We help put you on the map in record time.

The race to discover the genes responsible for specific diseases or traits is accelerating every day. Your lab can work day and night trying to manually process volumes of genotype data—and still fall behind.

Now Applied Biosystems helps you work smarter, not harder. We've streamlined the linkage analysis process—from sample preparation to genotype scoring—with an automated system that lets you complete linkage projects faster than with manual methods. And your cost per genotype will be significantly lower.

Now, from sample prep to genotype scoring, we've automated the entire process.

Now, from sample prep to genotype scoring, we've automated the entire process.

Now, from sample prep to genotype scoring, we've automated the entire process.

Now, from sample prep to genotype scoring, we've automated the entire process.

Automation: From Sample Prep to Data Analysis

The automated genotyping system integrates our new Genotyper™ software with the proven Model 373 electrophoresis hardware and GENESCAN™ PCR analysis software. You'll be able to take full advantage of

the new mapping standard—PCR-based microsatellite markers—and the GeneAmp PCR process.

You select the optimal Genotyper method and click on "run." Volumes of electrophoresis data are transformed into automatically scored alleles. You'll find the program flexible and fast as you retrieve, edit and transfer your results for further analysis.

We've also streamlined sample preparation with our PRISM™ amidites for fluorescent PCR. Because the system is based on our standard five-fluorescent technique, you get in-lane controls that ensure the superior accuracy and throughput that radioactive methods can't match.

If your lab needs a faster way to put your gene discovery projects on the map, phone Applied Biosystems Division of Perkin-Elmer at **Australia** (03) 808-7777, **Benelux** (0) 3165-71868, **Canada** (800) 668-6913, **France** (1) 89 90 18 00, **Germany** (0) 6150 101-0, **Italy** (02) 8912 6011, **Japan** (03) 3699-0700, **U.K.** (0925) 825650, **U.S.** (800) 345-5224. Tell us you want our report on labs automating genetic linkage—fast.

BASIC MOLECULAR AND CELL BIOLOGY

Second Edition 1993 UK £8.95; Overseas £11.00 (BMA Members £8.45; £10.50)

The study of disease at the molecular and cellular level is revolutionising medicine. Already spectacular progress has been made in identifying the genes involved in some diseases and in understanding cancer pathogenesis, opening up exciting new possibilities for treatment. In *Basic Molecular and Cell Biology* leaders in the field explain the techniques of molecular and cell biology, which are being applied in specialties as far apart as cardiology and diabetes, and describe their implications for medicine. It will enable doctors, students, and researchers to gain a basic understanding of the subject and some insight into the way in which the medical sciences will be moving over the next few years.

This second edition has been extensively updated and expanded, with four new chapters added.

CONTENTS INCLUDE:

- **Molecular and cell biology in clinical medicine: introduction**
David Weatherall
- **The polymerase chain reaction: a tool for molecular medicine**
A F Markham
- **Gene regulation**
David S Latchman
- **Genes and cancer**
Richard G Vile, Myra O McClure, Jonathan N Weber
- **An introduction to cells**
Lewis Wolpert
- **The cell nucleus**
R A Laskey
- **Sorting signals and cellular membranes**
Graham Warren

Medicine & Global Survival

EDITOR: JENNIFER LEANING, M.D.

Medicine and Global Survival is a new international journal to be launched in March 1994. This journal, previously published as The PSR Quarterly will be published by the BMJ Publishing Group. Medicine and Global Survival looks at major catastrophic issues of our time from the physicians' perspective. It discusses the role of medicine and public health in determining and changing the ways in which our societies respond to these serious challenges to global survival.

The journal aims to enlist physicians and other professionals in a truly international analysis of major issues relating to:

- war
- civil conflict
- disaster
- the environment
- public health and development
- human rights

SUBMISSION OF PAPERS

Papers should be submitted to: Jennifer Leaning, M.D., Editor in Chief, Medicine & Global Survival, 10 Brookline Place West, Brookline, Massachusetts 02146, USA. Tel: +1 617 730 4750 Fax: +1 617 739 0052

Instructions for Authors may be obtained by returning the form below.
