Coffin-Lowry syndrome: clinical and molecular features, 705

cognitive decline, Apolipoprotein E4 is only a weak predictor of dementia and cognitive decline in the general population, 639

cohort study, Family history of incidentally discovered cancer: a determinant of the risk of developing endometrial cancer: a nationwide cohort study, 826

The effect of a single BRC2A mutation on cancer in Iceland, 457

COL1A2 mutation, A variant of osteogenesis imperfecta type IV with resolving kypohymia is caused by a novel COL1A2 mutation, 128

COL1A1, Vireoretinopathy with phalangeal epiphyseal dysplasia, a type II collagenopathy resulting from a novel mutation in the C-propeptide region of the molecule, 661

chromosome abnormalities, Comparative genomic hybridisation shows a partial de novo deletion 16p11.2 in a neonate with multiple congenital malformations, e24

chromosomal translocation, Breakpoint analysis of a familial balanced translocation t(12;3)(q11:q21) associated with mesomelic dysplasia, e34

chromosome, 8p23 duplication reconsidered: is it true euchromatic variant with no clinical manifestation?, 769

chromosome 2, Chromosome 2 aberrations in clinical cases characterised by high resolution multicolour banding and region specific FISH probes, 434

chromosome 5, Familial pericentric inversion of chromosome 5 in a family with benign neonatal convulsions, 214

Partial trisomy 9p21-22.3 in a young patient, 141

chromosome 5p13.3-p13.2, A novel locus for brachydactyty type A1 on chromosome 5p13.3-p13.2, 186

chromosome 6, Linkage of otolosclerosis to a third locus (OTSC3) on human chromosome 6p21.3-p22.3, 473

Major difference in aetiology and phenotypic abnormalities between transient and permanent neonatal diabetes, 370

Transient neonatal diabetes, a disorder of imprinting, 872

chromosome 6q deletion, Deletion of the SMAR1 gene (6q16.2) in a patient with a Prader-Willi-like phenotype, 594

chromosome 9, Partial trisomy 9p12p13.1.3 with a normal phenotype, 141

chromosome 12, Maternal uniparental disomy 12 in a healthy girl with a 47,XX,+der(12)(p11→q11)/46,XX karyotype, 519

Mycosporine-phenylalanine duplication 12a [12q3→12q2.1] accompanied by a pericentric inversion in a dysmorphic female infant, e72

chromosome 14, Current status of human chromosome 14, 81

chromosome 15, Organisation of the pericentric region of chromosome 15 at the breakpoint region of P53/SPINK1 shows a complex chromosome rearrangement, Coffin-Lowry phenotype in a patient with a complex chromosome rearrangement, e41

concordant deletion 22q11, Monosomy twins with chromosome 22q11 deletion and discordant phenotypes: updates with an epigenetic hypothesis, e71

conformation sensitive gel electrophoresis, Sensitivity of conformation sensitive gel electrophoresis in detecting mutations in Marfan syndrome and related conditions, 34

congenital fractures, Infantile spinal muscular atrophy variant with congenital fractures in a female neonate: evidence for autosomal recessive inheritance, 74

congenital hypermobility, Marfan syndrome and related conditions, 9

complex chromosome rearrangement, Coffin-Lowry phenotype in a patient with a complex chromosome rearrangement, e41

consonant deletion 22q11, Monosomy twins with chromosome 22q11 deletion and discordant phenotypes: updates with an epigenetic hypothesis, e71

conformation sensitive gel electrophoresis, Sensitivity of conformation sensitive gel electrophoresis in detecting mutations in Marfan syndrome and related conditions, 34

congenital fractures, Infantile spinal muscular atrophy variant with congenital fractures in a female neonate: evidence for autosomal recessive inheritance, 74

congenital hypermobility, Marfan syndrome and related conditions, 9

complex chromosome rearrangement, Coffin-Lowry phenotype in a patient with a complex chromosome rearrangement, e41

consonant deletion 22q11, Monosomy twins with chromosome 22q11 deletion and discordant phenotypes: updates with an epigenetic hypothesis, e71

conformation sensitive gel electrophoresis, Sensitivity of conformation sensitive gel electrophoresis in detecting mutations in Marfan syndrome and related conditions, 34

congenital fractures, Infantile spinal muscular atrophy variant with congenital fractures in a female neonate: evidence for autosomal recessive inheritance, 74

congenital hypermobility, Marfan syndrome and related conditions, 9

complex chromosome rearrangement, Coffin-Lowry phenotype in a patient with a complex chromosome rearrangement, e41

consonant deletion 22q11, Monosomy twins with chromosome 22q11 deletion and discordant phenotypes: updates with an epigenetic hypothesis, e71

conformation sensitive gel electrophoresis, Sensitivity of conformation sensitive gel electrophoresis in detecting mutations in Marfan syndrome and related conditions, 34

congenital fractures, Infantile spinal muscular atrophy variant with congenital fractures in a female neonate: evidence for autosomal recessive inheritance, 74

congenital hypermobility, Marfan syndrome and related conditions, 9

complex chromosome rearrangement, Coffin-Lowry phenotype in a patient with a complex chromosome rearrangement, e41

consonant deletion 22q11, Monosomy twins with chromosome 22q11 deletion and discordant phenotypes: updates with an epigenetic hypothesis, e71

conformation sensitive gel electrophoresis, Sensitivity of conformation sensitive gel electrophoresis in detecting mutations in Marfan syndrome and related conditions, 34

congenital fractures, Infantile spinal muscular atrophy variant with congenital fractures in a female neonate: evidence for autosomal recessive inheritance, 74

congenital hypermobility, Marfan syndrome and related conditions, 9

complex chromosome rearrangement, Coffin-Lowry phenotype in a patient with a complex chromosome rearrangement, e41

consonant deletion 22q11, Monosomy twins with chromosome 22q11 deletion and discordant phenotypes: updates with an epigenetic hypothesis, e71

conformation sensitive gel electrophoresis, Sensitivity of conformation sensitive gel electrophoresis in detecting mutations in Marfan syndrome and related conditions, 34

congenital fractures, Infantile spinal muscular atrophy variant with congenital fractures in a female neonate: evidence for autosomal recessive inheritance, 74
congenital heart disease, Craniofacial anomalies, cataracts, congenital heart disease, sacral neural tube defects, and growth and developmental retardation in two sisters: a new autosomal recessive CMA/MR syndrome?, 145
congenital hypomelanosis, Frequency of mutations in the early growth response 2 gene associated with peripheral demyelinating neuropahties, e81
genital malformations, Comparative genomic hybridisation shows a deletion del(1p)11q12 in a neonate with multiple congenital malformations, e24
congenitally bowed femora, A variant of osteogenesis imperfecta type IV with resolving hypophemia is caused by a novel COL1A2 mutation, 128
conotruncal heart defects, Chromosome 10p13-14 and 22q11 deletion syndrome in 10 patients with isolated and syndromic conotruncal heart defects, e16
contiguous gene syndrome, Monozygotic twins with chromosome 22q11 deletion and discordant phenotypes: updates with an epigenetic hypothesis, e67
continuous medical education, Continuous medical education approaches for clinical genetics: a postal survey of general practitioners, e69

covulsions, Familial pericentric inversion of chromosome 5 in a family with benign neonatal convulsions, 214
coping style, Coping style, psychological distress, risk perception, and stress in parents of children with autism spectrum disorder, 79

copy number, High throughput screening of human subtelomeric DNA for copy number changes using multiplex amplifiable probe hybridisation (MAPH), 790
corneal dystrophy, Corneal dystrophy and perceptive deafness (Harbansy syndrome): CDPD1 maps to 20p13, 110
coronal dysplasia, Association of Wolf-Hirschhorn and allelic combinations in the tumour necrosis factor-α-complement MHC region with coronary artery disease, 45
corpus callosum agenesis, Report of a new case of “genitopatellar” syndrome which challenges the importance of absent patellae as a defining feature, 933
correlation, Germ line mutations in the von Hippel-Lindau (VHL) gene in patients from Poland: disease presentation in patients with deletions of the entire VHL gene, e38
Costello syndrome, A case of Costello syndrome and glycogen storage disease type III, 68
Cowden syndrome, Germ line mutation of the tumour suppressor PTEN in Proteus syndrome, 937
COXII stop mutation, Childhood onset mitochondrial myopathy and lactic acidosis caused by a stop mutation in the mitochondrial cytochrome c oxidase III gene, 812
cranial nerves, Frequency of mutations in the early growth response 2 gene associated with peripheral demyelinating neuropathies, e81

