

VOLUME 27 · AUTHOR INDEX

Note: All notices for conferences, symposia, and meetings are under one heading: ANNOUNCEMENTS

- ABBS S, ROBERTS R G, MATHEW C, BENTLEY D R, and BOBROW M Total intragenic recombination frequency for the Duchenne/Becker muscular dystrophy gene 650 abst
see also CLARK S *et al*
- AHO H *see* SALONEN R *et al*
- AKHURST R J *see* FITZPATRICK D R *et al*
- AL-GAZALI L I, FARNDON P, BURN J, FLANNERY D B, DAVISON C, and MUELLER R F The Schinzel-Giedion syndrome: syndrome of the month 42
- MUELLER R F, CAINE A, ANTONIOU A, MCCARTNEY A, FITCHETT M, and DENNIS N R Two 46,XX,(X;Y) females with linear skin defects and congenital microphthalmia: a new syndrome at Xp22.3: case report 59
- AL-JADER L, MEREDITH L, SARFARAZI M, GOODCHILD M, PROSSER R, and HARPER P S Clinical application of haplotype frequencies in cystic fibrosis families in Wales 207 abst
- AL-JADER L N, GOODCHILD M C, RYLEY H C, and HARPER P S Attitudes of parents of cystic fibrosis children towards neonatal screening and prenatal diagnosis 658 abst
- ALEMBIK Y *see* STOLL C *et al*
- ALLAN L *see* BURN J *et al*
- ALLANSON J *see* UPADHYAYA M *et al*
- ALSALEH Q A and TEEBI A S Autosomal recessive epidermolytic palmoplantar keratoderma: case report 519
- AMBROSINI M *see* FERRARO M *et al*
- ANAD F, BURN J, MATTHEWS D, CROSS I, DAVISON B C C, MUELLER R, SANDS M, LILLINGTON D M, and EASTHAM E Alagille syndrome and deletion of 20p 729
- ANDERSEN E B *see* HASHOLT L *et al*

VOLUME 27 · SUBJECT INDEX

Note: All notices for conferences, symposia, and meetings are under one heading: ANNOUNCEMENTS

- Abetalipoproteinaemia and familial hypobetalipoproteinaemia, compound heterozygosity for: case report** 133
- Abstracts, Clinical Genetics Society meeting, London, October 1989** 205: Clinical Genetics Society and Clinical Molecular Genetics Society meeting, Newcastle upon Tyne, April 1990 645
- Acheiria recurrence, in second cousin, extremely large pedigrees may include 'second cases' by chance: correspondence** 277
- Acrocallosal syndrome**
clinical variability, mild case: case report 516
Turkish boy: case report 48
- Adrenoleucodystrophy, molecular genetic study, five families** 670
- Alagille syndrome and deletion of 20p** 729
- Albinism, Black populations, Southern Africa** 208 *abst*
- Alopecia, acquired, mental retardation, short stature, microcephaly, and optic atrophy: case report** 635
- Alpha-fetoprotein**
in midtrimester Down's syndrome fetal serum 240
serum, in fetuses with Down's syndrome in the mid-trimester 656 *abst*
- Alstrom's syndrome, further evidence of autosomal recessive inheritance and endocrinological dysfunction: case report** 590
- Alzheimer's disease, chromosomal radiosensitivity of lymphocytes** 437
- Amyoplasia of chest wall in monozygotic twins (Poland spectrum)** 646 *abst*
- Anembryonic pregnancy, genetic aetiology** 659 *abst*
- Angelman's syndrome**
abnormality of 15q11–13, and imprinting: correspondence 141, 275, 663
molecular genetic studies 205 *abst*
- Ankyloblepharon filiforme adnatum in trisomy 18 Edwards syndrome: case report** 720
- ANNOUNCEMENTS** see NOTICES
- Apolipoprotein B-100, familial defective, detection and clinical characteristics** 649 *abst*
- Apolipoprotein B gene, strategies for detection of single base changes in subjects heterozygous for alleles** 206 *abst*
- Appointments, failure to attend** 660 *abst*
- 'ARMS' primers for detection of mutation causing cystic fibrosis and rapid and simple technique for paternity testing 210 *abst*
- Ataxia telangiectasia**
classical, genetic study 645 *abst*
genetic study, how do families benefit 206 *abst*
- Atelosteogenesis: case report** 194
- Atrioventricular septal defect identified by RNA, first trimester** 209 *abst*
- Attendance failure at Genetic Clinic** 660 *abst*
- Autosomal dominant polycystic kidney disease type II (ADPKD2), exclusion from 160 cM of chromosome 1** 697
- Baller-Gerold syndrome (craniosynostosis and radial aplasia) normal growth and development in a child: case report** 784
- phenotypic and cytogenetic overlap with Roberts syndrome 371
- Becker muscular dystrophy**
analysis of dystrophin gene deletions by means of multiplex PCR amplification, Scotland 656 *abst*
correlation of deletion type with clinical severity 236 /DMD, deletion analysis, families from German Democratic Republic, Czechoslovakia and Hungary 679
- experience of polymerase chain reaction in diagnosis, benefits and problems encountered 656 *abst*
families, analysis with dystrophin cDNA probes, Scotland 292
- gene, total intragenic recombination frequency 650 *abst*
polymerase chain reaction based method for molecular analysis 657 *abst*
- Binder's syndrome (maxillonasal dysplasia): syndrome of the month** 384
- Blood pressure, identification of genetic determinants** 650 *abst*

