Robin M Winter  
Ruth Wynne-Davies  
Editor, *British Medical Journal*

Technical Editor: Clare Henderson

## Notice to Contributors

Papers, which should be in duplicate and in the Vancouver style, should be sent to the Editor, *Journal of Medical Genetics*, BMA House, Tavistock Square, London WC1H 9JR. A stamped addressed postcard should be enclosed for return to author as acknowledgement of receipt of MS. Overseas authors should enclose an international reply paid coupon. Submission of a paper will be held to imply that it contains original work which has not been previously published. The signature of each author is required on the covering letter. Permission to republish must be obtained from the Editor.

Papers should conform to one of the following categories. *Original contributions* on clinical or laboratory aspects of medical genetics in man and on related animal studies. *Case reports* with particularly instructive clinical or genetic features: to be not longer than 1000 words of text, two or at most three figures, one table (if necessary), and eight references. *Short reports* of unusual cases: to be not longer than 500 words of point form description with a clinical photograph and partial karyotype, if appropriate, and no more than two or three references. Single case reports will usually only be considered in one of these forms. *Review articles* will generally be by invitation, but suggestions from authors wishing to prepare a review article will be welcome. *Annotations, Hypotheses, Preliminary communications, and Technical notes* will also be considered, as will *Short communications* giving information on new translocations, chromosome identification by banding techniques, and second and third findings of important haemoglobins. Contributions to the *Correspondence and Question and answer* columns will be welcomed. Publication of papers thought to be of special importance may be expedited.

All contributions should be accompanied by a summary giving the main results and conclusions. Typescripts should be double spaced with wide margins. One page proof will be sent to the author submitting the paper and alterations on the proof, apart from printer's errors, are not permitted. Twenty-five free reprints will be supplied and further reprints may be ordered when the proof is returned.

*Figures* should be kept to a minimum and should be numbered consecutively in Arabic numerals. Legends should be typed on a separate sheet. Photographs should be on glossy paper and diagrams should be drawn on stout white paper. Photographs of karyotypes do not reproduce well. Chromosomes should be cut out and stuck onto stout paper. Any lettering should be indicated on a separate transparent overlay. Pedigrees should use squares and circles. Generations should be numbered with Roman and individuals with Arabic numerals; members belonging to the same generation should be horizontally aligned.

*Tables* should not be included in the body of the text, but should be typed on separate pages and numbered with Arabic numerals.

*References* should conform precisely to the style current in this Journal. Authors are responsible for the *accuracy and completeness* of their references as these will not be checked by the Editorial Office.

*Nomenclature.* Authors should refer to the following publications.

(1) Chromosomes: ISCN. An international system for human cytogenetic nomenclature (1978). *Birth Defects* 1978; XIV:No 8. Also in *Cytogenet Cell Genet* 1978;21: 309-404.

(2) Dermatoglyphs: Penrose LS. Memorandum on dermatoglyphic nomenclature. *Birth Defects* 1968;4:No 3.

(3) Enzymes: WHO Scientific Group. Standardization of procedures for the study of glucose-6-phosphate dehydrogenase. *WHO Tech Rep Ser* 1967;No 366.

(4) Blood coagulation: International Committee of Haemostasis and Thrombosis (Graham JB *et al*). A genetic nomenclature for human blood coagulation. *Thromb Haemostas* 1973;30:2-11.

(5) Loci: Conventional nomenclature should be used, with lower case lettering as appropriate (for example, Race RR, Sanger R. *Blood groups in man*. 6th ed. Oxford, London: Blackwell, 1975; and Giblett ER. *Genetic markers in human blood*. Oxford, London: Blackwell, 1969).

(6) Genes: Shows TB *et al*. International system for human gene nomenclature (1979). *Cytogenet Cell Genet* 1979;25:96-116.

*SI units.* The units in which the authors' work was measured should be cited first followed by either the SI units or the traditional units. This does not apply to tables, but here a conversion factor should be added as a footnote.

## Notice to Advertisers

Applications for advertising space and rates should be made to the Advertisement Manager, *Journal of Medical Genetics*, BMA House, Tavistock Square, London WC1H 9JR.

## Notice to Subscribers

The Journal is published 6 times a year and the annual subscription rate is £34.00 in the United Kingdom and Republic of Ireland, US \$84.00 by surface mail in all countries overseas.

Payments for overseas subscriptions should be made in US dollars, ie US \$76.00, or in your national currency based on the prevailing exchange rate to the US dollar of that currency, payable to the British Medical Association. Orders can also be placed locally through any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, can be sent to: BRITISH MEDICAL JOURNAL, Box 560B, Kennebunkport, Maine 04046, USA. All inquiries, however, must be addressed to the Publishers in London.) Inquiries regarding Air Mail rates and single copies already published should be addressed to the Publisher in London.

## THE EUGENICS SOCIETY

### MARIE STOPES RESEARCH FUND

The Council of the Eugenics Society is prepared to receive applications for support of research in those areas of activity for which the late Dr Marie Carmichael Stopes through her work with the Society for Constructive Birth Control is best remembered, namely problems of: (a) fertility control; (b) differential fertility; (c) eugenic aspects of reproduction and population; and (d) eugenic aspects of sex education and sexual behaviour and the impact of all these and related matters on the welfare of women and of the community, with particular emphasis (in keeping with the biosocial outlook of the Society) on interdisciplinary research.

The General Secretary of the Society will be pleased to provide further information and advice on the appropriate method of application. For details please write to The Eugenics Society, 69 Eccleston Square, London SW1V 1PJ. Telephone: 01-834 2091. (UK based projects only.)

## THE SIXTEENTH ANNUAL NEW YORK MARCH OF DIMES MEDICAL SYMPOSIUM

A symposium on *The Fetal Patient: Assuring a Healthy Newborn* will be held at The Grand Hyatt Hotel, Park Avenue at Grand Central, New York City on Monday and Tuesday, 21 and 22 November 1983. For further details contact Leona J Schumer, March of Dimes, 622 Third Avenue, New York, NY 10017, USA. Telephone: (212) 922-1460.