craniosynostosis, Heterozygous P250L mutation of fibroblast growth factor receptor 3 in a case of isolated craniosynostosis, 764
CREB, Collin-Loewy syndrome: clinical and molecular features, 705
CREBP, Polysplenia syndromes in 10 cases of Rubinstein-Taybi syndrome, including a mild variant showing a missense mutation in codon 1175 of CREBBP, 496
cri du chat syndrome, Partial trisomy 9p12p21.3 with a normal phenotype, 141
Crohn’s disease, Association of Crohn’s disease and ulcerative colitis with haplotypes of the MLHI gene in Italian inflammatory bowel disease patients, 332
cryptic splice acceptor site, A novel aberrant splice site mutation in the APC gene, 754
cryptophthalmos, Fraser syndrome and cryptophthalmos: review of the diagnostic criteria and evidence for phenotypic modules in complex malformation syndromes, 623
CSH1, Investigation of the GRB2, GRB7, and CSH1 genes as candidate genes for the Silver-Russell syndrome (SRS) on chromosome 17q, e13
CTLA-4/CD28 gene region is associated with genetic susceptibility to coeliac disease in UK families, 51
CIIP, Screening for microsatellite instability target genes in colorectal cancers, 785
cystic fibrosis, Polysymptomatic couple screening for cystic fibrosis carrier status: couples prefer full disclosure of test results, e26

Prenatal detection of cystic fibrosis by ultrasonography: a retrospective study of more than 346 000 pregnancies, 443
Relationship between phenotype and genotype for the CFTIR gene W846X mutation, e32
Splice mutation 1811+1.6kbA>G causes severe cystic fibrosis with pancreatic insufficiency: report of 11 compound heterozygous and two homozygous patients, e73
Cx32 polymorphism, Allelic variants in the 5’ non-coding region of the connexin32 gene, possible pitfalls in the diagnosis of X linked Charcot-Marie-Tooth neuropathy (CMTX), e58
de novo dup(19q), A rare case of a de novo dup(19q) associated with a mild phenotype, e61
decision making process, Parental attitude towards genetic testing for familial hypercholesterolemia in children, e49
deletion, A novel 2 bp deletion in the TM4SF2 gene is associated with MRX58, 430
Identification of a 52 kb deletion downstream of the SOST gene in three patients with van Buchem disease, 91
deletion 9p, Deletion of 9p associated with gonadal dysfunction in 46.XY but not in 46.XX human fetuses, 514
deletion/duplication Proband syndrome and a deletion/duplication within the 15q11-q13 region, 202
dementia, An investigation of ACE as a risk factor for dementia and cognitive decline in the general population, 403
Apollipoprotein E4 is only a weak predictor of dementia and cognitive decline in the general population, 639

Spatic paraparesis and atypical dementia caused by PSEN1 mutation (P264L), responsible for Alzheimer’s disease, e2

Denys-Dra ̈sh syndrome, A necropsy case of Denys-Dra ̈sh syndrome with a WT1 mutation in exon 7, e48
derivative chromosomes, Chromosome 2 aberrations in clinical cases characterised by high resolution multicolour banding and region specific FISH probes, 434
developmental abnormalities, Major difference in aetiology and phenotypic abnormalities between transient and permanent neonatal diabetes, 370
developmental delay, 8p23 duplication reconsidered: is it a true euchromatic variant with no clinical manifestation?, 769
Absence of 22q11 deletions in 211 patients with developmental delay analysed using PCR, e18
developmental dyslexia, Supportive evidence for the DYX3 locus as a dyslexia susceptibility gene in Canadian families, 125

DNF4A1, A novel locus for autosomal dominant non-syndromic deafness (DFNA41) maps to chromosome 12q24-qter, 567

DHC7 mutations, Smith-Lemli-Opitz syndrome: carrier frequency and spectrum of DHC7 mutations in Canada, e31

DHERC7, Twelve novel FBN1 mutations in Marfan syndrome and Marfan related phenotypes test the feasibility of FBN1 mutation testing in clinical practice, 58

dilated cardiomyopathy, Dilute cardiomyopathy, sudden cardiac death, hypoplastic discs, and retinal detachment: a new autosomal dominant syndrome, 221
disc herniation, Genetic mapping of a susceptibility locus for disc herniation and spasitic paraplegia on 6q23.3-q24.1, 387
disclosure, Preconceptional couple screening for cystic fibrosis carrier status: couples prefer full disclosure of test results, e26
discordant phenotype, Monozygotic twins with chromosome 22q11 deletion and discordant phenotypes: updates with an epigenetic hypothesis, e71
distichiasis, Analysis of the phenotypic abnormalities in lymphoepithelia-distichiasis syndrome in 74 patients with FOXC2 mutations or linkage to 16q24, 478

DMRT1, Deletion of 9p associated with gonadal dysfunction in 46.XY but not in 46.XX human fetuses, 514

DNA repair, Genetic variants of NHEJ DNA ligase IV can affect the genetic instability in codon 1175 of CREBBP, 61

dyslexia susceptibility gene in Canadian families, 125
dysmorphology, Denys-Drash syndrome, Dysmorphology, Denys-Drash syndrome, 714

dysmorphic testes, A necropsy case of Denys-Dra ̈sh syndrome with a WT1 mutation in exon 7, e48
dysmorphism, Dysmorphism, Variable overgrowth, normal bone development, and dysmorphism, 933
dysplasia, Cytogenetic analyses in 15q13 rearrangements in de novo cases: a new autosomal recessive CMA/MR syndrome?, 145

14q22.1, 114
dysplastic fibropapillomatosis, Dysplastic fibropapillomatosis, Dysplastic fibropapillomatosis, 114
dysplasia, Cytogenetic and epigenetic analyses of proximal chromosome 1q (q11q22) in a patient with T lymphoblastic lymphoma/leukaemia: a family study using G banding and comparative genomic hybridisation, e79

Dyggve-Melchior-Clausen syndrome, Dyggve-Melchior-Clausen syndrome, 51

Dyggve-Melchior-Clausen syndrome gene to chromosome 2p, Dysmorphology, Denys-Drash syndrome, 567

