

THE AMERICAN JOURNAL OF HUMAN GENETICS

Edited by David E. Comings

The American Journal of Human Genetics ranks among the highest circulation human genetics publications, and is devoted to the application of genetic principles in *medicine*, *anthropology*, *psychology*, and the *social sciences*.

Recent years have witnessed the introduction of DNA cloning in bacterial plasmids, rapid DNA sequencing, detailed knowledge of chromatin structure, high resolution techniques of chromosome banding, the mapping of human genes, and an increased understanding, at a biochemical level, of many human genetic disorders. The **Journal** addresses these issues and explores related areas of molecular biology relevant to human genetics.

FROM RECENT ISSUES

- C. R. Scriver, On Phosphate Transport and Genetic Screening. "Understanding Backward-Living Forward" in Human Genetics
- G. L. Miklos and B. John, Heterochromatin and Satellite DNA in Man: Properties and Prospects
- A. G. Knudson, Jr., Our Load of Mutations and Its Burden of Disease
- G. R. Sutherland, Heritable Fragile Sites on Human Chromosomes. I. Factors Affecting Expression in Lymphocyte Culture. II. Distribution, Phenotypic Effects, and Cytogenetics
- S. Karlin, R. Kenett, and B. Bonn -Tamir, Analysis of Genetic Data on Jewish Populations

The American Journal of Human Genetics is the official publication of *The American Society of Human Genetics*
Genetic Evolution by Chen Kang Chai, cloth edition, is available to Journal subscribers at a 30% discount.
