age his mental age was evaluated as being 5 months.

His feeding difficulty continued and he suffered frequently from dehydration. His abdomen, lumbar region, and pelvis remained remarkably underdeveloped. His maximum lifetime weight was 6.9 kg aged 6 years 2 months. Subsequently, he suffered repeatedly from fever, vomiting, and dehydration and died at the age of 8 years 7 months. His height (crown to rump) at death was 49.0 cm, weight 4.96 kg, and head circumference 48.2 cm. At necropsy, regurgitant oesophagitis, a poorly developed small intestine, a small, thick walled (approximately 9 mm) urinary bladder, and small undescended testes were found.

The ethics of keeping such a child alive for eight years may seem to be questionable. However, passive euthanasia of such a case as this patient would not be readily acceptable in Japan.

If you wish to order or require further information regarding the titles reviewed here, please write to or telephone the BMJ Bookshop, PO Box 295, London WC1H 9JR. Tel 071 383 6244 Fax 071 383 6662. Books are supplied post free in the UK and for BFPO addresses. Overseas customers should add 15% for postage and packing. Payment can be made by cheque in sterling drawn on a UK bank or by credit card (Mastercard, Visa, or American Express) stating card number, expiry date, and full name. (The price and availability are occasionally subject to revision by the Publishers.)

BOOK REVIEWS

In the latter part of last century many held the view that alcoholism was inherited. The pendulum of opinion swung, and by the 1960s there was little doubt in the minds of the great majority of its investigators that the origin of alcoholism was psychosocial. Today, with the developing knowledge in biology, especially in the genetics of behaviour, it is possible to contemplate some genetic contribution to its aetiology. For this several factors are responsible. Numerous diseases are known which result from a combination of genetic and environmental elements. For example, one parallel to alcoholism is cancer of the lung, where the environmental factor is clear but only a proportion of heavy smokers develop the disease. Genetic studies have been made in this disease, and the phenotype responsible has been better defined, and there are many genetic markers which allow a search for the location of genes producing susceptibility to any disease.

The authors of this book have drawn together almost all the accessible publications on genetic studies of alcoholism and have reviewed them critically. Their object is to make a balanced and objective presentation. They envisage alcoholism as a complex behavioural feature, and apply to it the methods of genetic analysis of behaviour.

Immediate in chapter 1 the principal problems that hinder genetic analysis are squarely faced: problems of definition, measurement of the phenotype, lack of clarity of the underlying biological mechanisms, and therefore of possible functional markers. It concerns types of alcoholics, aetiologic models, measures of alcoholism, and the several hypotheses involving neurobiology. The chapters that follow summarise the different types of study.

Chapter 2 is devoted to family studies, of which there are approximately 200, comparing relatives of different degrees sharing a similar family environment. They show familial concentration of alcoholism, so that the risk is greater for a person, particularly for a male, who has numerous alcoholic relatives, and they suggest an aetiological heterogeneity manifesting in variations in the preciseness and severity of the condition. The authors identify topics on which future research might most profitably concentrate.

Chapter 3 draws together the numerous twin studies, 34 published in the period 1939 to 1991. These do not exclude genetic influence and indeed strongly suggest to the authors a multifactorial aetiology, the genetic contribution to which is most apparent in male twins who are alcohol dependent.

The next chapter is devoted to adoption studies, usually considered essential for distinguishing genetic and environmental effects. There have been about a dozen such studies, though the authors show that most of these are biased and use research designs that are not very informative. Emerging clearly from the subgroup of studies which are less open to criticism, namely a link between the biological father and his son brought up by adoptive parents. These sons knew nothing of the behaviour of their biological fathers; their biological mothers as well as their two adoptive parents were effectively non-alcoholic. These findings do not of course provide formal proof, but they favour the hypothesis of a transmission of some genetic factor from the father to the son. The result supports the suggestion from the family and twin studies that there is a dominating male influence.

The studies in chapter 5 complement these classical approaches, for they deal with sibs and half sibs brought up apart and unrelated children brought up together. There are only four studies of this type. Criticisms can be levelled at all, especially in the small number of variables considered or the lack of rigour in their specification, so their findings can only be taken as indications. But despite their drawbacks they support the interpretation from the investigations in the previous chapters that there is some genetic influence on alcoholism.

The crucial proof that there is a genetic contribution to the aetiology of alcoholism will come from the discovery of one or more markers, genes, or DNA segments. The searches for these have been numerous and the authors restrict their survey to those studies of characters whose chromosomal locations are known. There are 140 such studies, covering more than 50 markers, the majority being searches for association (to establish linkage) and others for use in man (to establish location). The studies as a whole, dealt with in chapter 6, show that at present there is little certainty that any of the characters analysed is a marker for alcoholism. But these studies give valuable pointers to the methodological precautions to be taken and the paths to be followed in future investigations.

The book closes with a series of 14 appendices, dealing in detail with key topics mentioned in earlier chapters but where fuller consideration would have interrupted the flow of the argument. These topics include, for example, the principal definitions of alcoholism, its classification, statistical, clinical and biological indicators, and aetiological models of alcoholism proposed in the period 1972 to 1988, ending with those of Durrant and of Donnemata. The list of some 850 references covers only those published in English or French.

The conclusions of the authors after their critical examination of hundreds of published works is that it is not yet definitely established that genetic differences between persons account for their variation in behaviour regarding the pathological taking of alcohol. Nevertheless there are strong indications that at least there is a vulnerability to alcoholism. The task now for genetic epidemiologists is to find the genes that predispose to the different types of alcoholism.

This book is positively written. From its critical appraisal of existing works, and their lack of conclusive findings, it draws lessons as to the points that future studies should attack and the methodological weaknesses that should be avoided. It is moreover carefully written, well balanced, well organised, and a lucid exposition of the numerous works examined by the authors. It is the most comprehensive survey of the subject yet produced, and one which any investigator of the subject cannot afford to ignore.

D F ROBERTS

As Research Director for the European Neuromuscular Centre (ENMC), Baarn, The Netherlands, A E H Emery has participated in around 30 workshops designed to coordinate and complete European research groups involved in the isolation and characterisation of the genes responsible for diverse neuromuscular disorders. This publication introduces the proceedings and presents, with some modifications, a series of articles which have appeared in Neuromuscular Disorders (Pergamon Press) setting out the diagnostic criteria proposed at each workshop. At the times of a number of
the workshops, the relevant genes had been cloned and this is reflected in the relevant chapters; for instance the diagnosis of Duchenne muscular dystrophy (DMD) is definite "where almost no dystrophin is demonstrable in a muscle biopsy specimen" or there is a "Duchenne-type mutation within the dystrophin gene". Likewise the section on myotonic dystrophy lists amplification (>45) of the trinucleotide repeat sequence in the DM-kinase gene on chromosome 19 in the diagnostic criteria. There is an attempt in some chapters to comment on current diagnostic approaches for DNA analysis, for example, multiplex PCR, SSCE, mRNA(RT-PCR), and most recently the protein truncation test in DMD; the shortened 4q35 linked EcoRI fragment detected by p13E-11 in facioscapulohumeral muscular dystrophy and the chromosome 17p11.2 duplication associated with Charcot-Marie-Tooth disease type 1A. In a text of only 72 pages the comments are of necessity brief and the reader is left with the reference lists to identify further reading. The reference lists range from no entries (the section on Rare Neuromuscular Disorders) to 24 (Limb Girdle Muscular Dystrophy) with two (Myotonic Dystrophy, Congenital Muscular Dystrophy) citing single references. The coverage of published reports could have been better standardised across the sections and perhaps one or two key clinical references could have been included in each section.

It is unfortunate that some "chapters" begin with tables or lists (Duchenne/Becker dystrophies, myotonic dystrophy, spinal muscular atrophy). The more traditional introduction to Limb Girdle Muscular Dystrophy (K M Bushby) is eminently more readable. Likewise the use of the abbreviations "I", "E", and "C" for inclusion criteria, exclusion criteria, and comments respectively, in only some of the chapters is irritating. Putting aside these comments on format, the answer to the question of whether this slim volume "will be useful to clinicians and scientists engaged in this field of research" will depend on the individual person's reason for consulting the chapters. The chapters are not intended to be reviews of the clinical manifestations nor of the application of molecular techniques to the diagnosis of these disorders. Unified clinical criteria for the diagnosis of disorders are useful, particularly in studies using linkage analysis, although the availability of computer programmes such as the HOMOG series allows, to an extent, for genetic heterogeneity. The chapters do present some fairly fundamental features on which the diagnosis of these disorders can be made but the layouts of the chapters do not make an easy format for use by a junior doctor faced with a patient with a neuromuscular problem.