early onset breast cancer, Constitutional alterations of the ATM gene in early onset sporadic breast cancer, 731
fibre diffraction, Prenatal detection of cystic fibrosis by ultrasonography: a retrospective study of more than 346 000 pregnancies, 443
ectopia lentis, Sensitivity of conformation sensitive gel electrophoresis in detecting mutations in Marfan syndrome and related conditions, 34
ectodactyly, Sorting nexus 3 (SNX3) is disrupted in a patient with a translocation t(6;13)(q21.q12) and microcephaly, microphthalmia, ectodermal dysplasia and hypodontia, 365
education, Education improves general practitioner (GP) management of familial breast/ovarian cancer: findings from a cluster randomised controlled trial, 779
EEC syndrome, Analysis of the p63 gene in classical EEC syndrome, related syndromes, and non-syndromic orofacial clefts, 559
— The p63 gene in EEC and other syndromes, 377
— EGR2 mutation, Frequency of mutations in the early response gene 2 gene associated with peripheral demyelinating neuropathies, 551
— elastin vasculopathy, Cardiovascular manifestations in 75 patients with Williams syndrome, 554
endometrial cancer, Family history of breast cancer as a determinant of the risk of developing endometrial cancer: a nationwide cohort study, 826
— enteropathy, Clinical and molecular features of the unclassified dysautonomia, pseudopodangioleatheropathy, X linked (iPEX) syndrome, 537
epidemiology, Assessing epidemiological evidence for the teratogenic effects of anticonvulsant medications, 243
— The embryonic single nucleotide polymorphism on chromosome 1 in Iceland, 457
epilepsy, Antiepileptic drug therapy during pregnancy: the neurologist's perspective, 248
— Assessing antiepileptic prescription during pregnancy for the teratogenic effects of anticonvulsant medications, 243
— Long term health and neurodevelopment in children exposed to antiepileptic drugs before birth, 251
— The teratogenicity of anticonvulsant drugs: a progress report, 245
europathies, Parental attitude towards genetic testing for familial hypercholesterolaemia in children, 49
— evolution, Evolution and expression of FOXL2, 916
— externalising behaviour, Behavioural phenotype of Bardet-Biedl syndrome, 176
— facial dysmorphism, Towards a suggestive facial dysmorphism in adenosuccinate lyase deficiency?, 440
— facial nerve paralysis, Mutation analysis in the candidate Möbius syndrome genes PIGT and GATA2 on chromosome 3 and EGR2 on chromosome 10, 130
— familial, Risk assessment and management of high risk familial breast cancer, 865
— familial adenomatous polyposis, A novel aberrant splice site mutation in the APC gene, 754
— familial breast cancer, What do women really want to know? Motives for attending familial breast cancer clinics, 410
— familial breast/ovarian cancer, Education improves general practitioner (GP) management of familial breast/ovarian cancer: findings from a cluster randomised controlled trial, 779
— familial chronic nail candidiasis, Familial chronic nail candidiasis with ICAM-1 deficiency: a new form of chronic mucocutaneous candidiasis, 671
— familial hypercholesterolaemia, CYS127S (FH-Kairouan) and D245N (FH-Tozeur) mutations in the LDL receptor gene in Tunisian families with familial hypercholesterolaemia, 56
— familial juvenile hyperuricaemic nephropathy, Mutations of the UMOD gene are responsible for medullary cystic kidney disease 2 and familial juvenile hyperuricaemic nephropathy, 882
— familiality, The effect of a single BRCA2 mutation on cancer in Iceland, 457
— family history, Family history of breast cancer as a determinant of the risk of developing endometrial cancer: a nationwide cohort study, 526
— Management of women with a family history of breast cancer in the North West Region of England: training for implementation of a service, 248
— FBN1, Sensitivity of conformation sensitive gel electrophoresis in detecting mutations in Marfan syndrome and related conditions, 34
— FBN1 mutation detection, Twelve novel FBN1 mutations in Marfan syndrome and Marfan related phenotypes test the feasibility of FBN1 mutation testing in clinical practice, 589
— FEO, Familial exostosis osteolysis in a large Spanish kindred resulting from an insertion mutation in the TNFRSF11A gene, 511
— fetal facies, Robinow syndrome, 305
— FGFR2, Heterozygous P250L mutation of fibroblast growth factor receptor 3 in a case of isolated craniosynostosis, 764
— fibre diffraction, Molecular changes in skin predict predisposition to breast cancer, 516
— fibrillin-1, Twelve novel FBN1 mutations in Marfan syndrome and Marfan related phenotypes test the feasibility of FBN1 mutation testing in clinical practice, 589
— fibroblast growth factor type 3, Heterozygous P250L mutation of fibroblast growth factor receptor 3 in a case of isolated craniosynostosis, 764
— fibrocalculous pancreatic diabetes, Mutations in the pancreatic secretory trypsin inhibitor gene (PSTI/SPINK1) rather than the cathepsin trypsinogen gene (PRSS1) are significantly associated with tropical calcific pancreatitis, 347
— fibulin-1, The fibulin-1 gene (FBLN1) is disrupted in a t(12;22) associated with a comprehensive type of syndromically, 551
— fingers, Multifocal glomus tumours of the fingers in two patients with neurofibromatosis type 1, 445
— Finnish, Four novel mutations in the OFD1 (Crox51) gene in Finnish patients with oral-facial-digital syndrome type 1, 292
— FISH, Chromosome 2 aberrations in clinical cases characterised by high resolution multicolour banding and region specific FISH probes, 434
— Pure terminal duplication of the short arm of chromosome 19 in a boy with mild microcephaly, 50
— Subtelomeric rearrangements detected by FISH in three of 33 families with idiopathic mental retardation and minor physical anomalies, 553
— fluorescent genotyping, Automated fluorescent genotyping detects 10% of optically artifactual rearrangements in idiopathic syndromic mental retardation, 266
— FMRI1, A single base alteration in the CCG repeat region of FMRI1: possible effects on gene expression and phenotype, 196
— Mosaicism for FMRI1 and FMRI2 deletion: a new case, 200
— FMRI2, Mosaicism for FMRI1 and FMRI2 deletion: a new case, 200
— folate, Inositol and folate resistant neural tube defects, 56
— folic acid supplementation, Changes in frequencies of heterozygous 5,10-methylenetetrahydrofolate reductase gene defects in fetuses with neural tube defects, 366
— founder effect, Identification of novel CLN2 mutations shows the importance of the Canadian specific NCL2 alleles, 822
— founder mutation, Alkaptonuria in the Dominican Republic: identification of the founder AKU mutation and further evidence of mutation hot spots in the HO gene, 440
— FOCA2, Analysis of the phenotypic abnormalities in lymphoedemadystichiasis syndrome in 74 patients with FOCA2 mutations or linkage to 16q24, 478
— FOXL2, Evolution and expression of FOXL2, 916
— FOXL2 mutation screening in a large panel of POF patients and XX males, 443
— fragile X syndrome, A school based study of children with learning disability indicates poor levels of genetic investigation, 196
— A single base alteration in the CCG repeat region of FMRI1: possible effects on gene expression and phenotype, 196
— Mosaicism for FMRI1 and FMRI2 deletion: a new case, 200
— frameshift mutation, Two novel frameshift mutations in NXXK2.5 result in novel features including visceral inversus and sinus venosus type ASD, 807
— Fraser syndrome, Fraser syndrome and cryptophthalmos: review of the diagnostic criteria and evidence for phenotypic modules in complex malformation syndromes, 623
— frequency, Molecular screening for Smith-Magenis syndrome among patients with mental retardation of unknown cause, 56
— FRN, Correlation between a specific Wilms tumour suppressor gene (WT1) mutation and the histological findings in Wilms tumour (WT), 83
— fructose intolerance, Molecular analysis of the aldolase B gene in patients with hereditary fructose intolerance from Spain, 56
— γ-crystallin, Novel mutations in the γ-crystallin genes cause autosomal dominant congenital cataracts, 352
— GCY gene, Localisation of the Y chromosome stature gene to a 700 kb interval in close proximity to the centromere, 507
— gene mapping, Identification of candidate lung cancer susceptibility genes in mice using oligonucleotide arrays, 531
— gene mutation, CY5127S (FH-Kairouan) and D245N (FH-Tozeur) mutations in the LDL receptor gene in Tunisian families with familial hypercholesterolaemia, 56
— general practitioner, Education improves general practitioner (GP) management of familial breast/ovarian cancer: findings from a cluster randomised controlled trial, 779
— general practitioners, Continuous medical education approaches for clinical genetics: a postal survey of general practitioners, 93
— genetic aetiology, National study of microphthalmia, anophthalmia, and coloboma (MAC) in Scotland: investigation of genetic aetiology, 16
— genetic cancer risk assessment, Concerns of women presenting to a comprehensive cancer centre for genetic cancer risk assessment, 526
— genetic counselling, Coping style, psychological distress, risk perception, and satisfaction in subjects attending genetic counselling for hereditary cancer, 589
H + -ATPase, IMP3, IGF2, HOXD, HOXB1, HOXA1, HOX genes, Severe digital abnormalities in a patient heterozygous for both a novel missense mutation in HOXD13 and a polyanalytic tract expansion in HOXA13, 852

HOXA1, No association between HOXA1 and HOXB1 genes and autism spectrum disorders (ASD), e70

HOXB1, No association between HOXA1 and HOXB1 genes and autism spectrum disorders (ASD), e70

HOXD, Breakpoint analysis of a familial balanced translocation t(12;21)(p11.2;q11.2) associated with mesodermal dysplasia, e33

H-ATPase Novel ATP6V1B1 and ATP6V0A4 mutations in autosomal recessive distal renal tubular acidosis with new evidence for hearing loss, 796

human gene mutations, Human gene mutations causing infertility, 153

Huntington’s disease, Behavioural complaints in participants who underwent predictive testing for Huntington’s disease, e57

Predictive testing in the context of pregnancy: experience in Huntington’s disease and autosomal dominant cerebellar ataxia, 522

hypereosinophilia, Identification of mutations in the gene encoding sterol regulatory element binding protein (SREBP)-2 in hypercholesterolaemic subjects, 271

hypertension, Association between markers in chromosomal region 17q23 and young onset hypertension: a TDT study, 42

hypertrophic cardiomyopathy, Genetic testing and genetic counselling in hypertrophic cardiomyopathy: the French experience, 741

hypoplastic discs, Dilated cardiomyopathy, sudden cardiac death, hypoplastic discs, and retinal detachment: a new autosomal dominant syndrome, 221

