11p, Is the locus for Costello syndrome on 11p?, 469
11p15, Paternal uniparental disomy in monozygotic twins discordant for hemihypertrophy, 223
1555A>G mutation, Heteroplasmy for the 1555A>G mutation in the mitochondrial 12S rRNA gene in six Spanish families with non-syndromic hearing loss, 632
1q21-q23, DFNA6, A novel locus for autosomal dominant non-syndromic hearing loss, maps proximal to DFNA7/DFMN1 region on chromosome 1q21-q23, 852
22 translocation, Neurofibromatosis 2 in a patient with a de novo balanced reciprocal translocation 46,X,i(22)(p11.2;q11.2), 682
22q13, Molecular characterisation of the 22q13 deletion syndrome supports the role of haploinsufficiency of SHANK3/PROSAP2 in the major neurological symptoms, 575
2p12, Mapping of a new autosomal dominant non-syndromic hearing loss locus (DFNA43) to chromosome 2p12, 278
5,10-methylenetetrahydrofolate reductase, Maternal 677CT/1298AC allele specific replication timing, The imprinted region on human chromosome 7q42 extends to the carboxypeptidase A gene cluster: an imprinted candidate for Silver-Russell syndrome, 249
575, 677C>T, Geographical and ethnic variation of the 677C>T allele of 5,10 methylenetetrahydrofolate reductase (MTHFR): findings from over 7000 newborns from 16 areas worldwide, 619
7q36, No association between the EN2 gene and autistc disorder, e4
9q34, Identification of recurrent regions of chromosome loss and gain in vestibular schwannomas using comparative genomic hybridisation, 802
9q34 deletion, Cryptic terminal deletion of chromosome 9q34: a novel cause of syndromic obesity in childhood?, 300
α-galactosidase deficiency, Fabry disease: molecular studies in Italian patients and X inactivation analysis in manifesting carriers, e103
ABCA1, A common variant in the ABCA1 gene is associated with a lower risk for premature coronary heart disease in familial hypercholesterolaemia, 163
ABCB4, ABCB4 gene sequence variation in women with intraperitoneal cholestasis of pregnancy, e70
ABL gene, Deletion in the ABL gene resulting from a meiotic recombination of a maternal [3;22;9]q22;q12;q34.1) translocation, e6
acanthosis nigricans, Studies on the pathogenesis of Costello syndrome, e37
ACO2, Mutation and LOH analysis of ACO2 in colorectal cancer: no evidence of biallelic genetic inactivation, e73
acrosomic breakdown, Acrosomic breakdown a novel cause of idiopathic male infertility, e50
acro-renal-ocular syndrome, Mutation and LOH analysis of ACO2 in colorectal cancer: no evidence of biallelic genetic inactivation, e73
ACTG1, A mutation in the gamma actin 1 (ACTG1) gene causes autosomal dominant hearing loss (DFNA20/26), 879
actin, A mutation in the gamma actin 1 (ACTG1) gene causes autosomal dominant hearing loss (DFNA20/26), 879
ADHD, A novel pericentric inversion of chromosome 3 cosegregates with a developmental-behavioural phenotype, e15
ADHD, Disruption of a novel member of a sodium/hydrogen exchanger family and DOCK3 is associated with an attention deficit hyperactivity disorder-like phenotype, 733
adolescents, A genetic screening programme for Tay-Sachs disease and cystic fibrosis for Australian Jewish high school students, e45
adrenal hypoplasia, A complex deletion-inversion-deletion event results in a chromosomal (ILRAP1) polyhydroproline transcript and a contiguous gene deletion syndrome, e127
AEC syndrome, Rapp-Hodgkin and AEC syndromes due to a new frameshift mutation in the TP63 gene, e133
AGTR2 gene, Rare polymorphic variants of the AGTR2 gene in boys with non-specific mental retardation, 357
AIB1, Somatic instability of the DNA sequences encoding the polymorphic polyglutamine tract of the AIB1 gene, 885
AIB1 and breast cancer, Somatic instability of the DNA sequences encoding the polymorphic polyglutamine tract of the AIB1 gene, 885
Aicardi-Goutières syndrome, Cree encephalitis is allelic with Aicardi-Goutières syndrome: implications for the pathogenesis of interferon alpha metabolism, 183
Aicardi-Goutières syndrome, Consequences of JAG1 mutations, 891
aldosterone synthase, Gender specific association of aldosterone synthease gene polymorphism with renal survival in patients with IgA nephropathy, 372
ALK1, Hereditary haemorrhagic telangiectasia: a questionnaire based study to delineate the different phenotypes caused by endoglin and ALK1 mutations, 585
ALK-1, Molecular and functional analysis identifies ALK-1 as the predominant cause of pulmonary hypertension related to hereditary haemorrhagic telangiectasia, 865
alkaline phosphatase, Molecular study of three cases of otodystrophy resulting from heterozygosity for mutations in the tissue non-specific alkaline phosphatase gene, 605
allele specific replication timing, The imprinted region on human chromosome 7q42 extends to the carboxypeptidase A gene cluster: an imprinted candidate for Silver-Russell syndrome, 249
allelic imbalance, CHEK2 1100delC and colorectal cancer, e110
alternative splicing, Transcript analysis of the cystic fibrosis splicing factor 5125S-1G->A shows use of multiple alternative splicing sites and suggests a putative role of exonic splicing enhancers, e88
Alzheimer’s disease, Association of 3’-UTR polymorphisms of the oxidised LDL receptor 1 (OR1) gene with Alzheimer’s disease, 424
amelogenesis imperfecta, Novel ENAM mutation responsible for autosomal recessive amelogenesis imperfecta and localised enamel defects, 900
amyloid neuropathy, Genetic study of transferrin amyloid neuropathies: carrier risks among French and Portuguese families, e120
analphoid marker chromosome, Alphaloid de novo marker chromosome inv dup(3)(q28qter) with neocentromere in a dysmorphic and developmentally retarded girl, e27
aneuploidy, Rapid, high throughput prenatal detection of aneuploidy using a novel quantitative method (MLPA), 907
Angelman syndrome, Angelman syndrome: a review of the clinical and genetic aspects, 87
angio-oedema, The effect of sequence variations within the coding region of the C1 inhibitor gene on disease expression and protein function in families with hereditary angio-oedema, e114
angiotensin-converting enzyme, Renoprotective efficacy of renin-angiotensin inhibitors in IgA nephropathy is influenced by ACE A2350G polymorphism, e130
angiotensin-converting enzyme inhibitor, Renoprotective efficacy of renin-angiotensin inhibitors in IgA nephropathy is influenced by ACE A2350G polymorphism, e130
animal model of human disease, Canine tricuspid valve malformation, a model of human Ebstein anomaly, maps to dog chromosome 9, 320
aplastic anaemia, Short-limbed dwarfism with bowing, combined immune deficiency, and late onset aplastic anaemia caused by novel mutations in the RMRP gene, 761
APOE, APOE, and TGF-β1 genes are associated with obesity phenotypes, 918
apolipoprotein E, Does apolipoprotein E polymorphism influence susceptibility to malaria?, 348
apolipoprotein E gene, Small babies receive the cardiovascular protective apolipoprotein E2 allele less frequently than expected, 626
apolipoprotein AV gene, Ser19→Trp polymorphism within the apolipoprotein AV gene in hypertriglyceridaemic people, e105
www.jmedgenet.com
apoptosis, Promoter polymorphisms of the CD14 gene in Italian patients with coeliac disease, e108
arCRD, Evidence of RPRGR1 gene mutations associated with recessive cone-rod dystrophy, 616