The contribution made by the ENMC to furthering collaborations between the disparate research teams working on these disorders in Europe should not be underestimated. The standardisation of the diagnostic criteria to be used by these groups when identifying affected persons and families and when making resources available to others was important. The publication of such criteria (in Neuromuscular Disorders) enabled them to be used as a standard reference by the research groups and thus to cut down on unnecessary duplication in subsequent reports. This publication aims to make these criteria available to a wider audience. Unfortunately the format and content of the chapters makes it difficult to identify who it will best serve.

J C MACMILLAN

NOTICES

Call for Patients

Osteopetrosis. We are interested in finding the genetic causes of osteopetrosis. If you know of cases that could be available for DNA analysis, please contact Wim Van Hul, Department of Medical Genetics, University of Antwerp, Universiteitsplein 1, 2610 Antwerp, Belgium. Tel (32) 3 820 25 85; fax (32) 3 820 25 66.

European School of Medical Genetics – 5th course

This will be held in Sestri Levante (Genoa) on 19–25 March 1995. Directors: Professor VA McKusick (Baltimore), Professor G Romeo (Genoa). Topics: Introduction to human molecular genetics, linkage analysis, cytogenetics, population genetics, molecular genetics, multifactorial diseases, clinical genetics, cancer genetics. Registration fee: 420 000 Italian Lire. Applications: send your CV, a brief description of your research interests, a letter of presentation (if you wish to present a clinical case during an evening session and to apply for a travel fellowship in case there are some available, please state it clearly in your covering letter), and a certificate of your knowledge of English to: Paola Quattrone, Laboratory of Molecular Genetics, Istituto G Gaslini, 16148 Genova, Italy. Tel: +39/10/5636370–400, fax +39/10/391254.

Fourth International Conference on Systemic Lupus Erythematosus (SLE)

This conference will be held in Jerusalem, Israel on 26–31 March 1995. For further information contact Professor Yehuda Shoenveld, SLE Conference, PO Box 50006, Tel Aviv 61500, Israel. Tel: 972 3 5140014, fax: 972 3 5175674 or 972 3 660325, Email: 100274.2065@Computerve.COM.

Achondroplasia, Two sibs who are double heterozygotes for achondroplasia and pseudoachondroplastic dysplasia, 565

Adenomatous polyposis coli
Adenomatous polyposis coli and a cytogenetic deletion of chromosome 5 resulting from a maternal intrachromosomal insertion, 312

APC mutation associated with late onset of familial adenomatous polyposis, 888

CAPF Study: a new European concerted action to permit placebo controlled trials in carriers of familial adenomatous polyposis, 171 abs

Genetic heterogeneity of congenital hypertrophy of the retinal pigment epithelium (CHRPE) in families with familial adenomatous polyposis, 55

Improved screening for FAP: experience from the West Midlands FAP register, 165 abs

Mutation analysis in familial adenomatous polyposis: partial prediction of phenotype, 165 abs

Presymptomatic diagnosis in families with adenomatous polyposis using highly polymorphic dinucleotide CA repeat markers flanking the APC gene, 442

Adult polycystic kidney disease, Diagnosis of adult polycystic kidney disease by genetic markers and ultrasonographic imaging in a voluntary family register, 115

African Negroids, Absence of myotonic dystrophy in southern African Negroids is associated with a significantly lower number of CTG trinucleotide repeats, 37

Aganglionic megacolon, A newborn with ring chromosome 10, aganglionic megacolon, and renal hypoplasia, 804

Alagille syndrome, Segregation analysis of Alagille syndrome, 453

Albright's hereditary osteodystrophy
Albright’s hereditary osteodystrophy: syndrome of the month, 779

Parental origin of Gnas gene mutations in Albright’s hereditary osteodystrophy, 835

Parental origin of transcription from the human GNAS1 gene, 163: abs, 607

Paternal and maternal transmission of pseudo-hypoparathyroidism type 1a in a family with Albright hereditary osteodystrophy: no evidence of genomic imprinting: letter, 94

Albumin, A point mutation in the human serum albumin gene results in familial dysalbuminaemic hyperthyroxinaemia, 355

Aldolase B gene, Null alleles of the aldolase B gene in patients with hereditary fructose intolerance, 499

Aldosterone, Angiotensin I converting enzyme polymorphism in different groups and its association with hypertension, plasma renin activity, and aldosterone, 172 abs

Alphafetoprotein, Impact of screening using maternal serum AFP and hCG on the birth incidence of Down’s syndrome in the west of Scotland, 166 abs

Alzheimer’s disease, Confirmation of association between the e4 allele of apolipoprotein E and Alzheimer’s disease, 197

Aminolevulinate synthase, Pyridoxine-refractory congenital sideroblastic anaemia with evidence for autosomal inheritance: exclusion of linkage to ALAS2 at Xp11.21 by polymorphism analysis, 513

Amnion rupture sequence, Diagnostic distinction between anencephaly and amnion rupture sequence based on skeletal analysis, 823

Amplification mismatch analysis, Amplification mismatch analysis as a method of screening for mutations in genetic disorders, 162 abs

Amyloid polyneuropathy
Amyloid polyneuropathy in two German-American families: a new transthyretin variant (Val 107), 416

Geographical distribution of TTR met30 carriers in northern Sweden: discrepancy between carrier frequency and prevalence rate, 351

Amyotrophic lateral sclerosis, Identification of the superoxide dismutase (SOD1) Ile113Thr mutation in three unrelated amyotrophic lateral sclerosis patients, 175 abs

Anchoring fibril abnormalities, Genetic linkage to the type VII collagen gene (COL7A1) in 26 families with generalised recessive dystrophic epidermolysis bullosa and anchoring fibril abnormalities, 745

Anderson-Fabry disease, X inactivation studies in Anderson-Fabry disease and X linked ectodermal dysplasia, 169 abs

Anencephaly
Diagnostic distinction between anencephaly and amnion rupture sequence based on skeletal analysis, 823

Female predisposition to cranial neural tube defects is not because of a difference between the sexes in the rate of embryonic growth or development during neurulation, 383

Aneurysms, 3-M syndrome and intracerebral aneurysms: letter, 898

Angiotensin I converting enzyme, Angiotensin I converting enzyme polymorphism in different groups and its association with hypertension, plasma renin activity, and aldosterone, 172 abs

Anophthalmia, Anophthalmia with cleft palate and microgastria: a new syndrome?, 960

Anticipation, Anticipation in Swedish families with bipolar affective disorder, 686

APC gene, Deletions of the entire APC gene are associated with sessile colonic adenomas: letter, 426

APC mutation, APC mutation associated with late onset of familial adenomatous polyposis, 888

Apolipoprotein
Apolipoprotein CII-Padova (Tyr37→stop) as a cause of chylomicronaemia in an Italian kindred from Siciliana, 622

Characterisation of six patients who are double heterozygotes for familial hypercholesterolaemia and familial defective apolipoprotein B-100, 172 abs

Confirmation of association between the e4 allele of apolipoprotein E and Alzheimer’s disease, 197

Arachnodactyly, Congenital contractual arachnodactyly (Beals syndrome): syndrome of the month, 640

ARC syndrome, Liver histology in the arthrogryposis multiplex congenita, renal dysfunction, and cholestasis (ARC) syndrome, 62: letter, 820

ARMS test, An investigation of sample taking technique for the ARMS cystic fibrosis test, 173 abs

Art, Genetics in art, 420

Arthrogryposis, Lethal congenital contracture syndrome: further delineation and genetic aspects, 521

Arthrogryposis multiplex congenita, Liver histology in the arthrogryposis multiplex congenita, renal dysfunction, and cholestasis (ARC) syndrome, 62: letter, 820

Arsylphatase A gene, The arylsulphatase A gene and molecular genetics of metachromatic leucodystrophy: review article, 663

Arsylphatase A pseudeodeficiency, Frequency of arylsulphatase A pseudodeficiency associated mutations in a healthy population, 667