ICAM-1 deficiency, Familial chronic nail candidiasis with ICAM-1 deficiency: a new form of chronic mucocutaneous candidiasis, 185

idiopathic mental retardation, Subtelomeric rearrangements detected by FISH in three of 33 families with idiopathic mental retardation and minor physical anomalies, e51

IGF2, Characterisation of the growth regulating gene IGF3, a candidate for Silver-Russell syndrome, 575

IMPA3, Characterisation of the growth regulating gene IMP3, a candidate for Silver-Russell syndrome, 575

imprinting, Characterisation of the growth regulating gene IMP3, a candidate for Silver-Russell syndrome, 575

Current status of human chromosome 14, 81

Major difference in aetiology and phenotypic abnormalities between transient and permanent neonatal diabetes, 370

Transient neonatal diabetes, a disorder of imprinting, 872

in situ hybridisation, Cyto genetic analysis of spermatozoa from males aged between 47 and 71 years, e63

inborn errors, Protein losing enteropathy-hepatic fibrosis syndrome in Saguenay-Lac St-Jean, Quebec is a congenital disorder of glycosylation type Ib, 849

incomplete imprinting defect, Exceptionally mild Angelman syndrome phenotype associated with an incomplete imprinting defect, 678

infantile spinal muscular atrophy, Infantile spinal muscular atrophy variant with congenital fractures in a female neonate: evidence for autosomal recessive inheritance, 74

infertility, detection of new mutations causing infertility, 153

inheritance, Mutation in KCNQ1 that has both recessive and dominant characteristics, 681

inositol, Inositol and folate resistant neural tube defects, e5

interleukin 1B gene polymorphism, Association of an interleukin 1B gene polymorphism (–511) with Parkinson’s disease in Finnish patients, 400

internalising behaviour, Behavioural phenotype of Bardet-Biedl syndrome, 269

intestine deletion, Constitutional de novo intestinal deletion of 8 Mb on chromosome 22q12.1-12.3 encompassing the neurofibromatosis type 2 (NF2) locus in a dysmorphic girl with severe malformations, e6

intestit al telomers, Intestinal telomers of an inv(9)(p11.2;q34) involved in a jumping translocation found in a woman through a stable unbalanced translocation in her malformed child, e42

intrahepatic arteriovenous shunts, Identification of 13 new mutations in the ACVRL1 gene in a group of 52 unselected Italian patients affected by hereditary haemorrhagic telangiectasia, 323

intragen 14, The intron 14 2140+5G>A variant in the low density lipoprotein receptor gene has no effect on plasma cholesterol levels, e57

inv(9), Intestinal telomers of an inv(9)(p11.2;q34) involved in a jumping translocation found in a woman through a stable unbalanced translocation in her malformed child, e42

investigations, A school based study of children with learning disability indicates poor levels of genetic investigation, e19

IPEX syndrome, Clinical and molecular features of the immunosuppression, polyendocrinopathy, enteropathy, X linked (IPEX) syndrome, 537

ischae mic heart disease, Identification of cryptic splice site, exon skipping, and novel point mutations in type I C53B deficiency, 286

isochromosome 15, Severe phenotype in Angelman syndrome resulting from paternal isochromosome 15, e4

jumping translocation, Interstitial telomeres of an inv(9)(p11.2;q34) involved in a jumping translocation: a coeliac found in a woman through a stable unbalanced translocation in her malformed child, e42

KCNQ1, Mutation in KCNQ1 that has both recessive and dominant characteristics, 681

kidney, Novel ATP6V1B1 and ATP6V0A4 mutations in autosomal recessive distal renal tubular acidosis with new evidence for hearing loss, 796

KLFB, Abnormal expression of the KLFB (ZNFP741) gene in a female patient with X-autosomal translocation t(12;21)(p11.2;q22.3) and non-syndromic mental retardation, 113

kidney tumours, Familial adult renal neoplasia, 1

Klinefelter syndrome, Klinefelter-like phenotype and primary infertility in a male with a paracentric Xq inversion, e28

kypohemic dysplasia, A variant of osteogenesis imperfecta type IV with resolving kypohemia is caused by a novel COL1A2 mutation, 128

L1CAM, Hirschsprung disease and L1CAM is the disturbed sex determination gene caused by L1CAM mutations?, e71

lack of association, No association between HOXA1 and HOXB1 genes and autism spectrum disorders (ASD), e70

lactic acidosis, Childhood onset mitochondrial myopathy and lactic acidosis caused by a stop mutation in the mitochondrial cytochrome c oxidase III gene, 812

language delay, Molecular characterisation of a ring chromosome 22 in a patient with language delay: a contribution to the refinement of the subtelomeric 22q deletion syndrome, e17

late infantile onset neuronal ceroid lipofuscinosis (CLN2, LINCL), Identification of a novel CLN2 mutations shows Canadian specific CLN2 alleles, 822

Laurence-Moon-Bardet-Biedl syndrome, Behavioural phenotype of Bardet-Biedl syndrome, e76

LDL receptor, CY5127S (FH-Karrouan) and D24SN (FH-Tozeur) mutations in the LDL receptor gene in Tunisian families with familial hypercholesterolaemia, e74

learning disability, A school based study of children with learning disability indicates poor levels of genetic investigation, e19

High throughput screening of human subtelomeric DNA for copy number changes using multiplex amphilifiable probe hybridisation (MAPH), e42

Leber hereditary optic neuropathy, Leber hereditary optic neuropathy, 162

Leber optic atrophy, Leber hereditary optic neuropathy, 162

LEOPARD syndrome, PTPN11 mutations in LEOPARD syndrome, 571

Leri-Weill dyschondrosteosis, SHOX point mutations and deletions in Leri-Weill dyschondrosteosis, e33

Prevalence of mutations in the short stature homeobox containing gene (SHOX) in Madelung deformity of childhood, 758

leukaemia, Hereditary duplication of proximal chromosome 1q (q11q22) in a patient with lymphoblastic lymphoma/leukaemia: a family study using G banding and comparative genomic hybridisation, e79

Li-Fraumeni syndrome, Local rate of TP53 germline mutations in breast cancer/sarcoma families not fulfilling classical criteria for Li-Fraumeni syndrome, 941

ligase IV, Genetic variants of NHEJ DNA ligase IV can affect the risk of developing multiple myeloma, a tumour characterised by aberrant class switch recombination, 900

limb, Thrombocytopenia-absent radius syndrome: a clinical genetic study, 876

limb development, The fibulin-1 gene (FBNL1) is disrupted in a boy (11;22) associated with a complex type of spondylodyplasty, 98

limb malformations, Severe digital abnormalities in a patient heterozygous for both a novel missense mutation in HOXD13 and a polyanalytic tract expansion in HOXA13, 852

linkage, Linkage stratification and mutation analysis at the parkin locus identifies mutation positive Parkinson’s disease families, 489

Supportive evidence for the DYSX dyslexia susceptibility gene in Chinese families, 125

linkage analysis, A genome wide scan for familial high myopia suggests a novel locus on chromosome 7q36, 118

A novel locus for autosomal dominant non-syndromic deafness (DFNA41) maps to chromosomes 12q24-qter, 567

Identification of candidate lung cancer susceptibility genes in mouse using oligonucleotide arrays, 644

Linkage of otosclerosis to a novel locus (OTSC3) on human chromosome 6p21.3: 22.3, 473

linkage disequilibrium, An MLH1 haplotype is over-represented on chromosomes carrying an HNPCC predisposing mutation in MLH1, 323
Specific haplotypes of the RET proto-oncogene are over-represented in patients with sporadic papillary thyroid carcinoma, 260

Supportive evidence for the DYX3 dyslexia susceptibility gene in 11p15.5 families, 125

lipodystrophy, Genotype-phenotype relationships in Baradinnelli-Seip congenital lipodystrophy, 722

lipopolysaccharide, Promoter polymorphisms in the CD14 receptor and their potential association with the severity of chronic periodontitis, 844

locus heterogeneity, A genome wide scan for familial high myopia reveals a novel locus on chromosome 7q36,118

LOH, A breast cancer family from Spain with germline mutations in both the BRCA1 and BRCA2 genes, e44

long QT syndrome, Mutation in KCNQ1 that has both recessive and dominant characteristics, 681

