

BOOK REVIEW

If you wish to order or require further information regarding the titles reviewed here, please write to or telephone the BMJ Bookshop, PO Box 295, London WC1H 9JF. Tel 071 383 6244. Fax 071 383 6662. Books are supplied post free in the UK and for BFPO addresses. Overseas customers should add 15% for postage and packing. Payment can be made by cheque in sterling drawn on a UK bank or by credit card (Mastercard, Visa, or American Express) stating card number, expiry date, and full name. (The price and availability are occasionally subject to revision by the Publishers.)

As a family doctor with a special interest in medical genetics I read this book for my own education and also for possible inclusion on the patients' library shelf.

The opening chapter has a crusading quality and one assumes that the main readership is intended to be middle class America. Given the importance attached to non-directive genetic counselling, it is interesting to discern a slightly directive style. Dr Milunsky has clearly spent many years picking up the pieces following genetic catastrophes and he feels deeply about helping people to obtain the information to allow them to make the right choices. The issues raised are important and the comprehensive cover inspires one to read on, although some may disagree with the observation that "compassion, patience and love are unusual in most families caring for a child with birth defects".

The reader with at least high school biology will find the chapters on chromosomes detailed and understandable and the simple explanation of mitosis and meiosis is welcome. Here and elsewhere in the book doctors may benefit from technical descriptions of complex areas written for patients. Too often genetic nomenclature leaves even a medical graduate feeling like a stranger in a foreign country.

Problems of intersex are dealt with sensitively but the reader looking for guidance on sex chromosome abnormalities, for example XXY or XXY detected at amniocentesis, may find this chapter unhelpful. The details of criminal trials involving defendants with XXY make uncomfortable reading. The separate chapter on fragile X is valuable because this alerts the reader to the salient features of the most common inherited cause of mental retardation and opens up avenues for seeking further guidance.

The chapter 'You and Your Genes' raises interesting questions about the mechanisms involved in the delayed onset of genetic diseases. This reader was grateful for the simple definition of a homeobox gene. However, the author omits to define hereditary and congenital which would be useful as these words are used throughout the book.

The chapter dealing with 'New Genetics' airs some difficult ethical dilemmas but it is surprising that the author does not place more emphasis on the reassurance given by negative genetic tests, and the consequent reduction of anxiety associated with reproduction. The short section on gene therapy does not mention cystic fibrosis, surely surprising when one looks at the number of patients are focused on this research.

The chapter on 'Genes, Ethnic Origins and Blood Groups' is probably too complicated for the lay reader, although the subject matter will be of great interest to a multi-racial readership.

There is a passionate discussion of the relationship of IQ to race and the interaction between genetic endowment and environment.

The chapter on 'Genetic Counselling' begins with the aphorism "...by not knowing you do not remove the chances you remove the choices". Dr Milunsky's commitment to helping couples avoid children with genetic defects is matched by a most valuable chapter which deals objectively with the practical and the ethical issues raised by genetic counselling. It would be a useful teaching aid for students. 'Drugs, Infections, X-rays and Habits Harmful to the Fetus' gives sensible and comprehensive guidance to anyone contemplating pregnancy.

The problems of population screening for Turner's disease, single cell disease and thalassaemia are addressed in this book. It is timely to consider that genetics should be taken to the people rather than the individual patient taking his genetic problem to the doctor. A practical way to begin this process. However, screening programmes should be undertaken only after extensive pilot studies and as a partnership process between the patient, the family doctor, medical geneticists, and others.

The section on the inheritance of common disease will leave the family doctor and his patients disappointed that clear genetic markers are still rare for breast cancer, ischaemic heart disease, colon cancer, and Alzheimer's disease. Such genetic markers do exist show how these could translate into practical applications. Milunsky makes life-style recommendations which will be useful for both patient and doctor and the risk tables provided for some diseases will be helpful in the consulting room. The message undoubtedly is that family doctors should elicit, and patients should expect, a family history of common diseases to be taken. As the effects of the new genetics increases the precision of risk estimation, patients and relatives can be identified and offered appropriate advice and screening.

The legal lessons in prenatal diagnosis give only American examples but the points made are valid. Issues covered include the right to information, the right to choice, and the right that medical consultation should be free from the personal and religious bias of the doctor.

This is the comprehensively revised text of Choices Not Chances by the same author published in 1989. The information is as up to date as possible in this fast moving field where significant advances may happen between printing and publication.

I found reading this book a useful exercise, and many doctors will profit by having a copy handy when explaining things to patients or students. For more sophisticated patients and relatives, it will complement the information sheets produced by genetic charities and patient organisations.

HILARY J HARRIS

EDITOR'S NOTE

Journal of Medical Genetics: Cytogenetics Editor

Professor Pat Jacobs is standing down from this office at the end of 1993, after six years of valuable service. The Journal of Medical Genetics would like to thank her for her many contributions and hard work during this time and is pleased that she has agreed to remain on the editorial board.

Professor Albert Schinzel of the Institute for Medical Genetics, Zurich, Switzerland, will become Cytogenetics Editor from January 1994. Professor Schinzel is well known for his Catalogue of unbalanced chromosome aberrations in man and for his wider work in both clinical genetics and cytogenetics. The Journal welcomes him to the cytogenetics editorship.

Acrocephalopolysyndactyly, pentalogy of Fallot, and hypoacousis, with 46,XX,t(11;18)(p31;q11): short report, 438