Aspartylglucosaminuria, Aspartylglucosaminuria in newborns: a molecular and genealogical study, 360
CAG trinucleotide repeat, Expanded CAG trinucleotide repeat of Huntington's disease gene in a patient with schizophrenia and normal striatal histology: letter, 658
Cancer, familial, Neoplastic diseases in families of breast cancer patients, 618
Cancer families, The use of loss of constitutional het-
eroygosity data to ascertain the location of pre-
disposing genes in cancer families, 448
Cancer family syndrome, Muir-Torre syndrome: a vari-
ant of the cancer family syndrome, 627
CAPP Study, The CAPP Study: a new European con-
certed action to permit placebo controlled trials in
 carriers of familial adenomatous polyposis, 171
Cardiomyopathy, Evaluation of laboratory methods for
Cardiomyopathy, Prenatal diagnosis of X linked
Cancer, familial, Neoplastic diseases in families
CAG trinucleotide repeat, Expanded CAG trinucleotide
repeat of Huntington's disease gene in a patient
with schizophrenia and normal striatal histology:
letter, 658
Carrier screening, Evaluation of laboratory methods for
cyctic fibrosis carrier screening: reliability, sens-
itivity, specificity, and costs, 545
"CATCH 22", "CATCH 22" sans cardiac anomaly,
thyrmic hypoplasia, cleft palate, and hypocalcaemia:
cATCH 22. A common result of 22q11 deficiency? let-
ter, 741
Caudate nucleus, Progressive hemispheric atrophy with
agenesis of the head of the caudate nucleus, 969
Cephalometric analysis, Cephalometric analysis of
Rapp-Hodgkin syndrome, 758
Ceroid lipofuscinoses, Stargardt's disease is not allelic
to the genes for neuronal ceroid lipofuscinoses,
222
Charcot-Marie-Tooth disease
Charcot-Marie-Tooth disease in northern Sweden:
pedigree analysis and the presence of the du-
plication in chromosome 17p11.2, 435
X linked Charcot-Marie-Tooth disease (CMTX1): a
study of 15 families with 12 highly informative
polymorphisms, 193
Charcot-Marie-Tooth disease type 1, Non-radioactive
detection of 17p11.2 duplication in CMT1A: a
study of 78 patients, 880
Charcot-Marie-Tooth disease type 1B, Linkage and
mutation analysis in an extended family with
Charcot-Marie-Tooth disease type 1B, 811
Chemiluminescent detection, Chemiluminescent de-
tection of blotted PCR products (CB-PCR) of two
CAG dynamic mutations (Huntington's disease and
spino-cerebellar ataxia type 1), 654
Children
The genetic testing of children: editorial, 743
The genetic testing of children, 785
Chile, Genetic epidemiology of single gene defects in
Chile, 702
Chimaerism
Chimaerism shown by cytogenetics and DNA poly-
orphism analysis, 816
Male/female chimaerism determined by cytogenetic
analysis and DNA polymorphisms, 174
Cholestasis, Liver histology in the arthropogryposis mul-
tiple congenita, renal dysfunction, and cholestasis
(ARC) syndrome, 62: letter, 820
Cholinesterase gene, A PCR based method to deter-
dine the Kalow allele of the cholinesterase gene: the
E2 allele frequency and its significance in the normal
population, 248
Choroid inherited disease, Recent advances in the gene
map of inherited eye disorders: primary hereditary
diseases of the retina, choroid, and vitreous: review
article, 903
Chromosome abnormalities
18q– and 18q+ mosaicism in a mentally retarded
boy (46,XY,del(18)(q21)/46,XY,iso psu dic(18)(q23),
168 abs
A comparison of the clinical and cytogenetic findings
in nine patients with a ring (X) cell line and 16 45,
X patients, 528
A gene for pachyonychia congenita is closely linked to
the keratin gene cluster on 17q12–q21, 675
A male with a de novo translocation involving loss of
15q11q13 material and Prader-Willi syndrome, 478
A newborn with ring chromosome 10, aganglionic
megacolon, and renal hypoplasia, 804
Adenomatous polyposis coli and a cytogenetic de-
letion of chromosome 5 resulting from a maternal
intra-chromosomal insertion, 312
Allele specific PCR amplification of DNA from
homologous chromosome pairs by fluorescence
microscopy, 619
Allele specific PCR amplification of DNA from
homologous chromosome pairs by fluorescence
microscopy, 619
Analysis of CAG trinucleotide repeat of Huntington's
disease gene in a patient with schizophrenia and
normal striatal histology: letter, 658
An extra band within the human 9qh+ region that be-
tween the two surrounding constitutive het-
eroygosity, 632
An interstitial deletion of chromosome 7q(35), 738
Another patient with an interstitial deletion of chro-
mosome 9: case report and a review of six cases
with del(9)(q22q32), 156
Apparent SMA I unlinked to 5q, 242
Assessment of Yqh translocations, 978
Association of 1078 del T cystic fibrosis mutation
with severe disease, 159
Asymmetry and skin pigmented anomalies in chro-
mosome mosaicism, 694
Balanced reciprocal whole arm translocation t(3;9):
Dufford et al., 74
Blepharophimosis sequence and diaphragmatic her-
nia associated with interstitial deletion of chro-
mosome 3 (46,XY,del(3)(q21q23)), 647
Case of direct duplication of part of 2p: related to par-
allel pericentric inversion of chromosome 2, 169
abs
"CATCH 22" sans cardiac anomaly, thyrmic hy-
poplasia, cleft palate, and hypocalcaemia: cATCH
22. A common result of 22q11 deficiency? letter,
741
Charcot-Marie-Tooth disease in northern Sweden:
pedigree analysis and the presence of the du-
plication in chromosome 17p11.2, 435
Close linkage of a gene for X linked deafness to three
microsatellite repeats at Xq21 in radiologically nor-
mal and abnormal families, 916
"Compensatory" uniparental disomy of chromosome
21 in two cases, 534
Crouzon syndrome is not linked to craniosynostosis
loci at 7p and 5qter, 219
De novo 1q432 microdeletion on an inherited t(14; 21)
Robertsonian translocation resulting in multi-
tiple congenital abnormalities in an apparently bal-
anced translocation carrier, 169
De novo deletion (2) (p11.2p13): clinical, cyto-
genetic, and immunological data, 72
Del(18p) syndrome with a single central maxillary
incisor: letter, 86
Deletion mapping of the DXS986, DXS995, and
DXS1002 loci defines their order within Xq21, 344
Detection of de novo mutations and analysis of their
origin in families with X linked hypohidrotic ecto-
dermal dysplasia, 287
Diaphragmatic herniae and translocations involving
8q22 in two patients, 735
Duplication of 16q22–qter confirmed by fluor-
sescence in situ hybridisation and molecular analysis,
884
Elucidation of structural abnormalities of the X chro-
mosome using fluorescence in situ hybridisation
with a Y chromosome painting probe, 206
Familial half cryptic translocation t(9;17), 712
Familial pericentric inversion of chromosome 1
(p13q23) and male infertility with stage specific
spematogonian arrest, 573
Familial pericentric inversion inv(B)(p23q11), 201
Fine mapping of the facioscapulohumeral muscular
dystrophy gene region on 4q35, 165
Fragmental site at Xq27–28 located distal to FRAXE and
found in a normal male, 173
Genetic heterogeneity in hereditary haemorrhagic te-
langeicatia, 925
Genetic heterogeneity in hereditary haemorrhagic tel-
geicatia: possible correlation with clinical phen-
o-
Hirschsprung's disease associated with a deletion of chromosome 10 (q11.2q21.2): a further link with the neurocristopathies?, 325

Hydrocephalus in an infant with trisomy, 22, 141

Identification of interstitial 22q11 deletions in congenital anomaly face syndrome, 167 abs

Identification of a key recombiant which assigns the incomplete congenital stationary night blindness gene proximal to MAOB, 580

Insability of lymphocyte chromosomes in a girl with Rothmund-Thomson syndrome, 570

Intrachromosomal triplication of 15q11–q13, 798

Isolation and characterisation of a panel of cosmids which allows unequivocal identification of chromosome deletions involving the RB1 gene using fluorescence in situ hybridisation, 334

Laminin A variant gene (LAMA3) is present on chromosome 9q21, 164 abs

Linkage of hereditary haemorrhagic telangiectasia to chromosome 9q34 and evidence for locus heterogeneity, 933

Linkage of a non-specific X linked mental retardation gene to Xq26.1, 172 abs

Male/female chimaerism determined by cytogenetic analysis and DNA polymorphisms, 174 abs

Maternal serum screening for Down’s syndrome and other fetal chromosomal abnormalities, 166 abs

Maternal uniparental disomy of chromosome 13 in a phenotypically normal child, 644

Molecular analysis of human trisomies 13 and 18, 175 abs

Molecular characterisation of chromosome 4p deletions resulting in Wolf-Hirschhorn syndrome, 103

Mosaic uniparental disomy in Beckwith-Wiedemann syndrome, 749

Mouse homologues of human hereditary disease: review article, 1

Multiple origins of X chromosome tetrasyom: letter, 424

Non-radioactive detection of 17p11.2 duplication in CMT1A: a study of 78 patients, 880

Parental origin of the X chromosome in a patient with a Robertsonian translocation and Turner’s syndrome, 255

Partial monosomy of 7q32 in a case of de novo rcp(7;15)(q32;q15), 413

Partial trisomy for 2q in a patient with dir dup(2)(q33.1q35), 652

Partial trisomy 3q causing mild Cornelia de Lange phenotype, 151 abs

Paternal pericentric inversion of chromosome 4 as a cause of recurrent pregnancy loss, 153

Pseudodicentric chromosome 18 diagnosed by chromosome painting and primed in situ labelling (PRINS), 99