SNP S1103Y in the cardiac sodium channel gene SCN5A is associated with cardiac arrhythmias and sudden death in a white family, 913

low density lipoprotein receptor gene (LDLR), The intron 14 2140+5G:A variant in the low density lipoprotein receptor gene has no effect on plasma cholesterol levels, e57

low penetrance gene, Genes other than BRCA1 and BRCA2 involved in breast cancer susceptibility, 225

low penetrance mutation, A T to C mutation in the polypyrimidine tract of the exonic splicing site of the RBP gene responsible for low penetrance hereditary retina-inblotema, e21

lymphangiomatosis, Expression of wild type and mutant TSC2, but not TSC1, causes an increase in the G1 fraction of the cell cycle in HEK293 cells, 676

Lynch syndrome, Hereditary non-polyposis colorectal cancer: current risks of colorectal cancer largely overestimated, 335

Moddelung deformity, Prevalence of mutations in the short stature homebox containing gene (SHOX) in Moddelung deformity of childhood, 758

magnetic resonance imaging, Corpus callosum hypoplasia and associated brain anomalies in Nijmegen breakage syndrome, 684

male breast cancer, Novel BRCA2 mutation in a Polish family with hamartoma and two male breast cancers, e35

male infertility, A new case of Yo microdeletion transmitted from a normal father to two infertile sons, e27

malformation, Long term health and neurodevelopment in children exposed to antiepileptic drugs before birth, 251

malignant peripheral nerve sheath tumours, Malignant peripheral nerve sheath tumours in neurofibromatosis 1, 311

mandibulofacial dysostosis, Novel autosomal dominant mandibulo-facial dysostosis with ptosis: clinical description and exclusion of TCOF1, 484

MAPH, High throughput screening of human subtelomeric DNA for copy number changes using multiplex amplifiable probe hybridization assay (MAPH), 780

mapping, A locus for isolated cataract on human Xp, 105

Marfan syndrome, Sensitivity of conformation sensitive gel electrophoresis in detecting mutations in Marfan syndrome and related conditions, 34

Twelve novel FBN1 mutations in Marfan syndrome and Marfan related phenotypes test the feasibility of FBN1 mutation testing in clinical practice, 859

Marinasc-Sjogren syndrome, Linkage to 18qter differentiates two clinically overlapping syndromes: congenital cataracts-facial dysmorphism-neuropathy (CCFDN) syndrome and Marinasc-Sjogren syndrome, 838

maternal serum triple test, Physical and psychomotor development of 1799 children born after second trimester amniocentesis for maternal serum positive triple test screening and normal prenatal karyotype, e75

MCA/MR, Molecular screening for Smith-Magenis syndrome among patients with mental retardation of unknown cause, e59

MeCP2, Functional characterisation of MeCP2 mutations found in male patients with X linked mental retardation, 132

MDH1 mutations, Naturally occurring mutations and functional polymorphism in multidrug resistance 1 gene: correlation with microsatellite instability and lymphoid infiltration in colorectal cancers, 340

MECP2, MECP2 gene nucleotide changes and their pathogenicity in males: proceed with caution, 586

medullary cystic kidney disease 2, Mutations of the UMOD gene are responsible for medullary cystic kidney disease 2 and familial juvenile hyperuricaemic nephropathy, 882

MELAS, Spinocerebellar ataxia and the A3243G and A8344G mtDNA mutations, e22

mental retardation, Alport syndrome and mental retardation: clinical and genetic dissection of the contiguous gene deletion syndrome in Xq22.3 (ATS-MR), 359

An autopsiological study of 25 mentally retarded adults with autism, 205

Automated fluorescent genotyping detects 10% of cryptic subtelomeric rearrangements in idiopathic syndromic mental retardation, 266

Autosomal recessive primary microcephaly: an analysis of locus heterogeneity and phenotypic variation, 718

Genotype-phenotype relationships in Berardinelli-Seip congenital lipodystrophy, 722

Prospective screening for subtelomeric rearrangements in children with mental retardation of unknown aetiology: the Amsterdam experience, 546

MERRF, Spinocerebellar ataxia and the A3243G and A8344G mtDNA mutations, e22

mesomelic dysplasia, Breakpoint analysis of a familial balanced translocation t(2;8)(q13;21) associated with mesomelic dysplasia with renal anomalies, e44

methylation, Monozygotic twins with chromosome 22q11 deletion and discordant phenotypes: updates with an epigenetic hypothesis, e71

MHC polymorphisms, Association of polymorphisms and allelic combinations in the tumour necrosis factor-alpha/compat MHC region with coronary artery disease, 46

microarray, Identification of candidate lung cancer susceptibility genes in mouse using oligonucleotide arrays, 844

microcephaly, Pure terminal duplication of the short arm of chromosome 19 in a boy with mild microcephaly, e60

microfocal mutation, A new case of Yo microdeletion transmitted from a normal father to two infertile sons, e27

microphthalmia, National study of microphthalmia, anophthalmia, and coloboma (MAC) in Scotland: investigation of genetic aetiology, 16

microsatellite instability, Naturally occurring mutations and functional polymorphisms in multidrug resistance 1 gene: correlation with microsatellite instability and lymphoid infiltration in colorectal cancers, 340

Screening for microsatellite instability target genes in colorectal cancers, 785

mild phenotype, A rare case of a de novo dup(19q) associated with a mild phenotype, e61

Exceptionally mild Angelman syndrome phenotype associated with an incomplete imprinting defect, e51

mismatch repair gene, Mismatch repair gene analysis in Catalanon families with colorectal cancer, e29

missense mutation, De novo GLI3 mutation in acrocallosal syndrome: broadening the phenotypic spectrum of GLI3 defects and overlap with murine models, 804

mitochondrial DNA, Leber hereditary optic neuropathy, 162

Spinocerebellar ataxia and the A3243G and A8344G mtDNA mutations, e22

mitochondrial RNA (tRNA<sup>Leu(UUR)</sup>) gene Genetically inherited non-syndromic hearing impairment in a Spanish family with the 7510T>C mutation in the mitochondrial RNA (tRNA<sup>Leu(UUR)</sup>) gene, e82

MLH1, An MLH1 haplotype is over-represented on chromosomes carrying an HNPPC predisposing mutation in MLH1, 323

Description and functional analysis of a novel in frame mutation linked to hereditary non-polyposis colorectal cancer, 747

MLH1 gene, Association of Crohn's disease and ulcerative colitis with haplotypes of the MLH1 gene in Italian inflammatory bowel disease patients, 332

MLH1/MSH2, Germline MSH2 and MLH1 mutational spectrum in HNPCC families from Poland and the Baltic States, e65

MMR, Description and functional analysis of a novel in frame mutation linked to hereditary non-polyposis colorectal cancer, 747

MMR genes, Genetic characterisation of patients with multiple colonic polyps, 297

Molbius syndrome, Mutation analysis in the candidate Molbius syndrome genes P73 and GATA2 on chromosome 3 and EGR2 on chromosome 10, e30

mosaicism, Mosaicism for duplication 12q (12q13→12q21.2) accompanied by a pericentric inversion in a dysmorphic female infant, e72

Mosaicism for FMR1 and FMR2 deletion: a new case, 200

Phenotypic effects of mosaicism for a 47,XXX cell line in Turner syndrome, 217

motives, What do women really want to know? Motives for attending familial breast cancer clinics, 410

MRXS locus, A new MRXS locus maps to the X chromosome pericentromeric region: a new syndrome or narrow definition of Sutherland-Haan genetic locus?, 276

mtDNA, Childhood onset mitochondrial myopathy and lactic acidosis caused by a stop mutation in the mitochondrial cytochrome c oxidase III gene, 812

The frequency of mtDNA 8994 polymorphism and detection of the NARP 8993 mutation, 204

MTHFR, Human T and risk for neural tube defects, e14

MTHFR gene, Changes in frequencies of heterozygous thermolabile 5,10-methylene tetrahydrofolate reductase gene in fetuses with neural tube defects, 366

MTHFR genotype, Maternal MTHFR genotype contributes to the risk of non-syndromic cleft lip and palate, 368

mucopolysaccharidosis type IIIB, Identification and characterisation of mutations underlying Sanfilippo syndrome type B (mucopolysaccharidosis type III), e63