Adrenoleucodystrophy
is skewed X inactivation responsible for symptoms in female carriers?, 651
X inactivation studies, 342 abs
Agammaglobulinemia, X linked
isolation of defective gene: annotation, 452
new RFLP at DXS101 locus allows carrier detection: short report, 512
Airway abnormalities in Jarcho-Levin syndrome, two cases: brief report, 875
Al-Awadi/Raas-Rothschild syndrome
Bedouin patient: short report, 62: letter, 797
two Italian sibs and further confirmation of autosomal recessive inheritance: short report, 65: letter, 797
Åland Island eye disease, genetic mapping to proximal short arm of human X chromosome, 1047
Albright’s hereditary osteodystrophy, imprinting, 101
Alport syndrome, splice site mutation of COL4A5 gene detected by DGGE causing, 334 abs
Alveolar synchiae, ectodermal defects, ankyloblepharon, and cleft palate, in two sibs, a new recessive syndrome? brief paper, 793
Alzheimer’s disease
APP 717 mutations associated with, RFLP analysis, 476
gegetic transmission, Dutch families, 640
Amelogenes imperfecta, X linked, nonsense mutation in gene, 345 abs
Amniocyte and CVS DNA, direct amplification, in rapid diagnosis of infantile spinal muscular atrophy: short report, 162
Amyloidotic polyneuropathy, familial and transthyretin variant (alanine 49), French family, 117
and transthyretin variant (alanine 71), French family, 120
Amyotrophic lateral sclerosis, familial, and chromosome 21 loci, absence of linkage between: short report, 318
Anaemias, hereditary, Portugal, epidemiology, public health significance, and control, 235
Anderson-Fabry disease, and alpha-galactosidase A, sequence variations, 658
Androgen receptor gene, mutations identified in perineal hypospadias, 198
Aneuploidy, and fragile X syndrome, two cases, 338 abs
Angelman syndrome
developmental delay and ataxia, duplication of chromosome 15: short report, 529
molecular genetic studies, 348 abs
molecular mechanisms, 93 patients, 895
or Prader-Willi syndrome, uniparental disomy, in patients with an additional small inv dup(15) chromosome, 756
Ankyloblepharon, alveolar synchiae, ectodermal defects, and cleft palate, in two sibs, a new recessive syndrome? brief paper, 793
Ankyloblepharon filamentous naevus, complex chromosome rearrangement: short report, 167
Anophthalmia and pituitary abnormalities, and deletion 14q22.1-q22.3: short report, 251
APC gene
detection of germline mutations, in FAP families, 333 abs
in FAP families, and sporadic colorectal cancer, detection of mutations, 339 abs
germline rearrangement detected by PFGE, 340 abs
Aphasia, deafness, or mental retardation: letter, 262
APP 717 mutations associated with Alzheimer’s disease, RFLP analysis, 476
Arthrogryposis, ophthalmoplegia, and retinopathy, confirmation of new type of arthrogryposis: short report, 78
Association versus linkage studies in psychosis genetics: annotation, 634; comment, 638
Ataxia, familial, deafness, and mental retardation, new form: brief paper, 694
Ataxia telangiectasia gene and chromosome 11q22-23, family showing no evidence of linkage between, 135
Attitudes of neurologists, psychiatrists, and psychotherapists towards predictive testing for Huntington’s disease, Germany, 1023
Autosomal dominant polycystic kidney disease childhood onset, in sibs, clinical picture and recurrence risk, 583
diagnosis by genetic markers and ultrasonography, 332 abs
estimating locus heterogeneity, Spanish population, 910
phenotype and genotype heterogeneity, 333 abs
Autosomal dominant spinocerebellar ataxia type 1, presymptomatic testing: short report, 616
Autosomal recessive disorders
complex consanguinity, autozygosity mapping: letter, 798
and complex consanguinity, homozygosity mapping, 345 abs
low segregation ratios: annotation, 449
Autozygosity mapping, complex consanguinity, and autosomal recessive disorders: letter, 798

Balding, premature, profound mental retardation, characteristic facies, muscular hypotrophy and small patellae, two unrelated male patients: short report, 319
Baraitser-Winter syndrome, or Noonan syndrome: irides coloboma, proptosis, hypertelorism, and mental retardation: short report, 425
Beale’s syndrome, link with 5q deletion in FAP, 340 abs
Becker muscular dystrophy
carrier detection by in situ hybridisation, 347 abs
investigation based on accurate carrier detection, 347 abs
non-isotopic analysis of SSCP in exon 13 region of human dystrophin gene, 951
prevalence and incidence, Slovenia, 344 abs
and schizophrenia, 131
Becker type generalised myotonia, autosomal recessive, evidence for genetic homogeneity, 914
Beckwith-Wiedemann syndrome
associated with reciprocal translocation t(9;11)(p11.2;p15.5), sex dependent transmission: brief paper, 958
and parental allele specific methylation of IGF-II gene, 353
Benign hereditary chorea, identification of CAG repeat in Huntington’s disease gene (IT15), N Ireland, 1012
Beta-hexosaminidase alpha subunit gene, exon 1, in two mutations in late infantile Tay-Sachs disease, 123
Bipolar affective disorder, no association with dopamine D3 receptor gene, 308
Benign Choanal frequency, Chemical Cerebral Charcot-Marie-Tooth disease, Cerebellar Central Caroli's disease, osteochondromatosis, Carpotarsal CAG repeat, and British Boomerang syndrome: Blepharophimosis, heart defect, hypothyroidism, mental retardation syndrome (Young-Simpson syndrome), parental consanguinity: short report, 255

Bloch-Sulzberger syndrome (incontinentia pigmenti): syndrome of the month, 53

Blomstrand chorondro dysplasia, presenting with lethal skeletal dysplasia with generalised sclerosis and advanced skeletal maturation? short report, 155

Boomerang dysplasia, X linkage, 341 abs

Brachymorphism-onychodysplasia-dysplangism syndrome: short report, 158

British Medical Genetics Conference, Nottingham, 23-25 September 1992, abstracts, 332

Bronchietasis and immotile nasal cilia, associated with Usher syndrome type I, two brothers: short report, 253

Bullous aplasia cutis congenita, and epidermal naevi, in a neonate: brief paper, 962

CAG repeat in Huntington's disease, 1003 and age of onset, Scotland, 1014

gene (IT15), in benign hereditary chorea, 1012

CAG repeat length, in Huntington's disease chromosome, 982

Campomelic dysplasia, evidence of autosomal dominant inheritance: brief paper, 683

Caroli's disease, link with 5q deletion in FAP, 340 abs

Carpotarsal osteochondromatosis, dominant: brief paper, 704

CATCH 22 chromosome 22q11 microdeletions: editorial, 801

DiGeorge syndrome: syndrome of the month, 852

Central nervous system malformation, hypohidrotic ectodermal dysplasia, and distinct facial features: confirmation of a distinct entity? short report, 245

Cen tromere involvement, elucidation in inversion (13) by fluorescent in situ hybridisation: short report, 414

Cerebellar ataxia and ectodermal dysplasia in brothers: short report, 515

Cerebral palsy, parental age and genetic mutation, 44

Charcot-Marie-Tooth disease, X linked, linkage study using highly informative loci, 345 abs