Pulmonary atresia associated with maternal 22q11.2 deletion: possible parent of origin effect in the conotruncal anomaly face syndrome, 830

Refinement of the chromosomal position of the X linked juvenile retinoschisis gene, 972

Screening for Y mosaicism in patients with Turner’s syndrome, 163 abs

Systemic search for uniparental disomy, 163 abs

Tests determining gene(s) on the X chromosome short arm: chromosomal localisation and possible role in tests determination: letter, 349

The morbid anatomy of the human genome: chromosomal location of mutations causing disease: review article, 265

Trisomy 12 mosaicism in a 7 year old girl with dysmorphic features and normal mental development, 243

Trisomy 8 syndrome owing to isodicentric 8p chromosomes: regional assignment of a presumptive gene involved in corpus callosum development, 238

Trisomy X in a female member of a family with X linked severe combined immunodeficiency: implications for carrier diagnosis, 717

Uniparental disomy in man, 162 abs

Value of chromosome painting in determining the chromosomal outcome of offspring of a 12;16 translocation carrier, 234

X;Y translocation in a girl with short stature and some features of Turner’s syndrome: cytogenetic and molecular studies, 649

X inactivation in female monosomic twins and their families, 754

X linked Charcot-Marie-Tooth disease (CMTX1): a study of 15 families with 12 highly informative polymorphisms, 193

Chromosome testing

Elucidation of structural abnormalities of the X chromosome using fluorescence in situ hybridisation with a Y chromosome painting probe, 206

Value of maternal chromosome painting in determining the chromosomal outcome of offspring of a 12;16 translocation carrier, 234

Chromosomes, supernumerary marker, Inv dup(15) supernumerary marker chromosomes: review article, 985

Chylomicronaemia, Apolipoprotein CII-Padova (Tyr 37→stop) as a cause of chylomicronaemia in an Italian kindred from Siciliana, 622

Cleft hand/foot, Cleft hand/foot: clinical and developmental aspects: syndrome of the month, 726

Cleft lip, Interpreting the evidence for an association between the retinoic acid receptor locus and non-syndromic cleft lip with or without cleft palate: letter, 425

Cleft lip/palate, Syndactylty, ectodermal dysplasia, and cleft lip/palate: syndrome of the month, 957

Cleft palate

Anophthalmia with cleft palate and micrognathia: a new syndrome?, 960

Facial clefts in the west of Scotland in the period 1980–1984: epidemiology and genetic diagnoses, 126

COL1A2 gene, The clinical features of Ehlers-Danlos syndrome type VIIB resulting from a base substitution at the splice acceptor site of intron 5 of the COL1A2 gene, 306

Collagen gene type VII (COL7A1). Genetic linkage to the type VII collagen gene (COL7A1) in 26 families with generalised recessive dystrophic epidermolysis bullosa and anchoring fibril abnormalities, 745

Collagen type I α2 gene point mutation, Determination of a new collagen type I α2 gene point mutation which causes a Gly640 Cys substitution in osteogenesis imperfecta and prenatal diagnosis by DNA hybridisation, 965

Colonic adenomas, Deletions of the entire APC gene are associated with sessile colonic adenomas: letter, 426

Compensatory uniparental disomy, “Compensatory” uniparental disomy of chromosome 21 in two cases, 534

Complementation studies, Complementation studies in Niemann-Pick disease type C indicate the existence of a second group, 317

Concerted Action Polyposis Prevention Study, The CAPP Study: a new European concerted action to permit placebo controlled trials in carriers of familial adenomatous polyposis, 171 abs

Cone shaped epiphyses, Spastic paraplegia, dysarthria, brachydactyly, and cone shaped epiphyses: confirmation of the Fitzsimmons syndrome, 251

Congenital contractural arachnodactyly, Congenital contractural arachnodactyly (Beals syndrome): syndrome of the month, 640

Congenital heart defects, Genetic study of congenital heart defects in Northern Ireland (1974–1978), 858

Congenital heart disease, Hereditary pancreatic hypoplasia, diabetes mellitus, and congenital heart disease: a new syndrome?, 331

Congenital malformations, A gene map of congenital malformations: review article, 507

Conotruncal anomaly face syndrome, Pulmonary atresia associated with maternal 22q11.2 deletion: possible parent of origin effect in the conotruncal anomaly face syndrome, 930 abs

Consanguinity, Ascertainment of consanguinity in the
antenatal clinic, 162 abs
Conotruncal anomaly face syndrome, Identification of interstitial 22q11 deletions in antenatal anomaly face syndrome, 167 abs
Cornelia de Lange syndrome, Partial trisomy 3q causing mild Cornelia de Lange phenotype, 150
Corpus callosum, Trisomy 8 syndrome owing to isodicentric 8p chromosomes: regional assignment of a presumptive gene involved in corpus callosum development, 238
Correction, 88
Cosmid contigs, FISH detection of trisomy 21 in interphase by the simultaneous use of two differently labelled cosmid contigs, 679
Cosmids, Isolation and characterisation of a panel of cosmids which allows unequivocal identification of chromosome deletions involving the RB1 gene using fluorescence in situ hybridisation, 334
Costello syndrome
Costello syndrome: natural history and differential diagnosis of cutis laxa, 486
Cutis laxa: a feature of Costello syndrome: letter, 85
Counselling
Counselling as outcome measure for audit of a clinical genetic service, 170 abs
Counselling for birth defects: the differing perspectives of obstetricians, geneticists, and genetic counsellors, 164 abs
Counselling following diagnosis of a fetal abnormality, 864
The provision of counselling for people with haemoglobinopathy trait in South Glamorgan, Wales, 170 abs
Cowden syndrome, Cowden syndrome and Lhermitte-Duclos disease in a family, 458
Cranial neural tube defects, Female predisposition to cranial neural tube defects is not because of a difference between the sexes in the rate of embryonic growth or development during neurulation, 383
Craniosynostosis, Crouzon syndrome is not linked to craniosynostosis locus at 5p and 5qter, 219
CTG amplification, Intelligence quotient profile in myotonic dystrophy, intergenerational deficit, and correlation with CTG amplification, 300
CTG repeat number, High CTG repeat number in nodular thyroid tissue from a myotonic dystrophy patient, 891
CTG trinucleotide repeat
Absence of myotonic dystrophy in southern African Negroids is associated with a significantly lower number of CTG trinucleotide repeats, 37
French myotonic dystrophy families show expansion of a CTG repeat in complete linkage disequilibrium with an intragenic 1 kb insertion, 33
Cutis laxa
Costello syndrome: natural history and differential diagnosis of cutis laxa, 486
Cutis laxa: a feature of Costello syndrome: letter, 85
Cystic fibrosis
A cystic fibrosis patient homozygous for the new frameshift mutation 936delTA: description and clinical data, 369
An investigation of sample taking technique for the ARMS cystic fibrosis test, 173 abs
Association of 1078 del T cystic fibrosis mutation with severe disease, 159
Automated analysis of multiplex microsatellites, 937
Evaluation of laboratory methods for cystic fibrosis carrier screening: reliability, sensitivity, specificity, and costs, 545
Mutation analysis in 600 French cystic fibrosis patients, 541
Severe pulmonary and digestive disease in a cystic fibrosis child homozygous for G542X: letter, 84
The impact of population based screening for carriers of cystic fibrosis, 364
Cystic fibrosis mutations, A cluster of cystic fibrosis mutations in exon 17b of the CFTR gene: a site for rare mutations, 731
Deafness, Close linkage of a gene for X linked deafness to three microsatellite repeats at Xq21 in radiologically normal and abnormal families, 916
Deafness, X linked, Deletion mapping of the DXS986, DXS995, and DXS1002 loci defines their order within Xq21, 344
Deletion
18q – and 18q + mosaicism in a mentally retarded boy (46,XY,del(18)(q21)/46,XY,iso psu dic(18)(q23)), 168 abs
An interstitial deletion of chromosome 7q35, 738
Another patient with an interstitial deletion of chromosome 9: case report and a review of six cases with del(9)(q22q32), 156
Association of cystic fibrosis and intellectual disability with severe disease, 159
Blepharophimosis sequence and diaphragmatic hernia associated with interstitial deletion of chromosome 3 (46,XY,del(3)(q21q23)), 647
De novo deletion (2) (p11.2p13): clinical, cytogenetic, and immunological data, 72
Del(18p) syndrome with a single central maxillary incisor: letter, 86
Deletion mapping of the DXS986, DXS995, and DXS1002 loci defines their order within Xq21, 344
Deletions in the 5' region of dystrophin and resulting phenotypes, 843
On the origin of deletions and point mutations in Duchenne muscular dystrophy: most deletions arise in oogenesis and most point mutations result from events in spermatogenesis, 183
Pulmonary atresia associated with maternal 22q11.2 deletion: possible parent of origin effect in the conotruncal anomaly face syndrome, 830
Denys-Drash syndrome, The Denys-Drash syndrome: syndrome of the month, 471
Dermal ectoderm dysplasia, Dermal ectoderm dysplasia: syndrome of the month, 321
Developmental retardation
A syndrome of hypotonia, psychomotor retardation, seizures, delayed and dysharmonic skeletal maturation, and congenital fibre type disproportion, 405
Natural history and postmortem anatomy of a patient with tetra-amelia, ectodermal dysplasia, peculiar face, and developmental retardation (MIM 273390): letter, 980
Diabetes mellitus, Hereditary pancreatic hypoplasia, diabetes mellitus, and congenital heart disease: a new syndrome?, 331
Diaphragmatic hernia, Diaphragmatic herniae and translocations involving 8q22 in two patients, 735
Dibenzoepin, Drug induced VATER association: is dibenzoepin a possible cause: letter, 423
DIDMOAD, Mitochondrial mutation commonly associated with Leber's hereditary optic neuropathy observed in a patient with Wolfram syndrome (DIDMOAD), 328
DiGeorge sequence, Velocardiofacial syndrome and DiGeorge sequence: letter, 423
Dilated cardiomyopathy, Absence of linkage between idiopathic dilated cardiomyopathy and candidate genes involved in the immune function in a large Indian pedigree, 766
Dinucleotide CA repeat markers, Presymptomatic diagnosis in families with adenomatous polyposis using highly polymorphic dinucleotide CA repeat markers flanking the APC gene, 442
Disease, The morbid anatomy of the human genome: chromosomal location of mutations causing disease: review article, 265
Disomy, Maternal uniparental disomy of chromosome 13 in a phenotypically normal child, 644
DNA
Amplification mismatch analysis as a method of screening for mutations in genetic disorders, 162 abs
Diagnosis of adult polycystic kidney disease by genetic markers and ultrasonographic imaging in a voluntary family register, 115