Downloaded from http://jmg.bmj.com/ on November 7, 2016 - Published by group.bmj.com
neurofibromatosis type 1, Multifocal glomus tumours of the fingers in two patients with neurofibromatosis type 1, e45
neurofibromatosis type 2, Molecular genetic analysis of the NF2 gene in young patients with unilateral vestibular schwannomas, 315
new mutation, Unique de novo mutation of BRCA2 in a woman with early onset breast cancer, 325
NF2 locus, Constitutional de novo interstitial deletion of 8 Mb on chromosome 22q12.1-12.3 encompassing the neurofibromatosi- sis type 2 (NF2) locus in a dysmorphic girl with severe malformations, 99

oral-facial-digital syndrome, Four novel mutations in the OFD1 (Cxorf5) gene in Finnish patients with oral-facial-digital syndrome 1, 292
ostearthritis, Identification of a locus for a form of spondyloepiphyseal dysplasia on chromosome 15q26.1: exclusion of aggrecan as a candidate gene, 634
osteogenesis imperfecta, Testing for osteogenesis imperfecta in cases of suspected non-accidental injury, 382
osteogenesis imperfecta (OI), A single amino acid substitution (D1441Y) in the carboxyl-terminal propeptide of the procollagen I chain of type I collagen results in a lethal variant of osteogenesis imperfecta with features of dense bone diseases, 23
osteogenesis imperfecta type IV, A variant of osteogenesis imperfecta type IV with resolving kyphomelia is caused by a novel COL1A2 mutation, 128
osteogenesis imperfecta, Familial expansion osteolysis in a large Spanish kindred resulting from an insertion mutation in the TNFRSF11A gene, e67
otoferlin, Q282X, a novel mutation in the gene encoding otoferlin (OTOF), is frequently found in Spanish patients with prelingual non-syndromic hearing loss, 502
OTOF, Q282X, a novel mutation in the gene encoding otoferlin (OTOF), is frequently found in Spanish patients with prelingual non-syndromic hearing loss, 502
otopalatodigital syndrome type I, Refined mapping of the gene for otopalatodigital syndrome type I, e77
osteosclerosis, Linkage of osteosclerosis to a third locus (OTSC3) on human chromosome 6p21.3-22.3, 473
ovarian cancer, Concerns of women presenting to a comprehensive cancer centre for genetic cancer risk assessment, 526
P glycoprotein function, Naturally occurring mutations and functional polymorphisms in multidrug resistance 1 gene: correlation with microsatellite instability and lymphoid infiltration in colorectal cancers, 340
null
proto-oncogenes, The null oncogene hypothesis and protection factor. 12
PSEN1 mutation, Spastic paraparesis and atypical dementia caused by PSEN1 mutation (P264L), responsible for familial Alzheimer's disease. 176
psoriasis, Strep-tococcal infection distinguishes different types of psoriasis, 767
psychological well being, The use of audiotapes in consultations with women with high risk breast cancer families: a randomised trial. 697
psychomotor delay, Pure terminal duplication of the short arm of chromosome 13 in a boy with micro-ophthalmia. 715
PTEN, Germline mutation of the tumour suppressor PTEN in Proteus syndrome, 937
ptotosis, Novel autosomal dominant mandibulo-facial dysostosis with ptosis: clinical description and exclusion of TCOF1, 484
PTPN11 mutations, PTPN11 mutations in LEOPARD syndrome, 126
pure 1q trisomy syndrome, Silver-Russell phenotype in a patient with pure trisomy 1q32.1q42.1: further delineation of the pure 1q trisomy syndrome, 582
Q829X mutation, Q829X, a novel mutation in the gene encoding pure 1q trisomy syndrome, 582
questionnaire, Continuous medical education approaches for clinical genetics: a postal survey of general practitioners, 659
radiological findings, Dysostoeosclerosis: a report of three new cases and evolution of the radiological findings, 603
real time PCR, Real time PCR detection of cryptic splice site, exon skipping, and novel point mutations in type I CD36 deficiency, 286
rearrangements, Detection of large rearrangements of exons 13 and 22 in the BRCA1 gene in German families, 636
renal cancer, Exclusion of PTEN, CTNNB1, and PTCH as candidate genes for Bir-Hogg-Dube syndrome, 610
renal cysts, Ret analysis of a “new” case of congenital nephroma syndrome which challenges the importance of absent patellae as a defining feature, 933
renal tubular acidosis, Novel ATP6V1B1 and ATP6V0A4 mutations in autosomal recessive distal renal tubular acidosis with new evidence for hearing loss, 796
reproductive counselling, Reproductive counselling for women with myotonic dystrophy, 615
RET proto-oncogene, Specific haplotypes of the RET proto-oncogene are over-represented in patients with sporadic papillary thyroid carcinoma, 280
retinal detachment, Dilated cardiomyopathy, sudden cardiac death, hypoplastic discs, and retinal detachment: a new autosomal dominant syndrome, 221
retinitis pigmentosa, Distinctive audiometric features between USH2A and USH2B subtypes of Usher syndrome, 281
Dominant X linked retinitis pigmentosa is frequently accounted for by truncating mutations in exon ORF15 of the RPRG gene, 284
In vitro analysis of aminoglycoside therapy for the Arg120stop caused by PSEN1 mutation (P264L), responsible for familial Alzheimer's disease, 176
shoebox mutations in autosomal recessive distal renal tubular acidosis, 286
shoX point mutations, SHOX point mutations and deletions in Len-Weil dyschondrosteosis, 633
Silver-Russell syndrome, Characterisation of the growth regulating gene IMP3, a candidate for Silver-Russell syndrome, 575
Investigation of the GRB2, GRB7, and CSH1 genes as candidates for the Silver-Russell syndrome (SRS) on chromosome 17q, 613
SIM1 gene, Deletion of the SIM1 gene (6q16.2) in a patient with a Prader-Willi-like phenotype, 594
sinus venosus type ASD, Two novel frameshift mutations in NXX2.5 result in novel features including visceral inversus and sinus venosus type A57, 807
skewed X inactivation, High frequency of skewed X inactivation in young breast cancer patients, 60
skin, Molecular changes in skin predict predisposition to breast cancer, 61
skin tumours, Clinical and genetic studies of Bir-Hogg-Dube syndrome, 906
SMARCAL1, Longevity in Schimke immuno-osseous dysplasia, 922
Smith-Lemli-Opitz syndrome, Smith-Lemli-Opitz syndrome, 906
Smith-Magenis syndrome, Molecular screening for Smith-Magenis syndrome among patients with mental retardation of unknown cause, 659
somatomedins, Somatomedins, 906
SPG4, SPG4 mutation in Japanese with late onset of spastic paraparesis, 715
SOST, Identification of a 52 kb deletion downstream of the SOST gene underlying Sanfilippo syndrome type B, 1175
spastic paraparesis, Spastic paraparesis and atypical dementia caused by PSEN1 mutation (P264L), responsible for familial Alzheimer's disease, 62
spastic paraplegia, Genetic mapping of a susceptibility locus for distal spinal cord and spastic paraplegia on Xp22.3-3p14.1, 387
spastin gene mutation, Spastin gene mutation in Japanese with hereditary spastic paraplegia, 646
spina bifida, Cystogenic analysis of spina bifida from males aged between 47 and 71 years, 636
SFG4, Autosomal dominant (AD) pure spastic paraplegia (HSP) linked to locus SFG4 affects almost exclusively males in a large pedigree, 677
Sanfilippo syndrome type B, Identification and characterisation of mutations underlying Sanfilippo syndrome type B (mucopolysaccharidosis type IIIB), 63
sarcoma, Low rate of TP53 germline mutations in breast cancer/sarcoma families not fulfilling classical criteria for Li-Fraumeni syndrome, 941
SCA8, Calculating predictive values for the large repeat alleles at the SCA8 locus in patients with ataxia, 935
screening, Molecular screening for Smith-Magenis syndrome among patients with mental retardation of unknown cause, 659
Prospective screening for subtelomeric rearrangements in children with mental retardation of unknown aetiology: the Amsterdam experience, 546
SDHB, SDHB mutation analysis in familial and sporadic phaeochromocytoma identifies a novel mutation, 664
two trimester amniocentesis, Physical and psychomotor development of 1799 children born after second trimester amniocentesis for maternal serum positive triple test screening and normal prenatal karyotype, 675
segmentation analysis, Branchio-oculo-facial syndrome and branchio-otic/broncho-oto-renal syndromes are distinct entities, 71
seipin, Genotype-phenotype relationships in Berardinelli-Seip congenital lipodystrophy, 722
seizures, Towards a suggestive clinical dysmorphism in adenylosuccinate lyase deficiency, 440
sequence analysis, Genetic and functional analysis of the von Hippel-Lindau (VHL) tumour suppressor gene promoter, 463
serum lipid levels, A Val227Ala polymorphism in the peroxisome proliferator activated receptor α (PPARα) gene is associated with variations in serum lipid levels, 189
sex chromosome mosaicism, A comparative study between infertile males and patients with Turner syndrome to determine the influence of sex chromosome mosaicism and the breakpoints of structurally abnormal Y chromosomes on phenotypic sex, 680
sex ratio, Hirschsprung disease and L1CAM: is the disturbed sex ratio caused by L1CAM mutations?, 611
SHOX, Prevalence of mutations in the short stature homeobox containing gene (SHOX) in Madelung deformity of childhood, 758
SHOX point mutations, SHOX point mutations and deletions in Len-Weil dyschondrosteosis, 633
Silver-Russell syndrome, Characterisation of the growth regulating gene IMP3, a candidate for Silver-Russell syndrome, 575
Investigation of the GRB2, GRB7, and CSH1 genes as candidates for the Silver-Russell syndrome (SRS) on chromosome 17q, 613
SIM1 gene, Deletion of the SIM1 gene (6q16.2) in a patient with a Prader-Willi-like phenotype, 594
sinus venosus type ASD, Two novel frameshift mutations in NXX2.5 result in novel features including visceral inversus and sinus venosus type A57, 807
skewed X inactivation, High frequency of skewed X inactivation in young breast cancer patients, 60
skin, Molecular changes in skin predict predisposition to breast cancer, 61
skin tumours, Clinical and genetic studies of Bir-Hogg-Dube syndrome, 906
SMARCAL1, Longevity in Schimke immuno-osseous dysplasia, 922
Smith-Lemli-Opitz syndrome, Smith-Lemli-Opitz syndrome, 906
Smith-Magenis syndrome, Molecular screening for Smith-Magenis syndrome among patients with mental retardation of unknown cause, 659
SNF2 protein, Influence of sex chromosome mosaicism and the breakpoints of structurally abnormal Y chromosomes on phenotypic sex, 680
spinal anomalies, Branchio-otic/branchio-oto-renal syndromes are distinct entities, 71
spastic paraparesis, Spastic paraparesis and atypical dementia caused by PSEN1 mutation (P264L), responsible for familial Alzheimer's disease, 62
spastic paraplegia, Genetic mapping of a susceptibility locus for distal spinal cord and spastic paraplegia on Xp22.3-3p14.1, 387
spastin gene mutation, Spastin gene mutation in Japanese with hereditary spastic paraplegia, 646
spina bifida, Cystogenic analysis of spina bifida from males aged between 47 and 71 years, 636
SPG4, Autosomal dominant (AD) pure spastic paraplegia (HSP) linked to locus SPG4 affects almost exclusively males in a large pedigree, 677