Arg276X, High incidence of the R276X SALL1 mutation in sporadic but not familial Townes-Brck syndrome and report of the first familial case, e127
arteriovenous, Visceral manifestations in hereditary haemorrhagic telangiectasia type 2, 494
Ashkenazi Jews, A twofold increase in BRCA mutation related prostate cancer among Ashkenazi Israelis is not associated with distinctive histopathology, 787
Gene homozygosity and phenotypic variability among Ashkenazi Jews with Usher syndrome type III; 767
The RNASEL 471delAAA allele and prostate cancer in Ashkenazi Jewish men, e22
asphyxiating thoracic dystrophy, A locus for asphyxiating thoracic dystrophy, ATD, maps to chromosome 15q13, 431
assessment, Evaluation of breast cancer risk assessment packages in the family history evaluation and screening programme, 807
association, The metabolotropic glutamate receptor 8 gene at 7q31: partial duplication and possible association with autism, e42
association study, A Y chromosomal influence on prostate cancer risk: the multi-ethnic cohort study, 815
atlasin, Science in motion: common molecular pathological themes emerge in the hereditary spastic paraplegias, 81
atrophy, A common IL-1 complex haplotype is associated with an increased risk of atrophy, e66
atrial fibrillation, Expanding the phenotype of atrial fibrillation, e108
atrial/ventricular septal defects, Novel TBX5 mutations and molecular mechanisms for Holt-Oram syndrome, e29
attitudes, Genetic information but not termination: pregnant women's attitudes and willingness to pay for carrier screening for deafness genes, e80
atypical Kearns Sayre syndrome, Compensatory amplification of miDNA in a patient with anovel deletion/duplication and high mutant load, e125
auditory neuropathy, Non-syndromic recessive auditory neuropathy is the result of mutations in the ototin (OTOF) gene, 45
autism, Association of INPP1, PIK3CG, and TSC2 gene variants with autistic disorder: implications for phosphatidylinositol signalling in autism, e119
No association between the EN2 gene and autistic disorder, e4
The neurobeachin gene is disrupted by a translocation in a patient with idiopathic autism, 352
autistic behaviour, Myhre syndrome: new reports, review, and differential diagnosis, 546
autoimmunity, Promoter polymorphisms of the CD14 gene in Italian patients with coeliac disease, e108
autosomal dominant, Evidence of autosomal dominant Leber congenital amaurosis (LCA) underlain by a CRX heterozygous null allele, e90
autosomal recessive, Mapping of a new locus for autosomal recessive non-syndromic mental retardation in the chromosomal region 19p13.12-p13.2: further genetic heterogeneity, 729
Microcephaly-cardiomyopathy syndrome: expansion of the phenotype, e78
autosomal recessive inheritance, Clinical, radiological, and chondro-osseous findings in aipsmsplasia: survey of a series of 12 unreported cases, 195
autophagy, Mapping, A locus for asphyxiating thoracic dystrophy, ATD, maps to chromosome 15q13, 431
A novel locus for autosomal recessive primary microcephaly (MCPH6) maps to 13q12.2, 540
azoospermia factor b, The human Y chromosome's azoospermia factor b (AZFb) region: sequence, structure, and deletion analysis in infertile men, 18
Bannayan-Riley-Ruvalcaba syndrome, PTEN hamartoma tumour syndrome: variability of an entity, e111
Bardet-Biedl syndrome, Further support for digenic inheritance in Bardet-Biedl syndrome, e104
Barrett's oesophagus, Demographic and phenotypic features of 70 families segregating Barrett's oesophagus and oesophageal adenocarcinoma, 651
basal ganglia, Karak syndrome: a novel degenerative disorder of the basal ganglia and cerebellum, 543
Neurofibromatosis in a French family with late onset dominant dystonia, e69
BDA1, Identification of a mutation in the Indian Hedgehog (IHH) gene causing brachydyctaly type A1 and evidence for a third locus, 42
BDA-1, Mild brachydyctaly type A1 maps to chromosome 2q35-q36 and is caused by a novel IHH mutation in a three generation family, 132
Beckwith-Wiedemann syndrome, Beckwith-Wiedemann syndrome and assisted reproduction technology (ART), 62
Paternal uniparental disomy in monzygotic twins discordant for hemihypertrophy, 223
Silencing of CDKN1C (p57KIP2) is associated with hypomethylation at KvDMR1 in Beckwith–Wiedemann syndrome, 797
benign telangiectasia, Autosomal dominant hereditary benign telangiectasia maps to the CMC1 locus for capillary malformation on chromosome 9q14, 849
BHD, Alterations of the Birt-Hogg-Dubé gene (BHD) in sporadic colorectal tumours, 511
Analysis of the Birt-Hogg-Dubé (BHD) tumour suppressor gene in sporadic renal cell carcinoma and colorectal cancer, 820
biparental hydatidiform mole, Genetic refinement and physical mapping of a biparental complete hydatidiform mole locus on chromosome 19q13.4., e95
bipolar affective disorder, Prader-Willi syndrome: the psychopathological phenotype in uniparental disomy, e112
birth defects, Complete sequencing shows a role for MSX1 in non-syndromic cleft lip and palate, 399
Birt-Hogg-Dubé syndrome, Mutations of the Birt-Hogg-Dubé (BHD) gene in sporadic colorectal carcinomas and colorectal carcinoma cell lines with microsatellite instability, 364
bisulphite, Modulation of methylation in the FMR1 promoter region after long term treatment with L-carnitine and acetyl-L-carnitine, 1
bladder carcinoma, Studies on the pathogenesis of Costello syndrome, e37
BMPR-II, Molecular and functional analysis identifies ALK-1 as the predominant cause of pulmonary hypertension related to hereditary haemorrhagic telangiectasia, 865
bone marrow transplantation, Short-limbed dwarfism with bowing, combined immune deficiency, and late onset aplastic anaemia caused by novel mutations in the BMPR gene, 761
BO52, A gene locus for branchio-otic syndrome maps to chromosome 14q21.3-q24.3, 515
BO53, A gene locus for branchio-otic syndrome maps to chromosome 14q21.3-q24.3, 515
brachydactyly, Myhre syndrome: new reports, review, and differential diagnosis, 546
brachydactyly type A1, Identification of a mutation in the Indian Hedgehog (IHH) gene causing brachydyctaly type A1 and evidence for a third locus, 42
Mild brachydyctaly type A1 maps to chromosome 2q35-q36 and is caused by a novel IHH mutation in a three generation family, 132
brain, Association of 3'-UTR polymorphisms of the oxidised LDL receptor 1 (OLR1) gene with Alzheimer's disease, 424
brain development, Mutations in the oligophrenin-1 gene (OPHN1) cause X linked congenital cerebellar hypoplasia, 441
branchio-otic syndrome, A gene locus for branchio-otic syndrome maps to chromosome 14q21.3-q24.3, 515
branchio-oto-renal syndrome (BOR), A gene locus for branchio-otic syndrome maps to chromosome 14q21.3-q24.3, 515
BRD, High frequency of novel germline mutations in a third locus, in the heterogeneous population of Brazil, e31
BRCA, A twofold increase in BRCA mutation related prostate cancer among Ashkenazi Israelis is not associated with distinctive histopathology, 787
BRCA1, Application of haplotype pair analysis for the identification of hemizygous loci, 346
BRCA1 and BRCA2 mutations have no major role in predisposition to prostate cancer in Finland, e98
BRCA1 c.2845insA is a recurring mutation with a founder effect in Singapore Malay women with early onset breast/ovarian cancer, e117