- neonatal, linkage to Xq28 DNA marker loci 284
- linkage to Xq28 DNA marker 284
- Cerebellar haemangioblastoma, sporadic, and von Hippel-Lindau disease, statistical analysis of two stage mutation model 311
- CHARGE association: correspondence 533
- Chemiluminescence, enhanced, detection of Western blotted proteins 655 *abst*
- CHILD+ILVEN=PEN or PENCIL: hypothesis 390
- Choanal atresia cardiac defects, deafness, dysmorphic facies, eye defects and ear anomalies, CCDDEE syndrome, two male sib pairs with 659 *abst*
- as feature of ectrodactyly-ectodermal dysplasia-clefting syndrome, further case: correspondence 213
- Cholesterol, very low HDL in Niemann-Pick disease and sea-blue histiocytosis 499
- Chorea, autosomal dominant, with intellectual preservation and cystic degeneration of basal ganglia, differential diagnosis in Huntington's chorea 647 *abst*
- Choroideremia, linkage studies and deletion screening 496
- Chromosome anomalies in spontaneous miscarriages 654 *abst*
- duplications, partial, t(10;13)(p13;q22) with multiple abnormalities: case report 188
- imbalance, normal phenotype, and imprinting: case report 582

- meiotic pairing, proposed regulatory role for genomic imprinting 647 *abst*
- mosaic normal/balanced rearrangements, variable effect, man 505
- radiosensitivity of lymphocytes from Alzheimer's disease 437
- translocation t(8;10)(q22.3;p13) associated with dominantly transmitted cleidocraniofacial abnormalities 208 *abst*
- Chromosomes**
- 1, linkage of internal minisatellite loci on 14
 - 9, 16, pericentric heterochromatin, small marker chromosomes origin from 155
 - and 11, markers, Marfan syndrome linkage analysis 82; correspondence 792
 - 2 (pter→p24:) apparent de novo terminal deletion: short report 137
 - 4, del(4)(q12q21.1), child with multiple congenital abnormalities: short report 64
 - 6, partial duplication of long arm, clinically recognisable syndrome: case report 523
 - 7, partial trisomy of 7q caused by structural rearrangements 109
 - 7 and 18, no evidence for genetic linkage of Gilles de la Tourette syndrome 433
 - 8p, partial monosomy with minimal dysmorphic signs: case report 327
 - 8p12→p23.1, inverted tandem duplication with increased activity of glutathione reductase: case report 135
 - 15q11–13, abnormality, and Angelman's syndrome and imprinting: correspondence 141, 663
 - 16, cosegregation of hypertrophic cardiomyopathy and fragile site 363
 - short arm, map of 16 polymorphic loci close to polycystic kidney disease gene 603
 - 17 linkage of hereditary motor and sensory neuropathy type I 205 *abst*
 - 21q– 'syndrome', two new cases 654 *abst*
 - 22, partial monosomy, with del(22)(pter→q13.1:: q13.33→qter): case report 588
 - 49,XXXXY syndrome, origin of X chromosomes: short report 203: 206 *abst*
 - X, distal long arm deletions, ovarian failure: case report 722
 - Xp22.2–pter with linear skin lesions of face and neck, microphthalmia, and anterior chamber eye anomalies: case report 56: correspondence 598
 - Xp22.3, (46,XX,t(X;Y) females) with linear skin defects and congenital microphthalmia, new syndrome at Xp22.3: case report 59
 - Xq, molecular and cytogenetic analysis of familial microdeletion 648 *abst*
 - Xq28 DNA markers *see* Centronuclear myopathy
 - Y, three males with structural abnormalities 648 *abst*
 - Cleft lip**
 - median, associated with cutaneous polyps: case report 337
 - and palate, dominantly inherited: correspondence 597 - Cleidocraniofacial abnormalities**, dominantly transmitted, associated with chromosomal translocation t(8;10)(q22.3;p13) 208 *abst*
- Coagulation factor abnormalities in Noonan syndrome 646 *abst*
- Coffin–Siris syndrome: case report 333
- Collagen loci**,
- COL2A1, exclusion in Wagner–Stickler syndrome 91 in Marfan syndrome, large French family 78