Subject index
Spondyloepimetaphyseal dysplasia with multiple dislocations

T gene, SNP S1103Y in the cardiac sodium channel gene

Suppressor, supernumerary marker chromosome (SMC), subtelomeric deletions,

Prospective screening for subtelomeric rearrangements

Subtelomeric 22q deletion, Molecular characterisation of a ring chromosome 22 in a patient with severe language delay; a contribution to the refinement of the subtelomeric 22q deletion syndrome.

Subtelomeric deletions, An aetiological study of 25 mentally retarded adults with autism, 205

Subtelomeric DNA, High throughput screening of human subtelomeric DNA for copy number changes using multiplex ampalifiable probe hybridisation (MAPH).

Subtelomeric rearrangements, Automated fluorescent genotyping detects 10% of cryptic subtelomeric rearrangements in de novo developmental mental retardation.

Subtelomeric rearrangements detected by FISH in three of 33 families with idiopathic mental retardation and minor physical anomalies, 53

Succinate dehydrogenase, Prevalence of SDHB, SDHC, and SDHD germline mutations in clinic patients with head and neck parangangiomas, 178

Sudden cardiac death, Dilated cardiomyopathy, sudden cardiac death, hypoplastic discs, and retinal detachment: a new autosomal dominant syndrome, 221

Sudden death, SNP S1103Y in the cardiac sodium channel gene SCN5A is associated with cardiac arrhythmias and sudden death in a white family, 913

Supernumerary marker chromosome (15), A patient with a supernumerary marker chromosome (15), Angelman syndrome, and uniparental disomy resulting from paternal meiosis II non-disjunction, e9

Supernumerary marker chromosome (SMC), Supernumerary marker chromosomes (SMC) and uniparental disomy (UPD): coincidence or consequence?, 775

Suppressor, Expression of wild type and mutant TSC2, but not TSC1, causes an increase in the G1 fraction of the cell cycle in HEK293 cells, 676

Supravalvular aortic stenosis, Cardiovascular manifestations in Williams syndrome ascertainment from population based registers, e54

Survival, Survival in trisomy 13 and trisomy 18 cases ascertainment from population based registers, e54

Sutherland-Haan syndrome, A new MRXS locus maps to the X chromosome pericentromeric region, a new syndrome or narrow definition of Sutherland-Haan genetic locus?, 276

Syndrome, Thrombocytopenia-absent radius syndrome: a clinical genetic study, 876

Syndromes, Familial adult renal neoplasia, 1

Synpolydactyly, The fibulin-1 gene (FBLN1) is disrupted in a patient with severe digital abnormalities, 554

Survival, Survival in trisomy 13 and trisomy 18 cases ascertainment from population based registers, e54

T cell immunodeficiency, Longevity in Schimke immuno-osseous dysplasia, 922

T gene, Human T and risk for neural tube defects, e14

T lymphoblastic lymphoma, Hereditary duplication of proximal chromosome 17 in a patient with T lymphoblastic lymphoma in the protein treacle, e14

T cell immunodeficiency, Longevity in Schimke immuno-osseous dysplasia, 922

T gene, Human T and risk for neural tube defects, e14

T lymphoblastic lymphoma, Hereditary duplication of proximal chromosome 17 in a patient with T lymphoblastic lymphoma in the protein treacle, a family study using G banding and comparative genomic hybridisation, e79

Talipes equinovarus, DTDST mutations are not a frequent cause of idiopathic talipes equinovarus (club foot), e20

TCOF1, Screening TCOF1 in patients from different populations: confirmation of mutational hot spots and identification of a novel missense mutation that suggests an important functional domain in the protein treacle, 245

Telomere, “Molecular rulers” for calibrating phenotypic effects of telomere imbalance, 734

Teratogenic effects, Antiepileptic drug therapy during pregnancy: the neurologist’s perspective, 248

Assessing epidemiological evidence for the teratogenic effects of antiepileptic drugs, e24

The teratogenicity of anticonvulsant drugs: a progress report, 245

Test results, Preconceptional couple screening for cystic fibrosis carrier status; couples prefer full disclosure of test results, e26

Tetralogy of Fallot, A novel atypical 22q11.2 deletion in father and son, e62

Therapy, In vitro analysis of aminoglycoside therapy for the treatment of congenital heart disease, 727

Three generations, Omphalocele in three generations with autosomal dominant transmission, 184

Thrombocytopenia, Thrombocytopenia-absent radius syndrome: a clinical genetic study, 876

TM4SF2 gene, A novel 2 bp deletion in the TM4SF2 gene is associated with MRX58, 430

TNDM, Transient neonatal diabetes, a disorder of imprinting, 872

TNFRSF11A, Familial pleiotropic osteolyisis in a patient kindred resulting from an insertion mutation in the TNFRSF11A gene, e67

TP53, Low rate of TP53 germline mutations in breast cancer/sarcoma families not fulfilling classical criteria for Li-Fraumeni syndrome, 941

Training, Management of women with a family history of breast cancer in the North West Region of England: training for implementing a vision of the future, 531

Transient neonatal diabetes, Transient neonatal diabetes, a disorder of imprinting, 872

Translocation, Abnormal expression of the KLF8 (ZNF741) gene in a female patient with an X-autosome translocation 1(X;21)(p11.2;q22.3) and non-syndromic mental retardation, 205

Sorting nexin 3 (SNX3) is disrupted in a patient with a translocation t(6;13)(q21;q12) and microcephalia, microphthalia, ectodacyly, progranulin (MMEP) phenotype, 893

Translocation 2q35, A cryptic deleted region of 2q35 including part of the PAX3 gene detected by breakpoint mapping in a child with autism and a de novo 2.8 translocation, 391