Chemical cleavage of mismatch to screen exons of phenylalanine hydroxylase gene in PKU, 228

Chiasma frequency, quadrivalent orientation, and first meiotic segregation in a human male reciprocal translocation heterozygote t(15;20)(q13.1;q13.1), 336 abs

Chon al atresia, bilateral, cleft palate, curly hair, and congenital hypothyroidism, syndromic association: short report, 427

Chorea, benign hereditary, identification of CAG repeat in Huntington's disease gene (IT15), N Ireland, 1012

Chorionic villus DNA, direct amplification, in rapid diagnosis of infantile spinal muscular atrophy: short report, 162

Chromosome abnormalities 2p11-p13 deletion: short report, 604

2q, terminal deletions, is there a consistent phenotype? 338 abs

4q21p16q22, tdc, with first trimester abortion: brief paper, 696

5q deletion in familial adenomatous polyposis, possible link with Caroli's disease, 369

in FAP, and Caroli's disease and Beale's syndrome, 340 abs

7;15 balanced translocation, congenital nystagmus cosegregating: short report, 526

7p15.3p21.2 deletion, mild phenotypic manifestation: short report, 610

7q36-7qter terminal deletion, and holoprosencephaly and sacral agenesis: short report, 521

9 extra G positive band on long arm: short report, 613

tuberous sclerosis locus, 224

9q deletion, and sex reversal: short report, 518

9q11-9q33, markers, and linkage analysis of pyloric stenosis, 393

10q23, interstitial deletion, new case and review: short report, 248

10pter trisomy confirmed by in situ hybridisation: short report, 601

11q22-23, and ataxia telangiectasia gene, family showing no evidence of linkage between, 135

13, inversion, elucidation of centromere involvement by fluorescent in situ hybridisation: short report, 414

15, inv dup, additional, in Angelman or Prader-Willi syndrome, explained by uniparental disomy, 756

15q11-13 duplication, similarities to Angelman syndrome: short report, 529

16 deletion duplication 19q, in 46,XX,del(16)(q13.08-21.05),dup(19)(q13.13-13.2) karyotype, dysmorphic features and retardation: short report, 330

interstitial long arm, high resolution mapping, relationship to phenotype, 828

17q, probable de novo duplication, in Klinefelter's syndrome: short report, 436

18, ring, transmission from mother with 46,XX/47,XX,+t(18) mosaicism to daughter, resulting in 46,XX,t(18) karyotype: brief paper, 964

triple structural mosaicism, in child with MR/MCA syndrome and abnormal skin pigmentation: short report, 614

19q (q13.2—qter), partial trisomy, unusual maternal translocation: brief paper, 697

20 long arm deletion, in elderly malformed man: short report, 171

21, loci, and familial amyotrophic lateral sclerosis, absence of linkage between: short report, 318

22q11 microdeletions: editorial, 801

22q11 microdeletions and congenital anomalies face syndrome, 822

in DiGeorge and velocardiofacial syndromes, prevalence, implications for genetic counselling and prenatal diagnosis, 813

in patients with congenital conotruncal cardiac defects, 807

46,XX/46,XX diploid-triploid mixoploidy, with hypothyroidism and precocious puberty: brief paper, 966

46,XX/46,XX, XXX mixoploidy, resulting from second polar body incorporation into blastomere: short report, 297

46,XX,t(1;18)(p31;q11), with acrocephalopolysyndactyly, pentalogy of Fallot, and hypocalciasis: short report, 438

biochemical screening, 339 abs

de novo complex rearrangement in ankyloblepharon filiforme adnatum: short report, 167

location of mutations causing disease: review articles, and neural tube defects, biochemical screening, abs 336 non-disjunction, centromere map analysis, 335 abs

rearrangements associated with mendelian disorders: review article, 713

rearrangements leading to interstitial telomeric sequences, types, stability, and phenotypic consequences, 926

t(13;18)(13p18p;13q18q), resulting in three different adverse pregnancy outcomes: short report, 417

