Editorial *page* 81

Review article The fragile X syndrome: the patients and their chromosomes M A DE ARCE AND A KEARNS *page* 84

Location of the retinoblastoma susceptibility gene(s) and the human esterase D locus P WARD, S PACKMAN, W LOUGHMAN, M SPARKES, R SPARKES, A MCMAHON, T GREGORY, AND A ABLIN *page* 92

Breast cancer, genetics, and age at first pregnancy H T LYNCH, W A ALBANO, M A LAYTON, W J KIMBERLING, AND J F LYNCH *page* 96

On the identification and frequency of the J and K cholinesterase phenotypes in a Caucasian population R T EVANS AND J WARDELL *page* 99

Late infantile autosomal recessive myotonia, mental retardation, and skeletal abnormalities: a new autosomal recessive syndrome A RICHERI-COSTA, S M GARCIA DA SILVA, AND O FROTA-PESSOA *page* 103

Multiple endocrine neoplasia type 2 (Sipple's syndrome): clinical and cytogenetic analysis of a kindred A ZATTERALE, M STABILE, V NUNZIATA, G DI GIOVANNI, R VECCHIONE, AND V VENTRUTO *page* 108

Familial multiple naevi flammei A SHUPER, P MERLOB, B GARTY, AND I VARSANO *page* 112

Familial occurrence of unilateral giant breasts in Nigeria: a possible new genetic entity O A BADEJO *page* 114

$\delta\beta$ -thalassaemia in southern Italy: evidence for a single mutational event A CARÈ, N M SPOSI, A GIAMPAOLO, T IMPROTA, M CALANDRINI, M PETRINI, M MARINUCCI, A TAGARELLI, AND C BRANCATI *page* 117

A computerised data base for the diagnosis of rare dysmorphic syndromes R M WINTER, M BARAITSER, AND J M DOUGLAS *page* 121

The 3-M syndrome R M WINTER, M BARAITSER, D B GRANT, M A PREECE, AND C M HALL *page* 124

Gossypol induces DNA strand breaks in human fibroblasts and sister chromatid exchanges in human lymphocytes in vitro M NORDENSKJÖLD AND B LAMBERT *page* 129

Trisomy 1q24→1q41 in two sibs with an insertion in an inverted chromosome 4 C STOLL, M-P ROTH, AND B DOTT *page* 133

Technical note Treated glass coverslips for in situ culture of amniotic cells: better cell adhesion and growth than on plastic V PECILE, N ARCHIDIACONO, AND M ROCCHI *page* 136

Abstracts of the meeting of the Clinical Genetics Society held on 18 and 19 November 1983 at Guy's Hospital, London *page* 138

Case reports

Trisomy 5p: a second case occurring in a previously described kindred M VOWLES, A McDERMOTT, AND I JANOTA *page* 144

A case of deletion 2q35→qter and a peculiar phenotype J M SÁNCHEZ AND A M PANTANO *page* 147

Familial pericentric inversion (13) detected by antenatal diagnosis E L MALTBY *page* 149

Trisomy 18 phenotype in a patient with an isopseudodicentric 18 chromosome E A WULFSBERG, R S SPARKES, I J KLISAK, AND A TENG *page* 151

A genetic combination of silent β -thalassaemia, high Hb A₂ β -thalassaemia, and single α globin gene deletion causing mild thalassaemia intermedia R GALANELLO, L MACCIONI, M C ROSATELLI, P IBBA, A M NURCHI, AND A CAO *page* 153

Correspondence *page* 157

Announcements *page* 160