Germline TP53 mutations in breast cancer families with multiple primary cancers: is TP53 a modifier of BRCA1? e34

Individual and family characteristics associated with protein truncating BRCA1 and BRCA2 mutations in an Ontario population based series from the Cooperative Family Registry for Breast Cancer Studies, e91

Neuronal migration defect in a BRCA1 gene carrier: possible focal nullisomy?, e24

Non-random transmission of mutant alleles to female offspring of BRCA1 carriers in Poland, 719

Pre-test prediction models of BRCA1 or BRCA2 mutation in breast/ovarian families attending familial cancer clinics, 503

Sensitivity of BRCA1/2 mutation testing in 466 breast/ovarian cancer families, e107

BRCA1/BRCA2, Rapid, inexpensive scanning for all possible BRCA1 and BRCA2 gene sequence variants in a single assay: implications for genetic testing, e33

BRCA2, Individual and family characteristics associated with protein truncating BRCA1 and BRCA2 mutations in an Ontario population based series from the Cooperative Family Registry for Breast Cancer Studies, e91

BRCA1 and BRCA2 mutations have no major role in predisposition to prostate cancer in Finland, e98

Pre-test prediction models of BRCA1 or BRCA2 mutation in breast/ovarian families attending familial cancer clinics, 503

Sensitivity of BRCA1/2 mutation testing in 466 breast/ovarian cancer families, e107

The BRCA2 variant 8204G–A is a splicing mutation and results in an in-frame deletion of the gene, e23

breast and ovarian cancer susceptibility, Mutation screening of Mre11 complex genes: indication of RAD50 involvement in breast and ovarian cancer susceptibility, e131

breast cancer, Absence of constitutional H2AX gene mutations in 101 hereditary breast cancer families, e51

Evaluation of breast cancer risk assessment packages in the family history evaluation and screening programme, 807

Germline TP53 mutations in breast cancer families with multiple primary cancers: is TP53 a modifier of BRCA1?, e34

Identification of a splice acceptor site mutation in p16INK4A/p14ARF within a breast cancer, melanoma, neurofibromia prone kindred, e102

Individual and family characteristics associated with protein truncating BRCA1 and BRCA2 mutations in an Ontario population based series from the Cooperative Family Registry for Breast Cancer Studies, e91

Neuronal migration defect in a BRCA1 gene carrier: possible focal nullisomy?, e24

Prevalence of family histories of breast cancer in the general population and the incidence of related seeking of health care, e83

Sensitivity of BRCA1/2 mutation testing in 466 breast/ovarian cancer families, e107

breast neoplasms, Little value from including cousins in individual risk assessment of hereditary breast cancer: a simulation study, e25

breast/ovarian cancer, BRCA1 c.2845insA is a recurring mutation with a founder effect in Singapore Malay women with early onset breast/ovarian cancer, e117

bronchiectasis, High frequency of T9 and CFTR mutations in children with idiopathic bronchiectasis, 530

C1 inhibitor, The effect of sequence variations within the coding region of the C1 inhibitor gene on disease expression and protein function in families with hereditary angio-oedema, e114

C282Y mutation, Haemochromatosis (HFE) gene C282Y mutation and the risk of coronary artery disease and myocardial infarction: a study in 1279 patients undergoing coronary angiography, e58

C3, Haemolytic uraemic syndrome and mutations of the factor H gene: a registry-based study of German speaking countries, 676

C7orf10, Genomic characterisation of C7orf10 in Silver-Russell syndrome patients, e44

CAG repeats in AIB1, Somatic instability of the DNA sequences encoding the polymorphic polyglutamine tract of the AIB1 gene, 885

cancer, Analysis of the Bir–Hogg–Dubé (BHD) tumour suppressor gene in sporadic renal cell carcinoma and colorectal cancer, 820

cancer genetics, Chromosome 2 (2p16) abnormalities in Carney complex tumours, 268