and Williams-Beuren syndrome: letter, 866

X inactivation, and X linked disease diagnosis, females, 177

new mental retardation syndrome mapping to pericentromeric region, 337 abs

proximal short arm, in Aland Island eye disease, 1044
Xp21.1–Xp22.3, evidence for linkage to non-specific X-linked mental retardation: brief paper, 866
Xp21 susceptibility locus for schizophrenia, 131
Xp22.3 terminal deletion, analysis in patient with six monogenic disorders, implications for mapping of X linked ocular albinism, 838
Xq28, distal, linkage markers, and Emery-Dreifuss muscular dystrophy, 108
XY gonadal dysgenesis, new de novo mutation (A113T) of SRY gene leads to, 655
Y, DNA content, abnormalities of sexual differentiation, improved method of screening cells, 304
Yp localisation of gene(s) for Turner stigmata, 918
Cleft lip with or without cleft palate, exclusion of candidate genes, linkage and association studies, 773
Cleft palate
ankyloblepharon, alveolar synchiae, and cleftdental defects, in two sibs, a new recessive syndrome? brief paper, 793
bilateral choanal atresia, curly hair, and congenital hypothyroidism, syndromic association: short report, 427
Clefting, ear anomalies, and limb reduction defects, new autosomal recessive condition? 342 abs
Clinical genetics, specialty, European Society of Human Genetics survey, 147
Coarctation of the aorta, interrupted aortic arch, and hypoplastic left heart syndrome, in three generations: short report, 328
Cockayne’s syndrome, correlation of clinical features with cellular sensitivity of RNA synthesis to UV radiation, 679
COL2A1, in osteoarthrithis, molecular analysis, 348 abs
COL3A1 1VS7 exon skipping mutation, resulting in Ehlers-Danlos syndrome type IV, 376
COL4A5 gene, splice site mutation, detected by DGGE, causes Alport syndrome, 334 abs
Collagen, type II, alpha-1(II) chain, substitution of glycine 997 by serine in, and spondyloepiphyseal dysplasia congenita, 27
Coloboma, classification, 664
Colorectal cancer, sporadic, FAP families, APC gene mutations, 339 abs
Cone and rod dysfunction (Åland Island eye disease), genetic mapping to proximal short arm of human X chromosome, 1044
Cone-rod dystrophy, associated with subretinal neo-vascularisation and gingival dystrophy, 342 abs
Congenital heart malformation in Yemeni-Turkmen syndrome: brief paper, 788
Congenital malformation, Emilia Romagna birth defects register, 344 abs
Conotruncal anomaly face syndrome is associated with chromosome 22q11 microdeletions, 822
Conotruncal cardiac defects, congenital, and 22q11 microdeletions, 807
Consanguinity, complex, and autosomal recessive disorders
autozygosity mapping: letter, 798
homozygosity mapping, 345 abs
Correction, 88, 528
Costello syndrome, and cutis laxa: correspondence, 622
Counselling pitfalls, Romano-Ward syndrome, consanguinity, cardiac arrest, hearing impairment, and ECG abnormalities: short report, 325: letter, 886
Craniosynostosis, and absent fibula, 25 year follow up: letter, 445
Crigler Najjar syndrome type I, DNA markers for analysis, 346 abs
Curly hair, cleft palate, bilateral choanal atresia, and congenital hypothyroidism, syndromic association: short report, 427
Cutis laxa and the Costello syndrome: letter, 622
Cystic fibrosis
absence, Asia, occurrence of homozygous S549N mutation in inbred Pakistani family: short report, 164
antenatal carrier screening, 343 abs
carrier frequency among men with infertility owing to congenital absence of the vas deferens: letter, 973
carrier testing, availability, young people’s reactions, 538
CFTR transcripts are undetectable in lymphocytes and respiratory epithelial cells homozygous for nonsense mutation R553X, 833
and diagnosis, preimplantation, by DNA amplification from single cells, 332 abs and fetal echocardiographic studies, 333 abs
frequency of ΔF508 in Mexican sample of patients, 501
in Grampian, 343 abs
mild pulmonary but severe hepatic disease, and CFTR frameshift mutation: letter, 446
mutations, prevalence in Grampian region of Scotland: short report, 316
pilot population carrier screening programme, 343 abs
prenatal carrier screening
new approach: letter, 86; letter, 621
two approaches: letter, 621
prenatal screening, psychological effects on carriers and their partners, 543
relative risk and risky relatives, 344 abs
severe, in child homozygous for G542 nonsense mutation in CFTR gene: letter, 621
severity of chest disease in relation to genotypes: letter, 709
unusual family, 343 abs
when homozygous for mild mutation R117H, male infertility as only presenting sign: letter, 797
Cytogenetics editor, Professor Pat Jacobs standing down, Professor Albert Schinzel taking over, 1043
Deafness
aphasia, or mental retardation: letter, 262 and cystic fibrosis: letter, 621
familial ataxia, and mental retardation, new form, brief paper, 694
Delayed speech development, facial asymmetry, strabismus, and transverse ear lobe creases, new syndrome: short report, 76
Deletion
of chromosome 2(p11-p13): short report, 604
de novo interstitial, of 16q21 and duplication of 19q, with dysmorphic features in retarded infant: short report, 337
interstitial, of chromosome 10q23, new case and review: short report, 248
terminal, 7q36–7qter, and holoprosencephaly and sacral agenesis: short report, 521
q5, in FAP, possible link with Caroli’s disease, 300
p7.5, p3.21, mild phenotypic manifestation: short report, 610
9p, and sex reversal: short report, 518
14q22.1–q22.3), associated with anophthalmia and pituitary abnormalities: short report, 251
Desmoid tumours, and FAP, with congenital skull defect, 342 abs
Developmental delay, severe, and multiple strawberry naevi, a new syndrome? short report, 883
Diabetes mellitus, type I insulin dependent, contribution of genetic factors to pathogenesis: letter, 533
Diabetes mellitus type 2, glucokinase gene mutation, 333 abs
Diastrophic dysplasia, prenatal diagnosis with polymorphic DNA markers, 265
Dicentric chromosome, new stable human, t(d14:21)(p16;q22), in woman with first trimester abortion: brief paper, 496
DiGeorge syndrome
and 22q11 microdeletions: editorial, 801, 807
prevalence, implications for genetic counselling and prenatal diagnosis, 813
historical review of clinical and cytogenetic features: review article, 803