Transmission disequilibrium test, Association between markers in chromosomal region 17q23 and young onset hypertension: a TDT study, 42

Treacher Collins syndrome, Screening of TCOF1 in patients from different populations: confirmation of mutational hot spots and identification of a novel missense mutation that suggests an important functional domain in the protein treacle, 493

Treacle protein, Screening of TCOF1 in patients from different populations: confirmation of mutational hot spots and identification of a novel missense mutation that suggests an important functional domain in the protein treacle, 493

Trisomy 13, Survival in trisomy 13 and trisomy 18 cases ascertainment from population based registers, e54

Trisomy 18, Survival in trisomy 13 and trisomy 18 cases ascertainment from population based registers, e54

Trisomy 18p, Pure terminal duplication of the short arm of chromosome 18 in a boy with mild microcephaly, e60

Tropical calcific pancreatitis, Mutations in the pancreatic secretory trypsin inhibitor inhibitor gene (PSTI/SPINK1) rather than the cationic trypsinogen gene (PRSS1) are significantly associated with tropical calcific pancreatitis, 347

Truncation, Heterozygous truncating mutation in the human homeobox gene GSH2 has no discernable phenotypic effect, 686

TSC2-PKD1 contiguous gene syndrome, Acrofacial dysostosis in a patient with the TSC2-PKD1 contiguous gene syndrome, 136

Tuberculous sclerosis complex, Expression of wild type and mutant TSC2, but not TSC1, causes an increase in the G1 fraction of the cell cycle in HEK293 cells, 676

Tumour necrosis factor-α, Association of polymorphisms and allelic combinations in the tumour necrosis factor-α complementary MHC region with coronary artery disease, 46

Tumour suppressor gene, PRRK1A1, one of the Carney complex genes, and its locus (17q22-24) are rarely altered in pituitary tumours outside the Carney complex, e76

Tumour suppressor genes, The null oncogene hypothesis and its locus (17q22-24) are rarely altered in pituitary tumours outside the Carney complex, e76

Tumour suppressor genes, The null oncogene hypothesis and its locus (17q22-24) are rarely altered in pituitary tumours outside the Carney complex, e76

Tumour suppressor genes, The null oncogene hypothesis and protection from cancer, 12

Tunisia, CYS1275H (FH-Karzand) and D245N (FH-Tozeur) mutations in the LDL receptor gene in Tunisian families with familial hypercholesterolaemia, 674

Turner syndrome, A comparative study between infertile males and patients with Turner syndrome to determine the influence of sex chromosome mosaicism and the breakpoints of structurally abnormal Y chromosomes on phenotypic sex, 680

Phenotypic effects of mosaicism for a 47,XXX cell line in Turner syndrome, 217

Type I collagen, Testing for osteogenesis imperfecta in cases of suspected non-accidental injury, 382

Ulcerative colitis, Association of Crohn’s disease and ulcerative colitis with haplotypes of the MLH1 gene in Italian inflammatory bowel disease patients, 332
ultrasonography, Prenatal detection of cystic fibrosis by ultrasonography, a retrospective study of more than 346,000 pregnancies, 443

unbalanced (Y;1) translocation, Transmission of an unbalanced (Y;1) translocation in Brittany, France, e52

Unified Huntington's Disease Rating Scale (UHDRS), Behavioural complaints in participants who underwent predictive testing for Huntington's disease, 857

uniparental disomies, Automated fluorescent genotyping detects 10% of cryptic subtelomeric rearrangements in idiopathic syndromic mental retardation, 266

uniparental disomy, A patient with a supernumerary marker chromosome (15), Angelman syndrome, and uniparental disomy resulting from paternal meiosis II non-disjunction, e9

Maternal uniparental disomy 12 in a healthy girl with a 47,XX,+der(12)(p11→q11);46,XX karyotype, 519

Severe phenotype in Angelman syndrome resulting from paternal isochromosome 15, e4

uniparental disomy (UPD), Supernumerary marker chromosomes (SMC) and uniparental disomy (UPD): coincidence or consequence?, 775

urogenital anomalies, Correlation between a specific Wilms tumour suppressor gene (WT1) mutation and the histological findings in Wilms tumour (WT), e83

uromodulin, Mutations of the UMOD gene are responsible for medullary cystic kidney disease 2 and familial juvenile hyperuricaemic nephropathy, 882

USH2A and USH2B subtypes, Distinctive audiometric features between USH2A and USH2B subtypes of Usher syndrome, 281

Usher syndrome, Distinctive audiometric features between USH2A and USH2B subtypes of Usher syndrome, 281

vacuolating megalencephalic leucoencephalopathy, A common ancestral haplotype in carrier chromosomes from different ethnic backgrounds in vacuolating megalencephalic leucoencephalopathy with subcortical cysts, 54

Val227Ala polymorphism, A Val227Ala polymorphism in the peroxisome proliferator activated receptor α (PPARα) gene is associated with variations in serum lipid levels, 189

van Buchem disease, Identification of a 52 kb deletion downstream of the SOST gene in patients with van Buchem disease, 11

varicose veins, Analysis of the phenotypic abnormalities in lymphoedema-distichiasis syndrome in 74 patients with FOXC2 disease, 315

vestibular schwannoma, Molecular genetic analysis of the NF2 gene in young patients with unilateral vestibular schwannomas, 315

VHL gene, Germline mutations in the von Hippel-Lindau (VHL) gene in patients from Poland: disease presentation in patients with deletions of the entire VHL gene, e38

Genetic and functional analysis of the von Hippel-Lindau (VHL) tumour suppressor gene promoter, 463

Germline mutations in the von Hippel-Lindau (VHL) gene in patients from Poland: disease presentation in patients with deletions of the entire VHL gene, e38

W846X mutation, Relationship between genotype and phenotype for the CFTR gene W846X mutation, e32

Williams syndrome, Cardiovascular manifestations in 75 patients with Williams syndrome, 554

Wilms tumour, Correlation between a specific Wilms tumour suppressor gene (WT1) mutation and the histological findings in Wilms tumour (WT), e83

Wnt pathway, Genetic characterisation of patients with multiple colonic polyps, 297

WT1, A necropsy case of Denys-Drash syndrome with a WT1 mutation in exon 7, e48

Correlation between a specific Wilms tumour suppressor gene (WT1) mutation and the histological findings in Wilms tumour (WT), e83

X chromosome, A locus for isolated cataract on human Xp, 105

High frequency of skewed X inactivation in young breast cancer patients, 30

X chromosome inversion, Klinefelter-like phenotype and primary infertility in a male with a pericentric Xq inversion, e28

X linked Charcot-Marie-Tooth neuropathy, Allelic variants in the non-coding region of the connexin32 gene: possible pitfalls in the diagnosis of X linked Charcot-Marie-Tooth neuropathy (CMX), e58

X linked mental retardation, A new MRXS locus maps to the X chromosome pericentromeric region: a new syndrome or narrow definition of Sutherland-Haan genetic locus?, 276

A novel 2 bp deletion in the TM4SF2 gene is associated with MRX58, 430

Abnormal expression of the KLF8 (ZNF741) gene in a female patient with an X:autosome translocation t(X;21)(p11.2;q22.3) and non-syndromic mental retardation, 113

Functional characterisation of MeCP2 mutations found in male patients with X linked mental retardation, 132

Xq22.3, Alport syndrome and mental retardation: clinical and genetic dissection of the contiguous gene deletion syndrome in Xq22.3 (ATS-MR), 358

Xq27-q28, Refined mapping of the gene for otopalatodigital syndrome type I, e7

XX sex reversal, FOXL2 mutation screening in a large panel of POI patients and XX males, e43

Y, Transmission of an unbalanced (Y;1) translocation in Brittany, France, e52

Y chromosome, A new case of Yq microdeletion transmitted from a normal father to two infertile sons, e27

Localisation of the Y chromosome stature gene to a 700 kb intergenic region: a new syndrome or non-coding region of the connexin32 gene: possible pitfalls in the diagnosis of the C-propeptide region of the molecule, 661

Y chromosome breakpoint, A comparative study between infertile males and patients with Turner syndrome to determine the influence of sex chromosome mosaicism and the breakpoints of structurally abnormal Y chromosomes on phenotypic sex, e80

young onset, Association between markers in chromosomal region 17q23 and young onset hypertension: a TDT study, 42