RNASEL mutations in hereditary prostate cancer, e21

cancer predisposition, Cancer risk in 348 French MSH2 or MLH1 gene carriers, 208

cancer screening, Cancer surveillance is often inadequate in people at high risk for colorectal cancer, e54

capillary malformation, Autosomal dominant hereditary benign telangiectasia maps to the CMC1 locus for capillary malformation on chromosome 5q14, 849

carbonic anhydrase II, A phenocopy of CaII deficiency: a novel genetic explanation for inherited infantile osteopetrosis with distal renal tubular acidosis, 115

carbonic anhydrases, Expression of cell surface transmembrane carbonic anhydrase genes CA9 and CA12 in the human eye: overexpression of CA12 (CA XII) in glaucoma, 257

carboxypeptidase A (CPA), The imprinted region on human chromosome 7q32 extends to the carboxypeptidase A gene cluster: an imprinted candidate for Silver-Russell syndrome, 249

CARD15 SNPs, Linkage of ulcerative colitis to the pericentromeric region of chromosome 16 in Italian inflammatory bowel disease families is independent of the presence of common CARD15 mutations, 837

cardiomyopathy, Expanding the phenotype of U1NA mutations in dilated cardiomyopathy and functional consequences of these mutations, 560

carrier detection, An alternative to FISH: detecting deletion and duplication carriers within 24 hours, e113

carrier females, Clinical presentation in female patients with Fabry disease, e38

carrier frequency, A Tyr368His RPE65 founder mutation is associated with variable expression and progression of early onset retinal dystrophy in 10 families of a genetically isolated population, 709

carrier risk, Carrier risk status changes resulting from mutation testing in hereditary non-polyposis colorectal cancer and hereditary breast-ovarian cancer, 591

carrier screening, Genetic information but not termination: pregnant women’s attitudes and willingness to pay for carrier screening for deafness genes, e60

cartilage oligomeric matrix protein, A recurrent R718W mutation in COMP results in multiple epiphyseal dysplasia with mild myopathy: clinical and pathogenetic overlap with collagen IX mutations, 942

cartilage-hair hypoplasia, Short-limbed dwarfism with bowing, combined immune deficiency, and late onset aplastic anaemia caused by novel mutations in the BMPR gene, 761

cat eye syndrome, Partial trisomy of chromosome 22 resulting from an interstitial duplication of 22q11.2 in a child with typical cat eye syndrome, e62

cataracts, Genotype-phenotype correlations for cataracts in neurofibromatosis 2, 758

CD14, Association of the CD14 gene –159C polymorphism with progression of IgA nephropathy, 104

Promoter polymorphisms of the CD14 gene in Italian patients with coeliac disease, e108

CDH1, A novel germline mutation in the MET extracellular domain in a Korean patient with the diffuse type of familial gastric cancer, e97

CDSN, Haplotype analysis of distantly related populations implicates carnoesomesin in porosiriosis susceptibility, 447

central nervous system disease, Hereditary xanthinuria type II associated with mental delay, autism, cortical renal cysts, nephrocalcinosis, osteopenia, and hair and teeth defects, e121

centromere specific multicolour FISH (cenM FISH), Partial hexasyzy 15pter–>15q13 including SNRPN and D15S10: first molecular cytogenetically proven case report, e28

cerebellar ataxia, Hypogonadotrophic hypogonadism, short stature, cerebellar ataxia, rod-cone retinal dystrophy, and hypersegmented neutrophils: a novel disorder or a new variant of Boucher-Neuhauer syndrome?, e2

cerebellar atrophy, Progressive cerebellar-cerebral atrophy: a new syndrome with microcephaly, mental retardation, and quadriplegia, e96

Cerebellum, Kozak syndrome: a novel degenerative disorder of the basal ganglia and cerebellum, 543

Mutations in the oligophrenin-1 gene (OPHN1) cause X linked congenital cerebellar hypoplasia, 441

cerebral cortex, A novel locus for autosomal recessive primary microcephaly (MCPH6) maps to 13q12.2, 540

Transcript analysis of the cystic fibrosis splicing mutation 1525-1G>A shows use of multiple alternative splicing sites and suggests a putative role of exonic splicing enhancers, e88

CFTR, High frequency of T9 and CFTR mutations in children with idiopathic bronchiectasis, 530
CGH, Identification of recurrent regions of chromosome loss and gain in vestibular schwannomas using comparative genomic hybridisation, 802

Charcot-Marie-Tooth disease, Phenotypic and genetic exploration of severe demyelinating and secondary axonal neuropathies resulting from GDAP1 nonsense and splicing mutations, e87

CHEK2, CHEK2 1100delC and colorectal cancer, e110

child, Melatonin supplementation for severe and intractable sleep disturbance in young people with genetically determined developmental disabilities: short review and commentary, 793

cholastasis, A second heterozygous MDR3 nonsense mutation associated with intrahepatic cholastasis of pregnancy, e32 ABCB4 gene sequence variation in women with intrahepatic cholastasis of pregnancy, e70

chondrodysplasia punctata, Greenberg dysplasia (HEM) and lethal X linked dominant Conrad-Hünermann chondrodysplasia punctata (CDXP2): presentation of two cases with overlapping phenotype, e129

chromosome, Telomeres: a diagnosis at the end of the chromosomes, 385

chromosome 14, Comprehensive microsatellite marker analysis contradicts previous report of segmental maternal heterodisomy of chromosome 14, e26

Exclusion of maternal uniparental disomy of chromosome 14 in patients referred for Prader-Willi syndrome using a multiplex methylation polymerase chain reaction assay, e46

Exclusion of maternal uniparental disomy of chromosome 14 in patients referred for Prader-Willi syndrome using a multiplex methylation polymerase chain reaction assay, e66

chromosome 14q, Molecular characterisation of a 3.5 Mb interstitial 14q deletion in a child with several phenotypic anomalies, e47

chromosome 15, Angelman syndrome: a review of the clinical and genetic aspects, 87

Chromosome 15 maternal uniparental disomy and psychosis in Prader-Willi syndrome, 72

Exclusion of maternal uniparental disomy of chromosome 14 in patients referred for Prader-Willi syndrome using a multiplex methylation polymerase chain reaction assay, e46

