

Contents

Original articles

- Genotype-phenotype relationship in 12 patients carrying cystic fibrosis mutation R334W** G Antiñolo, S Borrego, M Gili, J Dapena, I Alfageme, F Reina 89
- Bardet-Biedl syndrome: a molecular and phenotypic study of 18 families** P L Beales, A M Warner, G A Hitman, R Thakker, F A Flinter 92
- Refinement of the laminin $\alpha 2$ chain locus to human chromosome 6q2 in severe and mild merosin deficient congenital muscular dystrophy** I S Naom, M D'Alessandro, H Topaloglu, C Sewry, A Ferlini, A Helbling-Leclerc, P Guicheney, J Weissenbach, K Schwartz, K Bushby, J Philpot, V Dubowitz, F Muntoni 99
- Fucosidosis: genetic and biochemical analysis of eight cases** H Cragg, M Williamson, E Young, J O'Brien, J Alhadeff, S Fang-Kircher, E Paschke, B Winchester 105
- Identification of a common low density lipoprotein receptor mutation (R329X) in the south of England: complete linkage disequilibrium with an allele of microsatellite D19S394** I N M Day, L Haddad, S D O'Dell, L B Day, R A Whittall, S E Humphries 111
- Genetic refinement of dominant optic atrophy (OPA1) locus to within a 2 cM interval of chromosome 3q** M Votruba, A T Moore, S S Bhattacharya 117
- Molecular analysis of patients of Sardinian descent with Crigler-Najjar syndrome type I** M C Rosatelli, A Meloni, V Faà, L Saba, G Crisponi, M G Clemente, G Meloni, M T Piga, A Cao 122
- Pendred syndrome: evidence for genetic homogeneity and further refinement of linkage** E Gausden, B Coyle, J A L Armour, R Coffey, A Grossman, G R Fraser, R M Winter, M E Pembrey, P Kendall-Taylor, D Stephens, L M Luxon, P D Phelps, W Reardon, R Trembath 126
- Exclusion of CAG repeat expansion as the cause of disease in autosomal dominant retinitis pigmentosa families** T J Keen, A G Morris, C F Inglehearn 130
- Normal erythrocyte membrane Gs α bioactivity in two unrelated patients with acrodysostosis** L C Wilson, M E M Oude Luttikhuis, M Baraitser, H M Kingston, R C Trembath 133
- Germline and somatic mosaicism in a female carrier of Hunter disease** R Froissart, I Maire, V Bonnet, T Levade, D Bozon 137
- The role and practice of the genetic nurse: report of the AGNC Working Party** H Skirton, C Barnes, G Curtis, J Walford-Moore 141

Commentary

- Haemochromatosis: a gene at last?** K J H Robson, J D Shearman, A T Merryweather-Clarke, J J Pointon, W M Rosenberg, A P Walker, J S Dooley, A Bomford, R Raha-Chowdhury, M Worwood 148

Syndrome of the month

- Alagille syndrome** I D Krantz, D A Piccoli, N B Spinner 152

Short reports

- Androgen insensitivity with mental retardation: a contiguous gene syndrome?** H R Davies, I A Hughes, M O Savage, C A Quigley, M Trifiro, L Pinsky, T R Brown, M N Patterson 158
- Functional Xp disomy and de novo t(X;13)(q10;q10) in a girl with hypomelanosis of Ito** L S Correa-Cerro, H Rivera, A I Vasquez 161
- Familial complex chromosome rearrangement ascertained by in situ hybridisation** C Fuster, L Miguez, R Miró, M A Rigola, A Perez, J Egozcue 164
- Paternal uniparental disomy for chromosome 6 causes transient neonatal diabetes** M L Whiteford, A Narendra, M P White, A Cooke, A G Wilkinson, K J Robertson, J L Tolmie 167
- Mutation in the mitochondrial 12S rRNA gene in two families from Mongolia with matrilineal aminoglycoside ototoxicity** A Pandya, X Xia, J Radnaabazar, J Batsuuri, B Dangaansuren, N Fischel-Ghodsian, W E Nance 169

Abstracts

- Medical genetics: advances in brief** 173

Letters to the Editor

- Parents' responses to predictive genetic testing in their children** A Clarke 174
- D409h/D409H genotype in Gaucher-like disease** E Uyama, M Uchino, H Ida, Y Eto, M Owada 175