Genital tract function, Genital tract function in men with Noonan syndrome, 468  
Genome, The morbid anatomy of the human genome: chromosomal location of mutations causing disease: review article, 265  
GNAS1 gene, Parental origin of transcription from the human GNAS1 gene, 163 abs, 607  
Growth hormone deficiency, Analysis of human growth hormone gene mutations in isolated growth hormone deficiency patients, 81  
Growth hormone receptor deficiency, Facial morphology of Ecuadorian patients with growth hormone receptor deficiency/Laron syndrome, 635  
Gsa gene mutations, Parental origin of Gsa gene mutations in Albright's hereditary osteodystrophy, 835  
Half cryptic translocation t(9;17), Familial half cryptic translocation t(9;17), 712  
Hamartomata, Allele loss on chromosome 16p in hamartomata and tumours from patients with tuberous sclerosis, 164 abs  
Hand malformations, Phenotypic analysis of tripalangeal thumb and associated hand malformations, 462  
Hand/foot defects, Cleft hand/foot: clinical and developmental aspects: syndrome of the month, 726  
Haplotype FD1-D9S202, Linkage disequilibrium between FD1-D9S202 haplotypes and the Friedreich's ataxia locus in a central-southern Italian population, 133  
Hearing loss, Familial leuconychia, knuckle pads, hearing loss, and palmoplantar hyperkeratosis: an additional family with Bart-Pumphrey syndrome, 68  
Hemifacial atrophy, Progressive hemifacial atrophy with agenesis of the head of the caudate nucleus, 969  
Hereditary disease, Mouse homologues of human hereditary disease: review article, 1  
Hereditary haemorrhagic telangiectasia  
Genetic heterogeneity in hereditary haemorrhagic telangiectasia, 925  
Genetic heterogeneity in hereditary haemorrhagic telangiectasia: possible correlation with clinical phenotype, 927  
Linkage of hereditary haemorrhagic telangiectasia to chromosome 9q34 and evidence for locus heterogeneity, 933  
Hernia, Genetic study of indirect inguinal hernia, 187  
Heterochromatin, An extra band within the human 9qh+ region that behaves like the surrounding constitutive heterochromatin, 632  
Hirschsprung's disease  
Hirschsprung's disease associated with a deletion of chromosome 10 (q11.2q21.2): a further link with the neurocristopathies?, 325  
Long segment and short segment familial Hirschsprung's disease: variable clinical expression at the RET locus, 602  
Human chorionic gonadotrophin, Impact of screening using maternal serum AFP and hCG on the birth incidence of Down's syndrome in the west of Scotland, 166 abs
Human growth hormone
- Analysis of human growth hormone gene 5' sequences in isolated growth hormone deficiency patients, 81
- Facial morphometry of Ecuadorian patients with growth hormone receptor deficiency/Laron syndrome, 635

Human serum albumin gene, A point mutation in the human serum albumin gene results in familial dysalbuminaemic hyperthyroxinaemia, 355

Hunter's syndrome, Neurogenic bladder in Hunter's syndrome, 257

Huntington's chorea (disease)
- Chemiluminescent detection of blotted PCR products (CB-PCR) of two CAG dynamic mutations (Huntington's disease and spinocerebellar ataxia type 1), 654
- Clinical features and population genetics of juvenile Huntington's disease in Northern Ireland, 166 abs
- Correlation of clinical features of Huntington's disease and the mutation in Grampian region, 173 abs
- De novo mutation in a 3'HVR allele used as a paternity test in a family with Huntington's chorea, 173 abs
- Expanded CAG trinucleotide repeat of Huntington's disease gene in a patient with schizophrenia and normal striatal histology: letter, 658
- Guidelines for the molecular genetics predictive test in Huntington's disease, 555
- HC (CAG)n amplified repeat analysis in Wessex, 174 abs
- Huntington's disease in two unrelated Arab kindreds and in an Afghan family resident in Saudi Arabia: letter, 819
- Instability of CAG repeats in Huntington's disease, 377
- Mutation size and age at onset in Huntington's disease, 166 abs
- Study of the Huntington's disease gene CAG repeats in schizophrenic patients shows overlap of the normal and HD affected ranges but absence of correlation with schizophrenia, 690
- Trinucleotide repeat length and progression of illness in Huntington's disease, 872

Hydrocephalus
- Genetic heterogeneity in X linked hydrocephalus: a family showing linkage to markers in Xq27.3, 167 abs
- Hydrocephalus in an infant with trisomy 22, 141
- Hyperphenylalaninaemia, Non-phenylketonuria hyperphenylalaninaemia mutations in Northern Ireland, 163 abs
- Hypertension, Angiotensin I converting enzyme polymorphism in different groups and its association with hypertension, plasma renin activity, and aldosterone, 172 abs
- Hypospadias, Two brothers with characteristic facial appearance, severe psychomotor retardation, hypospadias, contractures, and other symptoms: a new recessive syndrome?, 65
- Hypotonia, A syndrome of hypotonia, psychomotor retardation, seizures, delayed and dys harmonic skeletal maturation, and congenital fibre type disproportion, 405

Ile119→Met mutation, Homozygosity for a new mutation (Ile119→Met) in the insulin receptor gene in five sibs with familial insulin resistance, 715

Imprinting
- Imprinting in development and disease, 162 abs
- Possible role of imprinting in the Turner phenotype, 840
- Incomplete congenital stationary night blindness gene, Indentification of a key recombinant which assigns the incomplete congenital stationary night blindness gene proximal to MAOB, 580
- Incontinentia pigmenti, A clinical and genetic study of incontinentia pigmenti, 175 abs

K variant, A new detection method for the K variant of butyrylcholinesterase based on PCR primer introduced restriction analysis (PCR-PIRA), 576

Kalow allele, A PCR based method to determine the Kalow allele of the cholinesterase gene: the E1 allele frequency and its significance in the normal population, 248

Kartagener's syndrome, Unusual inheritance of primary ciliary dyskinesia (Kartagener's syndrome), 493

Kearns-Sayre syndrome, Juvenile Kearns-Sayre syndrome initially misdiagnosed as a psychosomatic disorder, 45

Keratin gene cluster, A gene for pachyonychia congenita is closely linked to the keratin gene cluster on 17q12–q21, 675

Keratitis punctata palmaris et plantaris, Keratitis punctata palmaris et plantaris: an autosomal dominantly inherited keratoderma associated with malignancy, 168 abs

Knuckle pads, Familial leuconychia, knuckle pads, hearing loss, and palmoplantar hyperkeratosis: an additional family with Bart-Pumphrey syndrome, 68

Kypnholmic dysplasia, Kypnholmic dysplasia: letter, 423

Laminin A variant gene, A laminin A variant gene (LAMA3) is present on chromosome 6q21, 164 abs

Laron syndrome, Facial morphometry of Ecuadorian patients with growth hormone receptor deficiency/ Laron syndrome, 635