Identification of a locus for type I punctate palmoplantar keratoderma on chromosome 15q22-q24, 872

chromosome 15q11–13, Death in adults with Prader-Willi syndrome may be correlated with maternal uniparental disomy, e63

chromosome 17q25.3, Homozygosity mapping of a Desbuquois dysplasia locus to chromosome 17q25.3, 282

chromosome 19q13.4, Genetic refinement and physical mapping of a biparental complete hydantoinidrome locus on chromosome 19q13.4.3, e95

chromosome 22, Linkage and linkage disequilibrium searched for between non-syndromic cleft palate and four candidate loci, 464

Neurofibromatosis 2 in a patient with a de novo balanced reciprocal translocation 46,X(X;22)(p11.2;q11.2), 682

chromosome 22q11.2, Partial trisomy of chromosome 22 resulting from an interstitial duplication of 22q11.2 in a child with typical cat eye syndrome, e62

chromosome breakpoint, Array painting: a method for the rapid analysis of aberrant chromosomes using DNA microarrays, 664

chromosome deletion, Unusual cognitive and behavioural profile in a Williams syndrome patient with atypical 7q11.23 deletion, 526

chromosome imbalance, Distal trisomy 6p and 20q owing to the concurrent transposition of distal 6p and 20q to the 22q telomere: a genomic polymorphism?, e94

chromosome instability, Fanconi anaemia, 1

chromosome inversion, A novel pericentric inversion of chromosome 3 cosegregates with a developmental-behavioural phenotype, e15

Disruption of a novel member of a sodium/hydrogen exchanger family and DOCK3 is associated with an attention deficit hyperactivity disorder-like phenotype, 733

chromosome rearrangement, Array painting: a method for the rapid analysis of aberrant chromosomes using DNA microarrays, 664

chronic progressive external ophthalmoplegia, Characterisation of repeat and palindromic elements in patients harbouring single deletions of mitochondrial DNA, e86

ciliary abnormalities, RPS19 mutation associated with retinitis pigmentosa, impaired hearing, and sinorespiratory infections, 609

circadian rhythm, β-adrenergic antagonists and melatonin reset the clock and restore sleep in a circadian disorder, Smith-Magenis syndrome, 74

cleft lip, Maternal 677CT/1298AC genotype of the MTHFR gene as a risk factor for cleft lip, e64

cleft palate, Complete sequencing shows a role for MSX 1 in non-syndromic cleft lip and palate, 399

cleft palate, Linkage and linkage disequilibrium searched for between non-syndromic cleft palate and four candidate loci, 464

Maternal 677CT/1298AC genotype of the MTHFR gene as a risk factor for cleft lip, e64

clinical management, Fanconi anaemia, 1

clinical variability, Mild brachydactyly type A1 maps to chromosome 2q35-q36 and is caused by a novel IFIH mutation in a three generation family, 132

dub foot, Recessive multiple epiphyseal dysplasia (rmED): phenotype delineation in eighteen homozygotes for DTEDST mutation R279W, 65

CMC1, Autosomal dominant hereditary benign telangiectasia maps to the CMC1 locus for capillary malformation on chromosome 5q14, 849

CMT, Diagnosis of gene dosage alterations at the PMP22 gene using NPH, e123

CMTA4, Phenotypic and genetic exploration of severe demyelinating and secondary axonal neuropathies resulting from GDAP1 nonsense and splicing mutations, e87

COCH, Subcellular localisation, secretion, and post-translational processing of normal cochlin, and of mutants causing the sensorineural deafness and vestibular disorder, DFNA9, 479

cochlin, Subcellular localisation, secretion, and post-translational processing of normal cochlin, and of mutants causing the sensorineural deafness and vestibular disorder, DFNA9, 479

COD1, A new genetic locus for X linked progressive cone-rod dystrophy, 418

COD2, A new genetic locus for X linked progressive cone-rod dystrophy, 418

coliac disease, Polymorphism of the CD14 gene in Italian patients with coeliac disease, e108

coagulation, Functional testing for cognitive functioning in female carriers of the fragile X syndrome using hair root analysis, 377

cognitive profile, Unusual cognitive and behavioural profile in a Williams syndrome patient with atypical 7q11.23 deletion, 526

Cohen syndrome, Diagnostic criteria, clinical characteristics, and natural history of Cohen syndrome, 233

COL10A1, Genetic changes in the DNA components of RNase MRp and RNase P in Schmid metaphyseal chondrodysplasia, 741

collagen IX, A recurrent R718W mutation in COMP results in multiple epiphyseal dysplasia with mild myopathy: clinical and pathogenetic overlap with collagen IX mutations, 942

colloidomy, Experience of discharge from colonoayoscopy of mutation negative HNPCC family members, e55

colorectal, Analysis of the Birt–Hogg–Dubre´(BHD) tumour suppressor gene in sporadic renal cell carcinoma and colorectal cancer, 820

colorectal cancer, CHEK2 1100delC and colorectal cancer, e110

Mutation and LOH analysis of AC02 in colorectal cancer: no evidence of biallelic genetic inactivation, e73

Mutations of the Birt-Hogg-Dubre´(BHD) gene in sporadic colorectal carcinomas and colorectal carcinoma cell lines with microsatellite instability, 364

colorectal tumours, Alterations of the Birt-Hogg-Dubre´(BHD) gene in sporadic colorectal tumours, 511

compensatory reversion, In vivo reversion to normal of inherited mutations in humans, 721

complement factor H, Haemolytic uraemic syndrome and mutations of the factor H gene: a registry-based study of German speaking countries, 676

complex chromosomal rearrangements, Multicolour FISH fine mapping unravels an insertion as a complex chromosomal rearrangement involving six breakpoints and a 5.89 Mb large deletion, e60

complement disease, Intrebreeding and risk of late onset complex disease, 925

complex trait, Confirmation linkage study in support of the X chromosome harbouring a QTL underlying human height variation, 825

complex traits, New approaches to investigating heterogeneity in complex traits, 553

complex translocation, Deletion in the ABL gene resulting from a meiotic recombination of a maternal (3;22;9)(q22;q12;q34.1) translocation, e66

congenital disorder, A novel pericentric inversion of chromosome 3 cosegregates with a developmental-behavioural phenotype, e15

