

Contents

The genetic control of sparteine and debrisoquine metabolism in man with new methods of analysing bimodal distributions D A P EVANS, D HARMER, D Y DOWNHAM, E J WHIBLEY, J R IDLE, J RITCHIE, AND R L SMITH *page 321*

The association of the slow acetylator phenotype with bladder cancer D A P EVANS, L C EZE, AND E J WHIBLEY *page 330*

Linkage analysis of neurofibromatosis (von Recklinghausen disease) M A SPENCE, J L BADER, D M PARRY, L L FIELD, S J FUNDERBURK, A E RUBENSTEIN, P A GILMAN, AND R S SPARKES *page 334*

Congenital malformations associated with anencephaly in the Fylde peninsula of Lancashire T J DAVID, F C MCCRAE, AND J P BOUND *page 338*

Familial atypical multiple mole-melanoma (FAMMM) syndrome: segregation analysis H T LYNCH, R M FUSARO, W J KIMBERLING, J F LYNCH, AND B SHANNON DANES *page 342*

The infrequency of malignant disease in diaphyseal aclasis and neurofibromatosis S VOUTSINAS AND R WYNNE-DAVIES *page 345*

C heterochromatin variation in couples with recurrent early abortions A MAES, C STAESSEN, L HENS, E VAMOS, M KIRSCH-VOLDERS, M C LAUWERS, E DEFRISE-GUSSENHOVEN, AND C SUSANNE *page 350*

Familial aggregation of streptomycin ototoxicity: autosomal dominant inheritance? D L VILJOEN, S L SELLARS, AND P BEIGHTON *page 357*

Constitutional aplastic anaemia: a family with a new X linked variety of amegakaryocytic thrombocytopenia A D GRIFFITHS *page 361*

HLA-DR2 in two sibships with insulin-dependent diabetes mellitus I DESCHAMPS, H LESTRADET, M SCHMID, AND J HORS *page 365*

Empirical recurrence risk after unidentified multiple congenital abnormalities A CZEIZEL AND J MÉTNEKI *page 367*

Spontaneous and mutagen induced sister chromatid exchange in multiple sclerosis VIJAYALAXMI, M S NEWTON, C M STEEL, H J EVANS, AND B PENTLAND *page 372*

Monosomy 18p and pure trisomy 18p in a family with translocation (7;18) M HABEDANK AND G TROST-BRINKHUES *page 377*

Two cases of ring chromosome 11 D R ROMAIN, O B GEBBIE, R G PARFITT, L M COLUMBANO-GREEN, R H SMYTHE, C J CHAPMAN, AND A KERR *page 380*

Case reports

A child with partial trisomy of chromosome 17 and partial monosomy of chromosome 3: 46,XY,der(3),t(3;17)(p25;q23) D J SHAW, C FEAR, AND W J APPELYARD *page 383*

De novo translocation heterozygote with three reciprocal translocations J L WATT AND D A COUZIN *page 385*

A complex double translocation involving four chromosomes and five breakpoints in a child with mild mental retardation D A COUZIN, J L WATT, AND I A AUCHTERLONIE *page 389*

Yq deletion with short stature, abnormal male development, and schizoid character disorder G KOSZTOLÁNYI AND M TRIKLER *page 393*

Complete trisomy 5p owing to de novo translocation t(5;22)(q11;p11) with isochromosome 5p associated with a familial pericentric inversion of chromosome 2, inv 2(p21q11) E ORYE, Y BENOIT, AND B VAN MELE *page 394*

Tetrasomy 9p confirmed by GALT P BALESTRAZZI, G CROCI, C FRASSI, F FRANCHI, AND G GIOVANNELLI *page 396*

Announcements *page 400*
