

Review article

Mitochondrial DNA analysis: polymorphisms and pathogenicity *P F Chinnery, N Howell, R M Andrews, D M Turnbull* 505

Original articles

Applications of comparative genomic hybridisation in constitutional chromosome studies *C J Breen, L Barton, A Carey, A Dunlop, M Glancy, K Hall, A M Hegarty, M T Khokhar, M Power, K Ryan, A J Green, R L Stallings* 511
Analysis of germline CDKN1C (p57^{cor}) mutations in familial and sporadic Beckwith-Wiedemann syndrome (BWS) provides a novel genotype-phenotype correlation *W W K Lam, I Hatada, S Ohishi, T Mukai, J A Joyce, T R P Cole, D Donnai, W Reik, P N Schafeld, E R Maher* 518
CDKN1C expression in Beckwith-Wiedemann syndrome patients with allele imbalance *E M Algar, G J Deeb, P J Smith* 524

A gene for autosomal dominant hearing impairment (DFNA14) maps to a region on chromosome 4p16.3 that does not overlap the DFNA6 locus *G Van Camp, H Kunst, K Flothmann, W McGuirt, J Wauters, H Marres, M Verstreken, I N Bespalova, M Burmeister, P H Van de Heyning, R J H Smith, P J Willems, C W R J Cremers, M M Lesperance* 532

Atypical haemochromatosis: phenotypic spectrum and β_2 -microglobulin candidate gene analysis *A P Walker, D F Wallace, J Partridge, A B Bamford, J S Dooley* 537

Double heterozygosity for mutations in the β -myosin heavy chain and in the cardiac myosin binding protein C genes in a family with hypertrophic cardiomyopathy *P Richard, R Isnard, L Carrier, O Dubourg, Y Donatien, B Mathieu, G Bonne, F Gary, P Charron, A Hagege, M Komajda, K Schwartz, B Hainque* 542

The effect of CAT trinucleotide interruptions on the age at onset of spinocerebellar ataxia type I (SCA1) *Z Matsuyama, Y Izumi, M Kameyama, H Kawakami, S Nakamura* 546

Two male patients with ring Y: definition of an interval in Yq contributing to Turner syndrome *M Tzancheva, R Kaneva, P Kumanov, G Williams, C Tyler-Smith* 549

Angelman syndrome resulting from UBE3A mutations in 14 patients from eight families: clinical manifestations and genetic counselling *A Moncla, P Malzac, M-O Livet, M-A Voelckel, J Mancini, J C Delarozziere, N Philip, J-F Mattei* 554

Short reports

Epiphyseal, vertebral, and ear (EVE) dysplasia: a new syndrome? *J Amiel, V Cormier-Daire, P Journeau, P Mussat, A Munnich, S Lyonnet* 561

Fragile X syndrome with FMR1 and FMR2 deletion *S J Moore, L Strain, G F Cole, Z Miedzybrodzka, K F Kelly, J C S Dean* 565

A neuropsychological-genetic profile of atypical cri du chat syndrome: implications for prognosis *K M Cornish, G Cross, A Green, L Willatt, J M Bradshaw* 567

Letters to the Editor

Biochemical and genetic characterisation shows that the BRCA1 IVS20 insertion is a polymorphism *T Scholl, M T Pyne, B Ward, D Pruss* 571

Germline mutations in the β -catenin gene are not associated with the FAP phenotype without an APC mutation *Z Dobbie, H Müller* 573

Simpson-Golabi-Beckel syndrome and attention deficit hyperactivity disorder in two brothers *R Savarirayan, A Bankier* 574

Presence of a deletion in the 5' upstream region of the GALT gene in Duarte (D2) alleles *L Kozák, H Francová, A Pjáčková, J Macku, S Stastná, K Pesková, O Martinová, J Krijt* 576

Familial congenital diaphragmatic hernia: is an imprinting mechanism involved? *E D Austin-Ward, S C Taucher* 578

Genetic counselling: do we recognise and meet the consultants' agenda? *A Shankar, P Chapman, J Goodship* 580

Costello syndrome and rhabdomyosarcoma *M Feingold* 582