PTEN
CYP11B2
Acrocapitofemoral dysplasia: an autosomal
A common variant in the coronary artery disease, canine tricuspid valve malformation, a model congenital heart defects,
corneodesmosin, Haplotype analysis of distantly related populations consanguinity,
Mutational analysis of congenital melanocytic naevi, congenital cerulean cataract,
Homozygosity mapping of a gene for arterial Contribution of connexin26 (connexin26, congenital nuclear cataract, Possible founder effect of rapsyn congenital myasthenic syndromes, congenital heart disease, An alternative to FISH: detecting deletion and copy number changes, e37
PTPN11
Correlation between High incidence of the R276X
e89
genes in the pathogenesis of autosomal recessive retinitis (HNSCC),
Indonesian and European patients, e90
Evidence of autosomal dominant Leber congenital amaurosis (LCA) Study of the involvement of the,
Deletion in the ABL
deletion 22q13, Telomeric 22q13 deletions resulting from rings, simple mosaicism del(8p)/inv dup(8p) in a dysmorphic female infant: a
Mutation in an Iranian family with progressive autosomal dominant congenital nuclear cataract, e124
connective tissue, Homozygosity mapping of a gene for arterial
tortuosity syndrome to chromosome 20q13, 747
connexin26, Contribution of connexin26 (GJB2) mutations and founder effect to non-syndromic hearing loss in India, e68
Uniparental disomy of chromosome 13q causing homozygosity for the 35delIG mutation in the gene encoding connexin26 (GJB2) results in pringleal hearing impairment in two unrelated Spanish patients, 636
consonantiology, Inbreeding and risk of late onset complex disease, 925
copper disorders, A copper treatable Menkes disease mutation associated with defective trafficking of a functional Menkes copper ATPase, 290
copy number changes, An alternative to FISH: detecting deletion and duplication carriers within 24 hours, e113
corneodesmosin, Haplootype analysis of distantly related populations implicates corneodesmosin in psoriasis susceptibility, 447
coronary artery disease, Association of genetic variants in the HDL receptor, with abnormal lipids in women with coronary artery disease, 453
Haemochromatosis (HFE) gene C282Y mutation and the risk of coronary artery disease and myocardial infarction: a study in 1279 patients undergoing coronary angiography, e58
coronary heart disease, A common variant in the ABCA1 gene is associated with a lower risk for premature coronary heart disease in familial hypercholesterolaemia, 163
Costello syndrome, Is growth hormone treatment beneficial or harmful in Costello syndrome?, e74
Is the locus for Costello syndrome on 11p?, 469
Studies on the pathogenesis of Costello syndrome, e37
Cowden syndrome, PTEN hamartoma tumour syndrome: variability of an entity, e111
Cowden’s disease, De novo germline PTEN mutation in a man with Lhermitte-Duclos disease which arose on the paternal chromosome and was transmitted to his child with polydactyly and Wormian bones, e92
CpG island, Differential targets of CpG island hypermethylation in primary and metastatic head and neck squamous cell carcinoma (HNSCC), 25
CRB1, Study of the involvement of the RGR, CRPB1, and CRB1 genes in the pathogenesis of autosomal recessive retinitis pigmentosa, e89
Cree encephalitis, Cree encephalitis is allelic with Aicardi-Goutières syndrome: implications for the pathogenesis of disorders of interferon alpha metabolism, 183
CRX, Evidence of autosomal dominant leber congenital amaurosis (LCA) underlain by a CRX heterozygous null allele, e90
CYP11B2, Gender specific association of aldosterone synthase gene polymorphism with renal survival in patients with IgA nephropathy, 372
CYP1B1, CYP1B1 gene analysis in primary congenital glaucoma in Indonesian and European patients, e9
CYP21A2, Mapping of a de novo unequal crossover causing a deletion of the steroid 21-hydroxylase (CYP21A2) gene and a non-functional hybrid tenasin-X (TNXB) gene, e53
cystic fibrosis, A generic screening programme for Tay-Sachs disease and cystic fibrosis for Australian Jewish high school students, e45
Transcript analysis of the cystic fibrosis splicing mutation 1525-1G>A shows use of multiple alternative splicing sites and suggests a putative role of exonic splicing enhancers, e88
chytocrome P4501B1, CYP1B1 gene analysis in primary congenital glaucoma in Indonesian and European patients, e9
de novo mutation, De novo germline PTEN mutation in a man with Lhermitte-Duclos disease which arose on the paternal chromosome and was transmitted to his child with polydactyly and Wormian bones, e92
defaith, A mutation in the gamma actin 1 (ACTG1) gene causes autosomal dominant hearing loss (DFNA3/20/26), 879
Contribution of connexin26 (GJB2) mutations and founder effect to non-syndromic hearing loss in India, e68
Distinctive audiometric profile associated with DFNB21 alleles of TECTA, 360
Genetic homogeneity and phenotypic variability among Ashkenazi Jews with Usher syndrome type III, 767
Myhr syndrome: new reports, review, and differential diagnosis, 546
Origins and frequencies of SLC26A4 (PDS) mutations in east and south Asians: global implications for the epidemiology of deafness, 242
Pathogenic mutations but not polymorphisms in congenital and childhood onset autosomal recessive deafness disrupt the proteolytic activity of TMPRSS3, 625
defaith and vestibular disorder, Subcellular localisation, secretion, and post-translational processing of normal cochlin, and of mutants causing the sensorineural deafness and vestibular disorder, DFNA9, 479
defaith genes, Genetic information but not termination: pregnant women’s attitudes and willingness to pay for carrier screening for deafness genes, e80
de(16q24-34), Multicolour FISH fine mapping unravels an insertion as a complex chromosomal rearrangement involving six breakpoints and a 5.89 Mb large deletion, e60
deletion, Death in adults with Prader-Willi syndrome may be correlated with maternal uniparental disomy, e63
Deletion in the ABL1 gene resulting from a meiotic recombination of a maternal 3;22(q11-22;q11-22) translocation, e6
Molecular characterisation of a 3.5 Mb interstitial 14q deletion in a child with several phenotypical anomalies, e47
Molecular characterisation of the 22q13 deletion syndrome supports the role of haploinsufficiency of SHANK3/PROSAP2 in the major neurological symptoms, 575
Masosicism del(8p)/inv dup(8p) in a dysmorphic female infant: a mosaic formed by a meiotic error at the 8p OR gene and an independent terminal deletion event, 993
Multiple exon skipping and RNA circularisation contribute to the severe phenotypic expression of exon 5 dystrophin deletion, e100
Prader-Willi syndrome: the psychopathological phenotype in uniparental disomy, e112
The severe form of type I hyperprolinemia results from homozygous inactivation of the PRODH gene, e7
Using case study comparisons to explore genotype-phenotype correlations in Williams-Beuren syndrome, 136
deletion 22q13, Telomeric 22q13 deletions resulting from rings, simple deletions, and translocations: cytogenetic, molecular, and clinical analyses of 92 new observations, 690
denaturing high performance liquid chromatography, Association of single nucleotide polymorphisms in the oxidised LDL receptor 1 (OR1) gene in patients with acute myocardial infarction, 933
Comparison of fluorescent SSCP and denaturing HPLC analysis with direct sequencing for mutation screening in hypertrophic cardiomyopathy, e59
Disubquois dysplasia, Homozygosity mapping of a Disubquois dysplasia locus to chromosome 17q25.3, 282
development, Gene expression signatures identify novel regulatory pathways during murine lung development: implications for lung tumorigenesis, 408