Subject index
full, hypermethylated, in chorionic villi of male fetus, 
prenatal diagnosis: brief paper, 785
mental retardation, direct versus indirect molecular 
diagnosis, 40 German families at risk, 193
population studies, molecular approach, 454
with Prader-Willi-like phenotype, clinical and mol-
lecular studies, 761
Fragile X syndrome 
and aneuploidy, two cases, 338 abs
families in west of Scotland, 341 abs
found in Martin Bell family, 341 abs
FRA XE site, and X linked mental retardation, 97
guidelines for diagnosis, 410
mutation, origins, 647
no evidence for any recent mutations, 94
specific mutation: review article, 978
FRA XE, specific mutation: review article, 978
FRA XE site, fragile X syndrome, and X linked mental 
retardation, 97
Free beta hCG, in Down's syndrome screening, 336
abs
Fucosidosis, 5’ splice site mutation, 218
alpha-Galactosidase A, sequence variations in first 
exon, 658
Gaucher's disease 
glucocerebrosidase locus, molecular analysis of lyso-
osomal enzyme: review article, 889
UK, screening non-Jewish patients for two common
mutations, 280
Gene, disease, mapping, in isolated human popu-
lations, Finland: medical genetics around the
world, 857
Genetic counseling, after neonatal screening for 
Duchenne muscular dystrophy, impact, 670
Genetic diseases, common, molecular diagnosis, Russia 
and former USSR: medical genetics around the 
world, 141
Genetic screening, clinical population model, ‘inside-
out’, back-to-front, 580
Genetics 
medical
ethical aspects, teaching in undergraduate medi-
cine, 334 abs
in reformed NHS and Europe, 334 abs
psychosis, association versus linkage studies: annota-
tion, 634; comment, 638
Genital abnormalities, in males, and mutational screen-
ing of Wilms’s tumour gene WT1, 767
Genital hypoplasia, short limbed dwarfism, sparse hair, 
and vertebral anomalies: Ellis-van Creveld syn-
drome variant? short report, 322
Genome 
analysis, ethics: conference report, 257
human, morbid anatomy, chromosomal location of 
mutations causing disease: review article, 1
Germany, attitudes of neurologists, psychiatrists, and 
psychotherapists towards predictive testing for 
Huntington’s disease, 1023
Glucocerebrosidase locus, in Gaucher’s disease, mol-
ecular analysis of lysosomal enzyme: review article, 889
Glucokinase gene mutation in type 2 diabetes melliti-
tus, 333 abs
Glycine 661, substitution by arginine in type III colla-
gen causes Ehlers-Danlos syndrome type IV: brief paper, 690
Glycine 997, substitution by serine in alpha-1(1) chain of 
type II collagen, and spondyloepiphyseal dys-
plasia congenita, 27
Gonadal dysgenesis, in XY female, new de novo muta-
tion (A113T) of SRY gene, 655
Gorlin syndrome 
and congenital anomalies in medulloblastoma, 337
abs
flanking markers for gene for, 345 abs
Grampian region of Scotland, prevalence of cystic
fibrosis mutations: short report, 316
Haemophilia, resulting from interaction of incontinen-
tia pigmenti and factor VIII mutations in female 
with biased X inactivation, 497
Hajdu-Cheney syndrome, and hydrocephalus: let-
ter, 172
HEXA gene intron 9 donor splice site mutation fre-
quently found in non-Jewish Tay-Sachs disease 
patients from the British Isles, 479
Holland, dynamic mutation in Huntington’s dis-
case, 100
Holoprosencephaly
autosomal recessive, and pseudotripsyse 13: short 
report, 970
family showing dominant inheritance and variable 
expression, 36
and sacral agenesis, in fetus with terminal deletion 
7q36→7qter: short report, 521
Homoygosity, and schizophrenia, association 
between, at dopamine D3 receptor gene: let-
ter, 708
HP500 marker, DiGeorge syndrome, isolation of new 
marker and conserved sequences close to, 818
Humeroradioulnar synostosis, in patient with lambdoid 
synostosis: short report, 81
Hunter syndrome (MPS II), carrier detection by bio-
chemical and DNA techniques in families at risk, 210
Huntington, George, the man behind the eponym: 
portraits in medical genetics, 406; letter, 1042
Huntington’s disease
15th International World Federation of Neurology 
Workshop, 31 August-3 September 1993, Boston, 
Massachusetts, USA: conference report, 1039
age at onset, and methylation at D4S95, 185
associated trinucleotide repeat, Scotland, 1003
CAG repeat length, gametic but not somatic instab-
ility, 982
dynamic mutation, increased paternal repeat instab-
ility extending to within the normal size range, 
Dutch patients, 996
gene (IT15), identification of CAG repeat in benign 
exthereditary chorea, N Ireland, 1012
Grampian region, correlation of CAG repeat number 
and age of onset, 1014
late onset, molecular analysis, 991
lessons learnt from testing for, DNA storage and 
duplicate sampling: letter, 1042
mutation size and age at onset, 1008
N Ireland population, heterozygote frequency, 
mutation rate, fertility, and genetic fitness, 344 abs
ocular motor abnormalities, 344 abs
onset symptoms, 510 patients, 289
predictive testing 
after the gene, 1036