- Sotos syndrome
syndrome of the month 571
diagnostic features and natural history 646 *abst*
and neuroblastoma: case report 130
- South Africa, medical genetics: medical genetics around the world 760
- Sparse hair, mental retardation, seizures, and microcephaly, familial syndrome: case report 127
- Spondyloepiphyseal dysplasia, phenotypic, genetic, and molecular heterogeneity 652 *abst*
- Stickler syndrome family, polymerase chain reaction amplification of 3' variable region of COL2A1 649 *abst*
- Syndactyly, type III, and oculodentodigital dysplasia, separate genetic entities or disease spectrum? 169
- Tay-Sachs disease
heterozygote screening 206 *abst*
talking about, video presentation: correspondence 142
- Teaching clinical genetics, Britain, Royal College of Physicians, London, report: annotation 707
- Terminal deletion (14)(q32.3), new case: case report 261
- Tetraploidy in liveborn infant: case report 782
- Thalassaemia
alpha, caused by chromosome truncation 649 *abst*
mental retardation syndrome (non-deletional type) Australian male: case report 577
- beta, mutations common Asian Indian, simple, non-radioactive method for detecting 649 *abst*
- Townes-Brocks syndrome: syndrome of the month 457
- Transforming growth factor type-beta genes in palate development 650 *abst*
- Translocation
balanced reciprocal 4;18 in father of aneuploid fetus: correspondence 728
balanced reciprocal 6;14, triploidy: case report 724
insertional 654 *abst*
t(X;4)(p21;q35) girl, prenatal identification, paternal origin associated with muscular dystrophy 426
- X;22 and Turner's and DiGeorge's syndromes: correspondence 791
- Trichothiodystrophy associated with xeroderma pigmentosum, search for consanguinity within and among families 21
- Trigonocephaly, complex, further five non-chromosomal cases 659 *abst*
- Triploidy arising from first meiotic non-disjunction, mother carrying a reciprocal translocation: case report 724
- Trisomy
partial, 7q, caused by structural rearrangements of chromosome 7 109
8 mosaicism associated with Rothmund-Thomson syndrome: case report 258
and leiomyosarcoma: short report 643
- 10p syndrome owing to maternal pericentric inversion: case report 264

- 18 Edwards syndrome, and ankyloblepharon filiforme adnatum: case report 720
monozygotic twins with, report of discordant phenotype: case report 640
- Tuberous sclerosis
genetic counselling, value of investigation 217
genetic heterogeneity, phenotypic correlations 418
- Turner's syndrome
and ring chromosomes, molecular and cytogenetic studies 648 *abst*
with X;22 translocation: correspondence 791
- Twins, monozygotic
amyoplasia of chest wall (Poland spectrum) 646 *abst*
with trisomy 18, report of discordant phenotype: case report 640
- Von Hippel-Lindau disease
gene mapping studies 653 *abst*
sporadic cerebellar haemangioblastoma, and renal cell carcinoma, statistical analysis of two stage mutation model 205 *abst*
two stage mutation model, statistical analysis 311
- Von Recklinghausen neurofibromatosis, paternal origin of new mutation 209 *abst*
- Waardenburg syndromes
humans, mouse and hamster mutants as models 618
type 1 to 2q37, assignment 652 *abst*
- Wagner-Stickler syndrome, exclusion of COL2A1 as candidate gene 91
- Watson's syndrome linkage to chromosome 17 markers 209 *abst*
- Western blotted proteins, enhanced chemiluminescence detection 655 *abst*
- Wiedemann-Rautenstrauch syndrome: syndrome of the month 256
- Winglets of the eye, dominant transmission of early adult pterygium of conjunctiva: case report 392
- Wiskott-Aldrich syndrome, clinical application of M27 β as linked probe and carrier detection by X inactivation studies 661 *abst*
- World Federation of Neurology Research Group, Huntington's Disease, Vancouver, 29 June to 2 July 1989: conference report 211
- X linked
centronuclear myopathy *see* Centronuclear myopathy
hypohidrotic ectodermal dysplasia, possible genetic heterogeneity 422
myopathy (McLeod's syndrome) dystrophin expression and genotypic analysis 345
retardation syndrome, possible new, dysmorphic facies, microcephaly, hypotonia, and small genitalia: dysmorphology report 339
- Xeroderma pigmentosum associated with trichothiodystrophy, search for consanguinity within and among families 21
- Yunis-Varon syndrome with severe osteodysplasty 114