Further support for digenic inheritance in Bardet-Wolcott-Rallison syndrome: pathogenic insights into Telomeres: a diagnosis at the end of the chromosomes, DNA diagnosis, disability, Melatonin supplementation for severe and intractable sleep Absence of constitutional DNA damage, DLL3 A novel germline mutation in the DHPLC, DFNB8/DFNB10, Origins and frequencies of DFNB4, Uniparental disomy of chromosome 13q causing homozygosity DFNB1, DFNA9, DFNA10, a novel locus for autosomal dominant non-syndromic hearing loss loci (DFNA9/43) to chromosome 2p12, 278, DFNA9, DFNA9, a novel locus for autosomal dominant non-syndromic hearing loss, maps proximal to DFNA7/DFNM1 region on chromosome 1q21-q23, 832, DFNA9, Subcellular localisation, secretion, and post-translational processing of normal cacholin, and of mutants causing the sensoryneural deafness and vestibular disorder, DFNA9, 479, DFNB1, Uniparental disomy of chromosome 13q causing homozygosity for the 35SdeG mutation in the gene encoding connexin26 (GJB2) results in prelingual hearing impairment in two unrelated Spanish patients, 630, DFNB4, Origins and frequencies of SLCO2A4 (PDS) mutations in east and south Asias: global implications for the epidemiology of deafness, 242, DFNB8/DFNB10, Pathogenic mutations but not polymorphisms in congenital and childhood onset autosomal recessive deafness disrupt the proteolytic activity of TMFRSS3, 629, DHPLC, A novel germline mutation in the MET extracellular domain in a Korean patient with the diffuse type of familial gastric cancer, 697, diabetes mellitus, Wolcott-Rallison syndrome: pathogenic insights into neonatal diabetes from new mutation and expression studies of EIF2AK3, 685, diagnostics, Telomeres: a diagnosis at the end of the chromosomes, 385, digenic inheritance, Further support for digenic inheritance in Bardet-Biedl syndrome, 104, disability, Melatonin supplementation for severe and intractable sleep disturbance in young people with genetically determined developmental disabilities: short review and commentary, 793, discordance, Appraisal of genetic and epigenetic congruity of a monozygotic twin discordant for schizophrenia, e16, DLD3, Novel mutations in DLD3, a somatogenes encoding a ligand for the Notch signalling pathway, cause a consistent pattern of abnormal vertebral segmentation in spondylohepatostatis, 333, DNA damage, Absence of constitutional H2AX gene mutations in 101 hereditary breast cancer families, e51, DNA diagnosis, The use of genotype-phenotype correlations in mutation analysis for the long QT syndrome, 141, DNA double-strand break repair, Mutation screening of Mre11 complex genes: indication of RAD50 involvement in breast and ovarian cancer susceptibility, e131, DNA methylation, Differential targets of Cpg island hypermethylation in primary and metastatic head and neck squamous cell carcinoma (HNSCC), 25, DNA microarrays, Array painting: a method for the rapid analysis of aberrant chromosomes using DNA microarrays, 664, DNA repair, Fancanemia, 1, dominant transmission, Molecular study of three cases of odontohypophosphatasia resulting from heterozygosity for mutations in the tissue non-specific alkaline phosphatase gene, 605, DTDST, Recessive multiple epiphysial dysplasia (mED): phenotype delineation in eighteen homozygotes for DTDST mutation R279W, 65, Duchenne muscular dysrophy, An alternative to FISH: detecting deletion and duplication carriers within 24 hours, e113, duplication, Analophid de novo marker chromosome inv dup(9)(q28pter) with neocentromere in a dysmorphic and developmentally retarded girl, e27, The metabotropic glutamate receptor 8 gene at 7q31; partial duplication and possible association with autism, e42, dysmorphology, Rapp-Hodgkin and AEC syndromes due to a new frameshift mutation in the TP63 gene, e133, dysplastic naevi mutation, Mutational analysis of N-ras, p53, CDKN2A (p16), p14, CDK4, and MC1R genes in human dysplastic melanocytic naevi, e14, dystonia, Neuroferritinopathy in a French family with late onset dominant dystonia, e69, dystrophin, A complex deletion-inversion-deletion event results in a chimeric IL1RAPL1-dystrophin transcript and a contiguous gene deletion syndrome, 127, Multiple exon skipping and RNA circularisation contribute to the severe phenotypic expression of exon 5 dystrophin deletion, e100, dystrophin-glycoprotein complex, Genotype-phenotype correlations in 35 Brazilian families with sarcoglycanopathies including the description of three novel mutations, e12, dystrophy, The genetics of inherited macular dystrophies, 641, DYSX3, A genome scan for developmental dyslexia confirms linkage to chromosome 2p11 and suggests a new locus on 7q32, 340, early diagnosis, Cancer risk in 348 French MSH2 or MLH1 gene carriers, 208, early onset retinal dystrophy, A Ty368His RIP65 founder mutation is associated with variable expression and progression of early onset retinal dystrophy in 10 families of a genetically isolated population, 709, early-onset, BRCA1 c.2845insA is a recurring mutation with a founder effect in Singapore Malay women with early onset breast/ovarian cancer, e117, ectodermal dysplasia, Hereditary xanthinuria type II associated with mental delay, autism, cortical renal cysts, nephrolcalcinosis, osteopenia, and hair and teeth defects, e121, EEC syndrome, P63 mutations are not a major cause of non-syndromic split hand/foot malformation, 55, Ehlers-Danlos syndrome, Mapping of a de novo unequal crossover causing a deletion of the steroid 21-hydroxylase (CYP21A2) gene and a non-functional hybrid tenasin-X (TNXB) gene, e53, Emery-Dreifuss muscular dystrophy, Mutation analysis of the lamin A/C gene (LMNA) variants with different cardiovascular phenotypes, e132, EN2, No association between the EN2 gene and autistic disorder, e6, enamel pitting, Novel ENAM mutation responsible for autosomal recessive amelogenesis imperfecta and localised enamel defects, 900, enamelin, Novel ENAM mutation responsible for autosomal recessive amelogenesis imperfecta and localised enamel defects, 900, endoglin, Hereditary haemorrhagic telangiectasia: a questionnaire based study to delineate the different phenotypes caused by endoglin and ALK1 mutations, 585, epigenetics, Silencing of CDKN1C (p57KIP2) is associated with hypermethylation at KDM8K1 in Beckwith-Wiedemann syndrome, 797, epilepsy, Genetic mapping of a new Lafora progressive myoclonus epilepsy locus (EPM2B) on 6p22, 671, essential hypertension, Evidence for linkage and association of the markers near the LPL gene with hypertension in Chinese families, e57, expression signatures, Gene expression signatures identify novel regulatory pathways during murine lung development: implications for lung tumorigenesis, 408, eye humour, Expression of cell surface transmembrane carbonic anhydrase genes CA9 and CA12 in the human eye: overexpression of CA12 (CAXII) in glaucoma, 257, Fabry disease, Clinical presentation in female patients with Fabry disease, e38, Fabry disease: molecular studies in Italian patients and X inactivation analysis in manifesting carriers, e103, FAC74, A third MRX family (MRX68) is the result of mutation in the long chain fatty acid-CoA ligase 4 (FACL4) gene: proposal of a rapid enzymatic assay for screening mentally retarded patients, 11, false negative FISH result, Partial deletion of the critical 1.5 Mb interval in Williams-Beuren syndrome, e99, familial, Familial vestibulocerebellar disorder maps to chromosome 13q31-33: a new nystagmus gene, 37, familial adenomatous polyposis, Cancer surveillance is often inadequate in people at high risk for colorectal cancer, e54, familial breast cancer, Women’s preferences and consultants’ communication of risk in consultations about familial breast cancer: impact on patient outcomes, e56, familial hypercholesterolaemia, A common variant in the ABCA1 gene is associated with a lower risk for premature coronary heart disease in familial hypercholesterolaemia, 163, Quality of life in a family based genetic cascade screening programme for familial hypercholesterolaemia: a longitudinal study among participants, e3, familial Sotos syndrome, Familial Sotos syndrome is caused by a novel mutation in the IL1RAPL1 gene, 127, Familial breast cancer, Women’s preferences and consultants’ communication of risk in consultations about familial breast cancer: impact on patient outcomes, e56, familial hypercholesterolaemia, A common variant in the ABCA1 gene is associated with a lower risk for premature coronary heart disease in familial hypercholesterolaemia, 163, Quality of life in a family based genetic cascade screening programme for familial hypercholesterolaemia: a longitudinal study among participants, e3, familial Sotos syndrome, Familial Sotos syndrome is caused by a novel mutation in the IL1RAPL1 gene, 127.
familial tumours, Hereditary phaeochromocytomas and paragangliomas: a study of five susceptibility genes, e75

