

## Contents

### Review article

- 225** Genes other than *BRCA1* and *BRCA2* involved in breast cancer susceptibility  
*M M de Jong, I M Nolte, G J te Meerman, W T A van der Graaf, J C Oosterwijk, J H Kleibeuker, M Schaaqveld, E G E de Vries*

### Commentaries

- 243** Assessing epidemiological evidence for the teratogenic effects of anticonvulsant medications  
*H Dolk, P McElhatton*
- 245** The teratogenicity of anticonvulsant drugs: a progress report  
*L B Holmes*
- 248** Antiepileptic drug therapy during pregnancy: the neurologist's perspective  
*S Shorvon*

### Original articles

- 251** Long term health and neurodevelopment in children exposed to antiepileptic drugs before birth  
*J C S Dean, H Hailey, S J Moore, D J Lloyd, P D Turnpenny, J Little*
- 260** Specific haplotypes of the *RET* proto-oncogene are over-represented in patients with sporadic papillary thyroid carcinoma  
*F Lesueur, M Corbex, J D McKay, J Lima, P Soares, P Griseri, J Burgess, I Ceccherini, S Landolfi, M Papotti, A Amorim, D E Goldgar, G Romeo*
- 266** Automated fluorescent genotyping detects 10% of cryptic subtelomeric rearrangements in idiopathic syndromic mental retardation  
*M Rio, F Molinari, S Heuertz, C Ozilou, P Gosset, O Raoul, V Cormier-Daire, J Amiel, S Lyonnet, M Le Merrer, C Turleau, M-C de Blois, M Prieur, S Romana, M Vekemans, A Munnich, L Colleaux*

### Short report

- 271** Identification of mutations in the gene encoding sterol regulatory element binding protein (SREBP)-2 in hypercholesterolaemic subjects  
*P Y Muller, A R Miserez*

### Letters to JMG

- 276** A new *MRXS* locus maps to the X chromosome pericentromeric region: a new syndrome or narrow definition of Sutherland-Haas genetic locus?  
*M Fichera, E Borgione, E Avola, S Amata, M Sturnio, C Romano, A Ragusa*
- 281** Distinctive audiometric features between *USH2A* and *USH2B* subtypes of Usher syndrome  
*M Hmani-Aifa, S Ben Arab, K Kharrat, D J Orten, A Boulila-Elgaied, M Drira, S Hachicha, W J Kimberling, H Ayadi*
- 284** Dominant X linked retinitis pigmentosa is frequently accounted for by truncating mutations in exon ORF15 of the *RPGR* gene  
*J-M Rozet, I Perrault, N Gigarel, E Souied, I Ghazi, S Gerber, J-L Dufier, A Munnich, J Kaplan*
- 286** Identification of cryptic splice site, exon skipping, and novel point mutations in type I *CD36* deficiency  
*H Hanawa, K Watanabe, T Nakamura, Y Ogawa, K Toba, I Fuse, M Kodama, K Kato, K Fuse, Y Aizawa*
- 292** Four novel mutations in the *OFD1* (*Cxorf5*) gene in Finnish patients with oral-facial-digital syndrome 1  
*A Rakkolainen, S Ala-Mello, P Kristo, A Orpana, I Järvelä*
- 297** Genetic characterisation of patients with multiple colonic polyps  
*C Albuquerque, M Cravo, C Cruz, P Lage, P Chaves, P Fidalgo, A Suspiro, C Nobre Leitão*

### Echoes

- 242** Another risk factor for MI?
- 259** Gene carriers face other risks
- 291** Limited role for HLA DR15 in MS
- 296** Genes predict outcome in multiple sclerosis
- 302** Cancers of the small and large bowel originate differently
- 303** Book reviews
- 303** Correction
- 304** Instructions for authors
