

# Prenatal Diagnosis and Screening

Edited by David J. H. Brock  
Charles H. Rodeck  
Malcolm A. Ferguson-Smith  
with 68 contributors

1992 816 pages 100 line illustrations 304 halftones  
6 colour plates hardback £95.00 0 443 04379 5

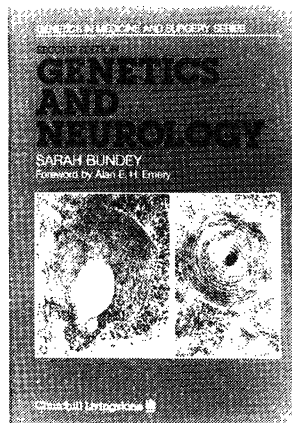

**Prenatal Diagnosis and Screening** features definitive coverage of:  
• chorionic villus biopsy and early amniocentesis • fetal blood and tissue sampling • high-resolution ultrasonography • recombinant DNA technology, first through Southern blotting and now more often through PCR • molecular biology

This comprehensive text also provides detailed information on: the high risk patient and the role of the genetic counsellor...the pre-pregnancy clinic...the importance of screening in reducing the prevalence of serious disorders... psychosocial aspects...management

of fetal abnormality...ethical and medicolegal views of this increasingly important science.

#### CONTENTS (Section Headings Only)

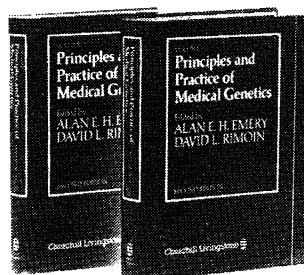

1. Genetic Counselling
2. Fetal Sampling Techniques
3. Visualization Techniques
4. Laboratory Techniques
5. Congenital Malformations
6. Chromosome Abnormalities
7. Mendelian Disorders
8. Determination of Zygosity and Paternity
9. Prenatal Screening
10. Future Trends
11. Management of Fetal Abnormality
12. Social Aspects

## Genetics and Neurology

**second edition**  
Sarah Bunday  
1992 Second edition 480 pages  
78 illustrations hardback £60.00  
0 443 04523 2  
Part of the *Genetics in Medicine and Surgery Series*

**Genetics and Neurology second edition** is a practical text which emphasises the clinical applications of the "new genetics" and demonstrates how molecular studies are helping to reveal the causes and variety of genetic diseases. Focusing on common diseases and those that illustrate particular points of interest, this up-to-date reference will be a valuable addition to any library.

## Principles and Practice of Medical Genetics

**second edition**  
Edited by  
Alan E. H. Emery and  
David L. Rimoin  
1990 Second edition 2 volumes  
2075 pages 500 illustrations  
hardback £210.00 0 443 03583 0

The standard reference text for medical genetics — expanded and brought right up to date to cover the latest discoveries, including recent developments in molecular pathology, recombinant DNA and gene probes.

"...a mine of useful information, well tabulated and extensively referenced...well maintained and up to date."  
*Trends in Genetics*

### ORDER FORM

- Please send me \_\_\_ copies of  
**Prenatal Diagnosis and Screening**  
(Brock et al, 0 443 04587 9) @ £95.00 per copy
- Please send me \_\_\_ copies of  
**Genetics and Neurology 2nd edition**  
(Bunday, 0 443 04523 2) @ £60.00 per copy
- Please send me \_\_\_ copies of  
**Principles and Practice of Medical Genetics 2nd edition**  
(Emery and Rimoin, 0 443 03583 0) @ £210.00 per copy  
Please add £4.85 postage and packing
- I enclose a cheque for £ \_\_\_\_\_  
(made out to Longman Group UK Ltd.)  
OR
- Please charge my Access / Eurocard / Visa / Barclaycard  
American Express / Diners  
£ \_\_\_\_\_

Card N°: | | | | | | | | | | | | | | | | | | | | | |