Laurin-Sandrow syndrome, Laurin-Sandrow syndrome
Mediterranean anaemia, Prevention of Mediterranean anaemia in Latvia, Italy, today: letter, 86
Medium chain acyl-CoA dehydrogenase, Rapid detection of medium chain acyl-CoA dehydrogenase gene mutations by non-radioactive, single strand conformation polymorphism minigels, 551
Meiotic drive, Meiotic drive at the myotonic dystrophy locus: letter, 980
MELAS syndrome, Comparison of the relative levels of the 3243 (A→G) mtDNA mutation in heteroplasmic adult and fetal tissues, 41
Menkes disease, First trimester prenatal diagnosis of Menkes disease by DNA analysis, 615
Mental retardation
A syndrome of hypotonia, psychomotor retardation, seizures, delayed and dysmorphic skeletal maturation, and congenital fibre type disproportion, 405
Linkage of a non-specific X linked mental retardation gene to Xq26.1, 172 abs
Two brothers with characteristic facial appearance, severe psychomotor retardation, hypoplasia, contractures, and other symptoms: a new recessive syndrome?, 65
X linked mental retardation with non-deleitional thalassaemia (XTR-X): further delineation of the phenotype, 245
Mesangial sclerosis, Microcephaly and congenital nephrotic syndrome owing to diffuse mesangial sclerosis: an autosomal recessive syndrome, 121
Metachromatic leucodystrophy
A single origin for the most frequent mutation causing late infantile metachromatic leucodystrophy, 672
The arylsulphatase A gene and molecular genetics of metachromatic leucodystrophy: review article, 663
Micrognathia, Anophthalmia with cleft palate and micrognathia: a new syndrome?, 960
Microphthalmos, Autosomal dominant simple microphthalmos, 721
Microsatellite marker, X linked myotubular myopathy (MTM1) maps between DXS304 and DXS305, closely linked to the DXS455 VNTR and a new, highly informative microsatellite marker (DXS1684), 922
Microsatellites, Automated analysis of multiplex microsatellites, 937
Minigels, Rapid detection of medium chain acyl-CoA dehydrogenase gene mutations by non-radioactive, single strand conformation polymorphism minigels, 551
Mismatch analysis, Amplification mismatch analysis as a method of screening for mutations in genetic disorders, 162 abs
Mitochondrial encephalopathy, Comparison of the relative levels of the 3243 (A→G) mtDNA mutation in heteroplasmic adult and fetal tissues, 41
Mitochondrial mutation, Mitochondrial mutation commonly associated with Leber's hereditary optic neuropathy observed in a patient with Wolfram syndrome (DDMDOAD), 328
Mitochondrial myopathy
Juvenile Kearns-Sayre syndrome initially misdiagnosed as a psychosomatic disorder, 45
Screening service for mitochondrial myopathy: is non-invasive diagnosis possible in the younger age group? 171 abs
Molecular analysis, Duplication of 16q22→qter confirmed by fluorescence in situ hybridisation and molecular analysis, 880
Molecular biology, The molecular basis of genetic dominance: review article, 89
Molecular genetics predictive test, Guidelines for the molecular genetics predictive test in Huntington's disease, 555
Mosaicism
18q− and 18q+ mosaicism in a mentally retarded boy (46,XY;del(18)(q21)/46,XY;iso psu dic(18)(q23)), 168 abs
Mosaicism with a normal cell line and an autosomal structural rearrangement, 108
Screening for Y mosaicism in patients with Turner’s syndrome, 163 abs
Mouse homologues, Mouse homologues of human hereditary disease: review article, 1
mtDNA mutation
Comparison of the relative levels of the 3243 (A→G) mtDNA mutation in heteroplasmic adult and fetal tissues, 41
Juvenile Kearns-Sayre syndrome initially misdiagnosed as a psychosomatic disorder, 45
Mucin-Torre syndrome, Mucin-Torre syndrome: a variant of the cancer family syndrome, 627
Multiple endocrine neoplasia type 1, Genetic studies of thymic carcinoids in multiple endocrine neoplasia type 1: letter, 261
Mulvihill-Smith syndrome, Mulvihill-Smith syndrome, 707
Muscular dystrophy, Linkage analysis of families with severe childhood autosomal recessive muscular dystrophy in Morocco indicates genetic homogeneity of the disease in North Africa, 342
Mutation analysis, Mutation analysis in 600 French cystic fibrosis patients, 541
Mutations, Amplification mismatch analysis as a method of screening for mutations in genetic disorders, 162 abs
Myasthenia gravis, Myasthenia gravis: an important cause of the Pena-Shokeir phenotype, 167 abs
Myotonic dystrophy
A case of paternally inherited congenital myotonic dystrophy, 397
Absence of myotonic dystrophy in southern African Negroids is associated with a significantly lower number of CTG trinucleotide repeats, 37
Anticipation resulting in elimination of the myotonic dystrophy gene: a follow up study of one extended family, 595
Diagnostic experience of analysis for myotonic dystrophy, 171 abs
French myotonic dystrophy families show expansion of a CTG repeat in complete linkage disequilibrium with an intragenic 1 kb insertion, 33
High CTG repeat number in nodular thyroid tissue from a myotonic dystrophy patient, 891
Intelligence quotient profile in myotonic dystrophy, intergenerational deficit, and correlation with CTG amplification, 300
Meiotic drive at the myotonic dystrophy locus: letter, 980
Origin of a regressed myotonic dystrophy allele, 130
Paternal transmission of congenital myotonic dystrophy, 518
Myotubular myopathy, X linked myotubular myopathy (MTM1) maps between DXS304 and DXS305, closely linked to the DXS455 VNTR and a new, highly informative microsatellite marker (DXS1684), 922
Nephrotic syndrome, Autosomal dominant simple microphthalmos, 721
Nemaline myopathy, Exclusion of two candidate loci for autosomal recessive nemaline myopathy, 79
Nephrotic syndrome, Microcephaly and congenital nephrotic syndrome owing to diffuse mesangial sclerosis: an autosomal recessive syndrome, 121
Neural tube defects, Female predisposition to cranial neural tube defects is not because of a difference between the sexes in the rate of embryonic growth or development during neurulation, 383
Neurocristopathies, Hirschsprung’s disease associated with a deletion of chromosome 10 (q11.2q21.2): a further link with the neurocristopathies?, 325
Neurofibromatosis
Identification of two novel mutations within the neurofibromatosis-I gene by means of amplification and mismatch detection, 175 abs
Identifying and characterising pathological mutations in the NF2 gene, 168 abs
Neurofibromatosis type 1, Neurofibromatosis type 1 in Israel: survey of young adults, 853
Neurogenic bladder, Neurogenic bladder in Hunter’s syndrome, 257
Neurulation, Female predisposition to cranial neural tube defects is not because of a difference between the sexes in the rate of embryonic growth or development during neurulation, 383
Neuropenia, Prenatal diagnosis of X linked cardiomyopathy with neuropenia (Barth’s syndrome) using DXS15 (DX13), 169 abs
Nieman-Pick disease type C, Complementation studies in Niemann-Pick disease type C indicate the existence of a second group, 317
Night blindness gene, Identification of a key recombination which assigns the incomplete congenital stationary night blindness gene proximal to MAOB, 580
Nodular thyroid tissue, High CTG repeat number in nodular thyroid tissue from a myotonic dystrophy patient, 891
Non-phenylketonuria hyperphenylalaninaemia, Non-phenylketonuria hyperphenylalaninaemia mutations in Northern Ireland, 163 abs
Noonan syndrome, Genital tract function in men with Noonan syndrome, 468
North Africa, Linkage analysis of families with severe childhood autosomal recessive muscular dystrophy in Morocco indicates genetic homogeneity of the disease in North Africa, 342
Northern epilepsy syndrome, Northern epilepsy syndrome; an inherited childhood onset epilepsy with associated mental deterioration, 177
Norway, Aspartylglucosaminuria in northern Norway: a molecular and genealogical study, 360
Notices, 88, 350, 384, 662, 742, 822, 982
Ornithine transcarbamylase gene, A new informative Nio 1 RFLP in the 3’UTR of the OTC gene, 172 abs
Osteoclastonosis, Osteoclastonosis, 772
Osteogenesis imperfecta, Determination of a new collagen type I 2 gene point mutation which causes a Gly640 Cys substitution in osteogenesis imperfecta and prenatal diagnosis by DNA hybridisation, 965
