# **Journal of Medical Genetics**

# THE FIRST YEAR OF LIFE

Recent research has vastly improved our understanding of a child's development in the first year of life.

In particular, assessment of normal progress is now much more systematic, so that deviations from the normal are recognised earlier.

Dr. Bernard Valman's illustrated account of current methods of examination, assessment and management of the medical problems of early infancy will prove invaluable to all concerned with small babies.

The articles have now been collected into book form in exactly the same format as they appeared in the BMJ.

Price: Inland £5.00;

Overseas US\$12.50

(Inland £4.50;

Overseas US\$11.25 for BMA members.

When ordering BMA members must quote their membership number or the full price will be applicable.)

Payment must be enclosed with order or a surcharge of 50p will be made for rendering invoices and statements.
