

# Human Molecular Genetics

In recent years the amount of research in human genetics has grown ever more rapidly. **Human Molecular Genetics** was launched in April 1992 as a new high quality forum to bring together the best original research in this fast growing discipline. Papers of excellence are published on any aspect of the subject, including the molecular analysis of lower organisms where such studies are relevant to the understanding of the human genome. Areas of interest include:

- ◆ the analysis of the structure and function of human genes
- ◆ the molecular basis of human inherited disease and disease predisposition
- ◆ chromosome structure and function
- ◆ developmental genetics
- ◆ molecular aspects of cancer genetics and genetic therapies
- ◆ animal models of genetic disease
- ◆ approaches to gene therapy

*- simply the best journal in its field...*

## Recent and forthcoming papers include:

Reconstruction of the 2.4 Mb human DMD-gene by homologous YAC recombination. *J T Den Dunnen, P M Grootsholten, J G Dauwerse, A P Walker, A P Monaco, R Butler, R Anand, A J Coffey, D R Bentley, H Y Steensma and G J B van Ommen*

Somatic mutations of the APC gene in colorectal tumours: mutation cluster region in the APC gene. *Y Miyoshi, H Nagase, H Ando, A Horii, S Ichii, S Nakatsuru, T Aoki, Y Miki, T Mori and Y Nakamura*

Identification and developmental expression of the *Xenopus laevis* cystic fibrosis transmembrane conductance regulator gene. *S J Tucker, D Tannahill and C F Higgins*

## ORDER FORM

**YES!** Please enter my personal subscription to **Human Molecular Genetics** Volume 2, 1993, 12 issues, at a cost of £75/\$140.

**Special Offer** - subscribe to Volume 2 and receive Volume 1 (9 issues in 1992) at a special rate!

**YES!** Please enter my personal subscription to Volumes 1 and 2 of **Human Molecular Genetics** at a cost of £125/\$235

(Different currencies apply as follows: £Sterling = Europe/US\$ = Elsewhere)