Pachyonychia congenita, A gene for pachyonychia congenita is closely linked to the keratin gene cluster on 17q12–q21, 675
Pai syndrome, A further patient with Pai syndrome with autosomal dominant inheritance?, 497
Pallister-Hall syndrome, Recurrence of Pallister-Hall syndrome in two sibs, 145: letters, 740
Palmoplantar hyperkeratosis, Familial leuconychia, knuckle pads, hearing loss, and palmoplantar hyperkeratosis: an additional family with Bart-Pumphrey syndrome, 68
Pancreatic hypoplasia, Hereditary pancreatic hypoplasia, diabetes mellitus, and congenital heart disease: a new syndrome?, 331
Partial monosomy, Partial monosomy of 7q32 in a case of de novo recp(7;15)(q32;q15), 413
Patent ductus arteriosus, Further family with autosomal dominant patent ductus arteriosus: letter, 659
Paternal inheritance
A case of paternally inherited congenital myotonic dystrophy, 397
Paternal transmission of congenital myotonic dystrophy, 518
Peculiar face, Natural history and postmortem anatomy of a patient with tetra-amelia, ectodermal dysplasia, peculiar face, and developmental retardation (MIM 273390): letter, 980
Pena-Shokeir phenotype, Myasthenia gravis: an important cause of the Pena-Shokeir phenotype, 167 abs
Phenylalanine hydroxylase deficiency, Non-phenylketonuria hyperphenylalaninaemia mutations in Northern Ireland, 163 abs
Point mutations, On the origin of deletions and point
mutations in Duchenne muscular dystrophy: most deletions arise in oogenesis and most point mutations result from events in spermatogenesis, 183
Poly cystic kidney disease, Skeletal malformations and polycystic kidney disease (ARC) syndrome, 62: letter, 741
Polymerase chain reaction
Forensic medicine, PCR, and Bayesian approach: letter, 896
Rapid detection of medium chain acyl-CoA dehydrogenase gene mutations by non-radioactive, single strand conformation polymorphism minigels, 551
Polymerase chain reaction primer introduced restriction analysis, A new detection method for the X variant of butyrylcholinesterase based on PCR primer introduced restriction analysis (PCR-PIRA), 576
Portugal, A study of 159 Portuguese patients with familial amyloidotic polyneuropathy (FAP) whose parents were both unaffected, 293
Prader-Willi/Angelman Prader-Willi to Pregnancy ciliary dyskinesia, in Pseudohypoparathyroidism, atresia, dehydrogenase syndrome, 551
medicine, PCR, Forensic Rapid detection of diagnosis gene hydrogenase the single strand conformation phenotype: of patients, deletions arise in multiplex microsatellites, 170
cause PAPP-A of the male fetus management ary ciliary and dysplasia, double heterozygotes 22q11 materno in 15q11q13 material and Prader-Willi syndrome, 478
Molecular and cytogenetic analysis of 29 Prader-Willi syndrome patients, 175 abs
Prader-Willi/Angelman syndrome, Automated analysis of multiplex microsatellites, 937
Predisposition to cancer, The use of loss of constitutional heterozygosity data to ascertain the location of predisposing genes in cancer families, 448
Pregnancy
Changes in the maternal serum concentrations of FAPPA-A and SP-1 in Down's syndrome pregnancies between the first and second trimesters, 170 abs
Paternal pericentric inversion of chromosome 4 as a cause of recurrent pregnancy loss, 153
Prenatal diagnosis
First British molecular prenatal diagnosis for leprochaunism, 170 abs
Prenatal diagnosis of fragile X syndrome: management of the male fetus with a premutation, 170 abs
Prenatal diagnosis of X linked cardiomyopathy with neutropenia (Barth's syndrome) using DXS15 (DX13), 169 abs
Primary ciliary dyskinesia, Unusual inheritance of primary ciliary dyskinesia (Kartagener's syndrome), 493
Primed in situ labelling (PRINS), Pseudodicentric chromosome 18 diagnosed by chromosome painting and primed in situ labelling (PRINS), 99
Pseudochondroplastic dysplasia, Two sibs who are double heterozygotes for achondroplasia and pseudochondroplastic dysplasia, 565
Pseudohydroporathyrhidism, Paternal and maternal transmission of pseudohydroporathyrhidism type Ia in a family with Albright hereditary osteodystrophy: no evidence of genomic imprinting: letter, 84
Pulmonary atresia, Pulmonary atresia associated with maternal 22q11.2 deletion: possible parent of origin effect in the conotruncal anomaly face syndrome, 830
Pyridoxine-refractory congenital sideroblastic anaemia, Pyridoxine-refractory congenital sideroblastic anaemia with evidence for autosomal inheritance: exclusion of linkage to ALAS2 at Xp11.21 by polymorphism analysis, 213
Pyruvate dehydrogenase deficiency, Pyruvate dehydrogenase deficiency: syndrome of the month, 875
Rabson-Mendenhall syndrome, Homozygosity for a new mutation (Ile119→Met) in the insulin receptor gene in five sibs with familial insulin resistance, 715
Rapp-Hodgkin syndrome, Cephalometric analysis of Rapp-Hodgkin syndrome, 758
Read Codes, The Read Codes in clinical genetics, 166 abs
Renal dysfunction, Liver histology in the arthropripsy multiplex congenital, renal dysfunction, and cho- lestaticis (ARC) syndrome, 62: letter, 820
Renal hypoplasia, A newborn with ring chromosome 10, aganglionic megacolon, and renal hypoplasia, 804
Renin activity, Angiotensin I converting enzyme polymorphism in different groups and its association with hypertension, plasma renin activity, and aldosterone, 172 abs
RET locus, Long segment and short segment familial Hirschsprung's disease variable clinical expression at the RET locus, 602
Retina, inherited disease, Recent advances in the gene map of inherited eye disorders: primary hereditary diseases of the retina, choroid, and vitreous: review article, 903
Retinal pigment epithelium, Genetic heterogeneity of congenital hypertrophy of the retinal pigment epithelium (CHRPE) in families with familial adnominatous polyposis, 55
Retinitis pigmentosa, Retinitis pigmentosa families showing apparent X linked inheritance but unlinked to the RP2 or RP3 loci, 848
Retinoic acid receptor locus, Interpreting the evidence for an association between the retinoic acid receptor locus and non-syndromic cleft lip with or without cleft palate: letter, 425
Retinoschisis, Refinement of the chromosomal position of the X linked juvenile retinoschisis gene, 972
Rieger eye malformation, Genetic heterogeneity in Rieger eye malformation, 340
Ring chromosome 10, A newborn with ring chro- mosome 10, aganglionic megacolon, and renal hypertrophy and diabetes, 804
Ring (X) cell line, A comparison of the clinical and cytogenetic findings in nine patients with a ring (X) cell line and 16 45,X patients, 528
Robertsonian translocation, De novo 14q32 microdeletion on an inherited t(14; 21) Robertsonian translocation resulting in multiple congenital abnormalities in an apparently balanced translocation carrier, 169 abs
Parental origin of the X chromosome in a patient with a Robertsonian translocation and Turner's syndrome, 255
Rothmund-Thomson syndrome, Instability of lymphocyte chromosomes in a girl with Rothmund-Thomson syndrome, 570
Saethre-Chotzen syndrome, Saethre-Chotzen syn- drome: syndrome of the month, 393
Schizophrenia
Expanded CAG trinucleotide repeat of Huntington's disease gene in a patient with schizophrenia and normal striatal histology: letter, 658
Homzygosity at the dopamine D3 receptor locus is not associated with schizophrenia: letter, 260
Study of the Huntington's disease gene CAG repeats in schizophrenic patients shows overlap of the normal and HD affected ranges but absence of correlation with schizophrenia, 690
Sclerosteosis, Sclerosteosis in a Spanish male: first report in a person of Mediterranean origin, 976
Scotland
Ascertainment and severity of Marfan syndrome in a Scottish population, 51
Facial clefts in the west of Scotland in the period 1980-1984: epidemiology and genetic diagnoses, 126
Screening, The impact of population based screening for carriers of cystic fibrosis, 364
Seckel syndrome, Acute myeloid leukaemia in a patient with Seckel syndrome, 148
Segregation analysis, Segregation analysis of Alagille syndrome, 453
Segregation ratios, Low segregation ratios in autosomal recessive disorders: letter, 85
Sessile colonic adenomas, Deletions of the entire APC gene are associated with sessile colonic adenomas: letter, 426