cal assessment, 549
presymptomatic testing
ethical and social issues, European Community 
collaborative study, 1028
world wide survey, 1020
recurrent mutations causing, familial predisposition, 
genetic risk to sibs of sporadic cases, 987
significant linkage disequilibrium between locus and 
markers at loci D4S10, D4895, and D4S111, 
Northern Ireland, 1018
specific mutation: editorial, 975: review article, 
978
suicide risk, 293
Huriez, scleratrophic syndrome of, 342 abs
Hydrocephalus 
in Hajdu-Cheney syndrome: letter, 175
X linked, refining genetic location of gene within 
Xq26, 214
Hypert IgM syndrome (HIGM1), X linked form, map-
ping, 202
Hyperkalaemic periodic paralysis, mutation analysis in families, 348
Hypermethyalted full fragile X mutation in chorionic villi of a male fetus, prenatal diagnosis: brief paper, 785
Hypertelorism, iris coloboma, ptosis, and mental retardation: Baraitser-Winter syndrome or Noonan syndrome? short report, 425
Hypoaacusis, acrocephalopolysyndactyly, and pentalogy of Fallot, with 46.XX,t(1;18)(p13;q11): short report, 438
Hypohidrotic ectodermal dysplasia, central nervous system malformation, and distinct facial features: confirmation of a distinct entity? short report, 245
Hypomelanosis of Ito associated with mosaicism for trisomy 7 and apparent 'pseudomosaicism' at amniocentesis: brief paper, 783
Hypoplastic left heart syndrome, coarctation of the aorta, and interrupted aortic arch, in three generations: short report, 328
Hypoplasia, perineal, androgen receptor gene mutations identified, 198
Hypothyroidism, congenital, cleft palate, bilateral choanal atresia, and curly hair, syndromic association: short report, 427
Hypothyroidism, muscular, profound mental retardation, characteristic facies, premature balding, and small palatine, two unrelated male patients: short report, 319
ICF syndrome with variable expression, in sibs: short report, 429
Immunodeficiency, centromeric instability, facial anomalies, with variable expression, in sibs: short report, 429
Inbreeding, effect, prospective study, 1986-1992, 334
Incontinentia pigmenti clinical and genetic study, 341
interaction with factor VIII mutations in female with biased X inactivation, resulting in haemophilia, 497
Incontinentia pigmenti (Bloch-Sulzberger syndrome): syndrome of the month, 53
Inertial telomeric sequences, types, stability, and phenotypic consequences of chromosome rearrangements leading to, 926
Insulin-like growth factor 11 gene, methylation, and Beckwith-Wiedemann syndrome, 353
Insulin resistance, resembling leprechaunism, 5 sibs, 470
Interrupted aortic arch, coarctation of the aorta, and hypoplastic left heart syndrome, in three generations: short report, 328
Intracranial teratoma, giant, associated with pulmonary hypoplasia, prenatal diagnosis: brief paper, 880
Intrauterine growth retardation, severe, blepharophimosis, and cylindrical nose with midline groove, new syndrome? short report, 525
Iris coloboma, ptosis, hypertelorism, and mental retardation: Baraitser-Winter syndrome or Noonan syndrome? short report, 425
Italian infants with limb/pelvis-hypoplasia/aplasia syndrome, confirmation of autosomal recessive inheritance: short report, 65: letter, 797
Jacobs, Professor Pat, standing down as Cytogenetics editor, 1043
Jacro-Nevin syndrome, airway abnormalities, two cases: brief report, 875
Journal abstracts, 85, 174, 261, 349, 443, 532, 620, 707, 796, 885, 972
Kallmann syndrome, and X linked ocular albinism, genetic mapping of gene loci, 923
Klinefelter's syndrome, with probable de novo 17q duplication: short report, 436
LADD syndrome and split hand/split foot deformity in a family, overlap between the EEC and LADD syndromes: brief paper, 700
Lambdoid synostosis, and humeroradioulnar synostosis: short report, 81
Leprechaunism, insulin resistance resembling, 5 sibs, 470
Leukaemogenesis, molecular aspects of P53 in lymphoma, 339
Li-Fraumeni syndrome, possible variant, 335
Limb reduction defects, ear anomalies, and clefting, new autosomal recessive condition? 342
Limb/pelvis-hypoplasia/aplasia syndrome
Bedouin patient and review: short report, 62: letter, 797
two Italian sibs and further confirmation of autosomal recessive inheritance: short report, 65: letter, 797
Linkage disequilibrium between Huntington's disease locus and markers at loci D4S10, D4S95, and D4S111, Northern Ireland, 1018
Linkage studies versus association in psychosis genetics: annotation, 634; comment, 638
Low density lipoprotein receptor gene, six DNA polymorphisms, 273
Low segregation ratios in autosomal recessive disorders: annotation, 449
Lymphoma, and leukaemogenesis, molecular aspects of P53, 339
Lysosomal enzyme, molecular analysis in Gaucher's disease: review article, 889
Magnetic Activated Cell Sorter, for prenatal diagnosis from maternal blood, 1051
Malformed man, elderly, chromosome 20 long arm deletion: short report, 171
Malignant hyperthermia, genetics: review article, 89
Mandibular dysplasia, central nervous system malformation, and further confirmation of autosomal recessive inheritance: short report, 65: letter, 797
Marfan syndrome, screening of fibrillin gene FBN1 for causal mutations, 348
Marshall-Smith syndrome, without respiratory complications, long survival: brief paper, 877
Martin Bell family, link with fragile X syndrome, 341
Maternal blood, prenatal diagnosis from, Magnetic Activated Cell Sorter, 1051
Medical genetics, advances in brief, 85, 174, 261, 349, 443, 532, 620, 707, 796, 885, 972
Medium chain acyl-CoA dehydrogenase deficiency, screening for G 985 mutation, Scottish women, 346
Medulloblastoma, congenital anomalies, and Gorlin syndrome, 337
Mendelian cytogenetics, chromosome rearrangements associated with mendelian disorders: review article, 713
Menkes disease, cytogenetic survey, implications for detection of chromosomal rearrangements in X linked disorders: short report, 314
Menkes syndrome, cloning of candidate gene spanning MNK translocation breakpoint, 334
Mental retardation deafness, or aphasia: letter, 262
defaithess, and familial ataxia, new form: brief paper, 694
iris coloboma, ptosis, and hypertelorism: Baraitser-Winter syndrome or Noonan syndrome? short report, 425
profound, characteristic facies, premature balding, muscular hypotrophy and small palatine, two unrelated male patients: short report, 319
X linked, and FRA XE fragile site, 97
Meryon, Edward (1809-1880), and muscular dystrophy: portraits in medical genetics, 506
Methylation, parental allele specific, of IGF-II, and Beckwith-Wiedemann syndrome, 353
Microcephaly, seizures, mental retardation, CHD, and skeletal abnormalities, continuation of a case report: letter, 445
Microphthalmos, classification, 664
Microsatellite repeats, visualisation by silver staining, 346 abs
Mitochondrial cardiomyopathy, X linked congenital, possible, three families, 269
Mikopolikia, 46,XX,46,XXX, resulting from second polar body incorporation into blastomere: short report, 597
Molecular diagnosis of some common genetic diseases, Russia and former USSR: medical genetics around the world, 141
Molecular genetic diagnosis, evaluation in management of familial adenomatous polyposis coli, 675
Monogenic disorders, analysis of a terminal Xp22.3 deletion, 838
Mosaicism for duplication 12q (12q13-q24.2) in dysmorphic male infant: short report, 70
MR/MCA syndrome, with triple structural mosaicism of chromosome 18 and abnormal skin pigmentation: short report, 614
Multiple sclerosis, wrongly diagnosed for X linked adenomyeloneuropathy, 338 abs
Muscular dystrophy and Edward Meryon (1809-1880): portraits in medical genetics, 506
facial involvement absence may differentiate a scapular onset from from FSH dystrophy, 338 abs
limb-girdle, autosomal recessive adult forms, genetic heterogeneity, Brazil, 385
rapid analysis of dystrophin gene deletions shows variable electrophoretic mobility, 60
Xp21, variability of clinical, genetic, and protein abnormalities in manifesting carriers, 337 abs
Myelomeningocele, and Waardenburg syndrome, in a family: short report, 83
Myopathy, congenital, with fibre type disproportion, 348 abs
Myotonia, autosomal recessive generalised (Becker), evidence for genetic homogeneity, 914
Myotonic dystrophy
DNA methylation study, 189
molecular diagnosis: letter, 533
specific mutation: review article, 978
unstable CTG repeat, 341 abs
in various tissues from fetuses predicted to be at high risk, analysis of expansion associated with, 341 abs