Severe combined immunodeficiency Deletion mapping of the DXS986, DXS995, and DXS1002 loci defines their order within Xq21, 344

Trisomy X in a female member of a family with X linked severe combined immunodeficiency: implications for carrier diagnosis, 717

Sideroblastic anaemia, Pyridoxine-refractory congenital sideroblastic anaemia with evidence for autosomal inheritance: exclusion of linkage to ALAS2 at Xp11.21 by polymorphism analysis, 213

Single gene defects, Genetic epidemiology of single gene defects in Chile, 702

Single strand conformation polymorphism minigels, Rapid detection of medium chain acyl-CoA dehydrogenase gene mutations by non-radioactive, single strand conformation polymorphism minigels, 551

Skeletal analysis, Diagnostic distinction between anencephaly and amnion rupture sequence based on skeletal analysis, 823

Skeletal malformations, Skeletal malformations and polycystic kidney disease: letter, 741

Skeletal/genital syndrome, The newly recognised skeletal/genital syndrome: letter, 505

Skin pigmentary anomaly, Asymmetry and skin pigmentary anomalies in chromosome mosaicism, 694

Sotos syndrome, Sotos syndrome: a study of the diagnostic criteria and natural history, 20

Spastic paraplegia, Spastic paraplegia, dysarthria, brachydactyly, and cone shaped epiphyses: confirmation of the Fitzsimmons syndrome, 251

Spermatogenic arrest, Familial pericentric inversion of chromosome 1 (p34q23) and male infertility with stage specific spermatogenic arrest, 573

Skeletal muscular atrophy Apparent SMA I unlinked to 5q, 242

Prenatal diagnosis of spinal muscular atrophy, 167 abs

Spinocerebellar ataxia type 1, Chemiluminescent detection of flotted PCR products (CB-PCR) of two CAG dynamic mutations (Huntington's disease and spinocerebellar ataxia type 1), 654

Spondyloepiphysical dysplasia New X linked spondyloepiphysical dysplasia: a report on eight affected males in the same family, 371

Spondyloepiphysical dysplasia with joint laxity (SEMDJL): syndrome of the month, 136

Stargardt's disease, Stargardt's disease is not allelic to the genes for neuronal ceroid lipofuscinoses, 222

Superoxide dismutase, Identification of the superoxide dismutase (SOD1) Ile113Thr mutation in three unrelated amyotrophic lateral sclerosis patients, 175 abs

Sweden Anticipation in Swedish families with bipolar affective disorder, 686

Charcot-Marie-Tooth disease in northern Sweden: pedigree analysis and the presence of the duplication in chromosome 17p11.2, 435

Geographical distribution of TTR met30 carriers in northern Sweden: discrepancy between carrier frequency and prevalence rate, 351

Syndactyly, Syndactyly, ectodermal dysplasia, and cleft lip/palate: syndrome of the month, 957

Syndrome of the month, Syndrome of the month: annotation, 744

Teeth, A new dominantly inherited ectodermal dysplasia presenting with natal teeth, 171 abs

Testis determining gene(s), Testis determining gene(s) on the X chromosome short arm: chromosomal localisation and possible role in testis determination: letter, 349

Tetra-amelia, Natural history and postmortem anatomy of a patient with tetra-amelia, ectodermal dysplasia, peculiar face, and developmental retardation (MIM 273390): letter, 980

Tetrasomy, Multiple origins of X chromosome trisomy: letter, 424

Thalassaemias Prevention of Mediterranean anaemia in Latium, Italy, today: letter, 86

Thalassaemia in Azerbaijan, 209

The origin of the β thalassaemia mutations in the United Arab Emirates, 165 abs

The spectrum of β thalassaemia mutations in the UAE national population, 59

X linked mental retardation with non-deletional thalassaemia (AXR-X): further delineation of the phenotype, 245

Thrombocytopenia, X linked thrombocytopenia in a large Danish pedigree, 167 abs

Thymic carcinoids, Genetic studies of thymic carcinoids in multiple endocrine neoplasia type 1: letter, 261

Transcription, Parental origin of transcription from the human GNAS1 gene, 163 abs, 607

Transforming growth factor beta, Analysis of a fibrillin TGFB1-bp motif: putative cell adhesion properties, 174 abs

Translocation A male with a de novo translocation involving loss of 15q11q13 material and Prader-Willi syndrome, 478

Assessment of Yq translocations, 978

Balanced reciprocal whole arm translocation t(3;9): analysis by fluorescence in situ hybridisation, 74

Diaphragmatic herniae and translocations involving 8q22 in two patients, 735

Familial half cryptic translocation t(9;17), 712

Value of chromosome painting in determining the chromosomal outcome of offspring of a 12;16 translocation carrier, 234

X;Y translocation in a girl with short stature and some features of Turner's syndrome: cytogenetic and molecular studies, 649

Transhyretin Amyloloid polyneuropathy in two German-American families: a new transthyretin variant (Val 107), 416

Geographical distribution of TTR met30 carriers in northern Sweden: discrepancy between carrier frequency and prevalence rate, 351

Trinucleotide repeat length, Trinucleotide repeat length and progression of illness in Huntington's disease, 872

Triphalangeal thumb, Phenotypic analysis of triphalangeal thumb and associated hand malformations, 462

Trisomy FISH detection of trisomy 21 in interphase by the simultaneous use of two differently labelled cosmids contigs, 679

Hydrocephalus in an infant with trisomy 22, 141

Molecular analysis of human trisomies 13 and 18, 175 abs

Partial trisomy for 2q in a patient with dir dup(2)(p33.1q35), 652

Partial trisomy 3q causing mild Cornelia de Lange phenotype, 150

Trisomy 12 mosaicism in a 7 year old girl with dysmorphic features and normal mental development, 253

Trisomy 18 and trisomy 21 mosaicism in a Down's syndrome patient, 418

Trisomy 8 syndrome owing to isodicentric 8p chromosomess: regional assignment of a presumptive gene involved in corpus callosum development, 233

Trisomy X in a female member of a family with X linked severe combined immunodeficiency: implications for carrier diagnosis, 717

Tuberous sclerosis Allele loss on chromosome 16p in hamartomata and tumours from patients with tuberous sclerosis, 164 abs
Phenotypic variation of tuberous sclerosis in a single extended kindred, 761
Turner phenotype, Possible role of imprinting in the Turner phenotype, 840
Turner's syndrome
A comparison of the clinical and cytogenetic findings in nine patients with a ring (X) cell line and 16 45, X patients, 528
Balanced reciprocal whole arm translocation t(3;9): analysis by fluorescence in situ hybridisation, 74
Identification by molecular diagnosis of mosaic Turner's syndrome in an obligate carrier female for fragile X syndrome, 76
Parental origin of the X chromosome in a patient with a Robertsonian translocation and Turner's syndrome, 255
Screening for Y mosaicism in patients with Turner's syndrome, 163 abs
X;Y translocation in a girl with short stature and some features of Turner's syndrome: cytogenetic and molecular studies, 649
Twins
X inactivation patterns in female monozygotic twins and their families, 754
X inactivation studies in female monozygotic twins, 169 abs
Ultrasoundography, Diagnosis of adult polycystic kidney disease by genetic markers and ultrasonographic imaging in a voluntary family register, 115
Uniparental disomy
A systemic search for uniparental disomy, 163 abs
"Compensatory" uniparental disomy of chromosome 21 in two cases, 534
Mosaic uniparental disomy in Beckwith-Wiedemann syndrome, 749
Uniparental disomy in man, 162 abs
United Arab Emirates
Origin of the β-thalassaemia mutations in the United Arab Emirates, 165 abs
Spectrum of β-thalassaemia mutations in the UAE national population, 59
Urinary tract abnormalities, Urinary tract abnormalities in Emilia Romagna (Italy), 171 abs
VATER, Drug induced VATER association: is di-benzepin a possible cause: letter, 423
Velocardiofacial syndrome, Velocardiofacial syndrome and DiGeorge sequence: letter, 423
Ventriculo-septal defect, Pulmonary atresia associated with maternal 22q11.2 deletion: possible parent of origin effect in the conotruncal anomaly face syndrome, 830
Vitreoretinopathies, Recent advances in the gene map of inherited eye disorders: primary hereditary diseases of the retina, choroid, and vitreous: review article, 903
VNTR probe, De novo mutation in a 3′HVR allele used as a paternity test in a family with Huntington's chorea, 173 abs
Wilms' tumour, The French Wilms' tumour study: no clear evidence for cancer prone families, 429
Wolf-Hirschhorn syndrome, Molecular characterisation of chromosome 4p deletions resulting in Wolf-Hirschhorn syndrome, 103
Wolfram syndrome, Mitochondrial mutation commonly associated with Leber's hereditary optic neuropathy observed in a patient with Wolfram syndrome (DIDMOAD), 328
45X cell line, A comparison of the clinical and cytogenetic findings in nine patients with a ring (X) cell line and 16 45,X patients, 528
X inactivation, X inactivation studies in female monozygotic twins, 169 abs
X linked spondyloepimetaphyseal dysplasia, New X linked spondyloepimetaphyseal dysplasia: a report on eight affected males in the same family, 371
Editor: Peter S Harper
North American Editor: P Michael Conneally (Indianapolis)
Reviews Editor: Rodney Harris (Manchester)
Cytogenetics Editor: A Schinzel (Zurich)
Molecular Genetics Editor: Ann Harris (Oxford)
Technical Editor: Clare Henderson