Naevoid basal cell carcinoma syndrome, complications, 460
Nager acrofacial dysostosis: syndrome of the month, 779
Nasal cilia, immotile, and bronchiectasis, associated with Usher syndrome type I, two brothers: short report, 253
Neural tube defect
and chromosome abnormalities, biochemical screening, 336 abs
familial cases, combinations of sexes: letter, 447
lesion descriptions made by different European pathologists, 942
upper and lower, alternate hypothesis, 849
Neurofibromatosis clinic, Oxford, first two years’ experience, 3576 abs
Neurofibromatosis type I, knowledge, experience, and reproductive decisions of affected patients and families, 567
Neurofibromatosis type 1, genetic study, PCR based approach, Ontario, 363
Noonan syndrome
or Baraitser-Winter syndrome: iris coloboma, ptosis, hypertelorism, and mental retardation: short report, 423
male fertility in, 342 abs
Norrie’s disease, manifesting heterozygosity, 346 abs
Northern Ireland
identification of CAG repeat in Huntington’s disease gene (T1T5) in benign hereditary chorea, 1012
significant linkage disequilibrium between Huntington’s disease locus and markers at loci D4S10, D4S95, and D4S111, 1018
Notices, 88, 536, 624, 800, 974
Nystagmus, congenital, cosegregating with balanced 7q15 translocation: short report, 526
Ocular albinism, X linked, and Kallmann syndrome, genetic mapping of gene loci, 923
Orofaciodigital syndrome type III in two sibs: brief paper, 870
Osteoarthritis, COL2A1, molecular analysis, 348 abs
Osteoglosis imperfecta 'lethal', survival, 337 abs
mutation detection in gene encoding alpha1 chain of type I collagen, 335 abs
recurrent severe, molecular and genetic mechanisms, 339 abs
Osteoglosis imperfecta type III, mutations in type I collagen structural genes, COL1A1 and COL1A2, are not necessarily responsible, 492
Otopalatodigital syndrome type II: syndrome of the month, 310
Ovarian cancer
material, fresh and archival, p53 tumour suppressor gene mutations, 335 abs
p53 mutations, 339 abs
psychosocial issues raised by familial register, 575
Oxford neurofibromatosis clinic, first two years’ experience, 3376 abs
P53
in lymphoma and leukaemogenesis, molecular aspects, 339 abs
mutations, in ovarian cancer, 339 abs
Patellae, small, profound mental retardation, characteristic facies, premature balding and muscular hypotrophy, two unrelated male patients: short report, 319
Patent ductus arteriosus and murmur: clinical, 501
PKU, 460
PEHO syndrome, diagnostic criteria and genetics, 932
Pentology of Fallot, acrocephalopolysyndactyly, and hypoaacusis, with 46,XX,t(1;18)(p31;q11): short report, 438
Perineal hypospadias, androgen receptor gene mutations identified, 198
Phenylketonuria
atypical presentation, genetic background of clinical homogeneity, 460
Polydactyly, five generation Indian family, 296
Polymerase chain reaction diagnosis of infantile spinal muscular atrophy using amniocyte and CVS DNA: short report, 162
single cell, reliability, 332 abs
/SSYH test, rapid and efficient, for identification of common mutation R408W in phenylketonuria patients: technical note, 153
1078

Psychosocial genetics: apparent, prenatal diagnosis, psychosis

Prader-Willi-like syndrome, for Angelman syndrome, uniparental disomy, in patients with an additional small inv dup(15) chromosome, 756

Prenatal diagnosis of diastrophic dysplasia with polymorphic DNA markers, 265 from maternal blood, Magnetic Activated Cell Sorter, 1051 of giant intracranial teratoma associated with pulmonary hypoplasia: brief paper, 880 of a hypermethylated full fragile X mutation in choriocarcinoma of a male fetus: brief paper, 785

Pseudomosaicism, apparent, at aminoencephalos, and hypomelanosis of Ito associated with mosaicism for trisomy 7: brief paper, 783

Pseudotrisomy 13 and autosomal recessive holoprosencephaly: short report, 970

Psychosis genetics, association versus linkage studies: annotation, 634; comment, 638

Psychosocial genetics

DMD carrier risk, women’s understanding, 562 effects of prenatal screening for cystic fibrosis, 543 emerging scientific discipline: editorial, 537

Huntington’s disease testing demand, attitudes, and psychological assessment, 549 perception by young women, preferring uncertainty to certainty?, 557 issues raised by familial ovarian cancer register, 575 neurofibromatosis type 1, knowledge, experience, and reproductive decisions of affected patients and families, 567

Prader-Willi syndrome, hypertrichosis, and mental retardation: Baraitser-Winter syndrome or Noonan syndrome? short report, 425

Pulmonary hypoplasia, and giant intracranial teratoma, prenatal diagnosis: brief paper, 880

Pulmonary vascular occlusive disease, with other anomalies, continuation of a case report: letter, 445

Pyloric stenosis, linkage analysis and markers from chromosome 9q11–q33, 393

Restriction fragment length polymorphism analysis for APP 717 mutations associated with Alzheimer’s disease, 476 new, at DXS101 locus, allows carrier detection in family with X linked agammaglobulinemia: short report, 512

Retinoblastoma characterisation of a 340 kb YAC and cDNA enrichment, 335 abs

Scottish population, mutation detection in rhodopsin and peripherin genes, 347 abs

X linked, genetic localisation of RP2 type, 345 abs

Retinoblastoma, possible link with low level radiation: conference report, 440

Retinoblastoma disease gene, and characterisation of highly polymorphic microsatellite at DXS207 locus, 500

Ring chromosome 18, transmission from mother with 46,XX/47,XX,+r(18) mosaicism to daughter, resulting in 46,XX,r(18) karyotype: brief paper, 964

Ring (X) chromosomes and a severe phenotype, three patients, 482

Romano-Ward syndrome counselling pitfalls, consanguinity, cardiac arrest, hearing impairment, and ECG abnormalities: short report, 325: letter, 886

Evidence of genetic and phenotypic heterogeneity, 947

Russia and former USSR, molecular diagnosis of some common genetic diseases: medical genetics around the world, 141

S549N mutation in Pakistani family, absence of cystic fibrosis mutations in Asian population: short report, 164

Sacral agenesis and holoprosencephaly in fetus with terminal deletion 7q36–7qter: short report, 521

Schinzel, Professor Albert, taking over as Cytogenetics editor, 1043

Schizophrenia cosegregation with Becker muscular dystrophy, 131 and homozygosity, association between, at dopamine D3 receptor gene: letter, 708

Scleroastrophic syndrome of Hurlers, 342 abs

Scotland CAG repeat in Huntington’s disease and age of onset, 1014

Huntington’s disease associated trimonucleotide repeat, 1003

Sex, diagnosis

preimplantation, in X linked disease, 332 abs prenatal, from maternal peripheral blood using PCR, 336 abs

Short rib-polydactyly syndromes, lethal, further evidence for their overlapping in a continuous spectrum, 937

Skeletal dysplasia, lethal, with generalised sclerosis and advanced skeletal maturation, Blomstrand chondrodysplasia? short report, 155

Skewed X inactivation, is it responsible for symptoms in female carriers for adenoleucodystrophy?, 651

Social and ethical issues in presymptomatic testing for Huntington’s disease, European Community collaborative study, 1028

Sotos syndrome, search for uniparental disomy, 342 abs

Sparse hair, short limbed dwarfism, genital hypoplasia, and vertebral anomalies: Ellis-van Creveld syndrome variant? short report, 322

Spastic paraplegia, X linked, clinical heterogeneity at a single gene locus, 381

Specialty of clinical genetics, European Society of Human Genetics survey, 147

Spina bifida

lesion, location, sex differences: letter, 262 number of births, trends, 338 abs

Spinal muscular atrophy, infantile, rapid diagnosis by direct amplification of amniocyte and CVS DNA: short report, 162

Spinobulbar muscular atrophy, specific mutation: review article, 978

Spinocerebellar ataxia type 1, autosomal dominant, presymptomatic testing: short report, 616

Spinocerebellar atrophy, specific mutation: review article, 978

Split hand/foot, isolated, Hungary, 1975-1984, epidemiological study, 593

Split hand/split foot deformity and LADD syndrome in a family, overlap between the EEC and LADD syndromes: brief paper, 700

Spondyloepiphysial dysplasia congenita, resulting from substitution of glycine 997 by serine in alpha-1(II) chain of type II collagen, clinical features, 27

SRY gene, new de novo mutation (A113T) in high mobility group box leads to XY gonadal dysgenesis, 655

Strabismus, delayed speech development, facial asymmetry, and transverse ear lobe creases, new syndrome: short report, 76

Strawberry naevi, multiple, and severe developmental delay, a new syndrome? short report, 883

Suicide risk, in Huntington’s disease, 293

Tay-Sachs disease

HEXA gene intron 9 donor splice site mutation frequently found in non-Jewish patients from the British Isles, 479
late infantile, two new mutations are both in exon 1 of beta-hexosaminidase alpha subunit gene, 123
Tetrahydrobiopterin deficiency, dihydropteridine reductase gene, two new mutations, 465
Thalassaemia, Filipino B', high Hb A, B' thalassaemia resulting from large deletion of 5' globin gene region, 240
Thalassaemia-beta heterozygotes in Brazil, molecular characterisation: letter, 797
Thrombocytophagia, X linked recessive: short report, 968
Translocation
balanced 7;15, congenital nystagmus cosegregating: short report, 526
balanced, (14), reproductive possibilities for carriers in families with partial trisomy of proximal 14q: short report, 73
reciprocal, balanced whole arm, resulting in three different adverse pregnancy outcomes: short report, 417
t(15;20)(q13;q13.1), chiasma frequency, quadrivalent orientation, and first meiotic segregation, 336 abs
unbalanced, in Waardenburg gene region, two sibs: short report, 607
Transthyretin variant (alnine 49) associated with familial amyloidotic polyneuropathy, French family, 117
Transthyretin variant (alnine 71) associated with familial amyloidotic polyneuropathy, French family, 120
Transverse ear lobe creases, delayed speech development, facial asymmetry, and strabismus, new syndrome: short report, 76
Triple structural mosaicism of chromosome 18, in child with MR/MCA syndrome and abnormal skin pigmentation: short report, 614
Trisomy
partial, of proximal 14q, reproductive possibilities for balanced translocation (14) carriers: short report, 73
7, hypomelanosis of Ito with mosaicism for, and apparent 'pseudomosaicism' at amniocentesis: brief paper, 783
mosaicism, in two girls with multiple congenital malformations and mental retardation: short report, 433
10qter, confirmed by in situ hybridisation: short report, 601
18, rapid confirmation using directly fluoresceinated 18 centromere specific probe, 336 abs
19q (q13.2–qter), owing to unusual maternal translocation: brief paper, 697
Tuberculous sclerosis
identification of markers flanking locus on chromosome 9, 224
variability of expression, 41
Turkish phenylketonuria patients, mutation analysis, 129
Turkerstigma on Yp, chromosomal localisation of gene(s) for, 918
Turner's syndrome
detection by MSAFP/Free beta (hCG) screening, 340 abs
screening for occult Y mosaicism, 346 abs
Ulnar ray defect, contralateral, and Poland anomaly: short report, 423
Usher syndrome type I, associated with bronchiectasis and immotile nasal cilia, two brothers: short report, 253
Usher syndrome type II
audiometric identification of carriers, 343 abs
genetic heterogeneity, 843
Valvular dysplasia, sex linked: brief paper, 873
Vas deferens, congenital absence, and CF carrier frequency: letter, 973
Velocardiofacial syndrome and 22q11 microdeletions: editorial, 801, 807
22q11 microdeletions, prevalence, implications for genetic counselling and prenatal diagnosis, 813
in mother and daughter, variability of clinical phenotype, 825
new marker and conserved sequences close to, 818
Ventricular anomalies, short limbed dwarfism, genital hypoplasia, and sparse hair: Ellis-van Creveld syndrome variant? short report, 322
von Hippel-Lindau disease on chromosome 3p25–26, dinucleotide repeat polymorphisms, genetic mapping, 487
neoplasms, five types, common mechanism of tumourigenesis, 339 abs
tumour suppressor gene, detailed genetic mapping, 104
Waardenburg gene region, unbalanced translocations, two sibs: short report, 607
Waardenburg syndrome, and myelomeningocele, in a family: short report, 83
Weyer's unilateral ray/oligodactyly syndrome: letter, 533
Williams-Beuren syndrome, and chromosome abnormalities: letter, 886
Wilms' tumour gene, WT1, mutational screening, in males with genital abnormalities, 767
Wolf-Hirschhorn syndrome, paternal origin of submicroscopic deletion of chromosome 4, 348 abs
X chromosome inactivation, and X linked disease diagnosis, females, 177
X linked adenomatoliponeuropathy, misdiagnosed as multiple sclerosis, 338 abs
X linked agammaglobulinaemia isolation of defective gene: annotation, 452
new RFLP at DXS101 locus allows carrier detection: short report, 512
X linked congenital mitochondrial cardiomyopathy, possible, three families, 269
X linked form of hyper IgM syndrome (HIGM1), mapping, 202
X linked hydrocephalus, refining genetic location of gene within Xq28, 214
X linked mental retardation and FRAXE fragile site, 97
non-specific, gene mapping, evidence for linkage to chromosomal region Xp21.2–Xp22.3: brief paper, 866
X linked spastic paraplegia (SPG2), clinical heterogeneity at a single gene locus, 381
Young-Simpson syndrome, parental consanguinity: short report, 255
Yunis-Varon syndrome, and congenital heart malformation: brief paper, 788