family, Evidence for linkage and association of the markers near the LPL gene with hypertension in Chinese families, e57

family history, Prevalence of family histories of breast cancer in the general population and the incidence of related seeking of health care, e83

family studies, The effect of sequence variations within the coding region of the C1 inhibitor gene on disease expression and protein function in families with hereditary angio-oedema, e114

Fanconi anaemia, Fanconi anaemia, 1

fetal hypokinesia, Early onset asymmetrical intrauterine growth retardation with fetal hypokinesia and variable expression of acral and genitourinary malformations: a new lethal MCA syndrome, e1

FGFR3, Studies on the pathogenesis of Costello syndrome, e37

fibrillin-1 gene, In frame fibrillin-1 gene deletion in autosomal dominant Weill-Marchesani syndrome, 34

fibrocystic, Molecular pathology and genetics of congenital hepatorenal fibrocystic syndromes, 311

FISH, Distal trisomy 6p and 20q owing to the concurrent transposition of distal 6p and 20q to the 22q telomere: a genomic polymorphism?, e94

SHOX mutations detected by FISH and direct sequencing in patients with short stature, e11

FMRF expression, FMRF expression studies in blood and hair roots in a fragile X family with methylation mosaics, 535

FMRF test, Predictive testing for cognitive functioning in female carriers of the fragile X syndrome using hair root analysis, 377

focal nullisomy, Neuronal migration defect in a BRCA1 gene carrier: possible focal nullisomy?, e24

founder, BRCA1 c.2845A>AA is a recurring mutation with a founder effect in Singapore Malay women with early onset breast/ovarian cancer, e117

founder effect, Contribution of connexin26 (GJB2) mutations and founder effect to non-syndromic hearing loss in India, e68

founder mutations, The RNASEL 47delAA AGG allele and prostate cancer in Ashkenazi Jewish men, e22

FOXP2, A genome scan for developmental dyslexia confirms linkage to chromosome 2p11 and suggests a new locus on 7q32, 340

fragile X syndrome, FMRF expression studies in blood and hair roots in a fragile X family with methylation mosaics, 535

Modulation of methylation in the FMRF1 promoter region after long term treatment with L-carnitine and acetyl-L-carnitine, 1

Predictive testing for cognitive functioning in female carriers of the fragile X syndrome using hair root analysis, 377

Fukutan, A homozygous nonsense mutation in the Fukutan gene causes a Walker-Warburg syndrome phenotype, 845

fumarase, No fumarate hydratase (FH) mutations in hereditary prostate cancer, e19

functional analysis, Heterogeneity in residual function of MeCP2 carrying missense mutations in the methyl CpG binding domain, 487

G13513A, The mitochondrial DNA G13513A MELAS mutation in the mitochondrial DNA G13513A MELAS mutation causes autosomal dominant congenital cerebral cataracts, 267

Identification of a mutation in the Indian Hedgehog (Hh) gene causing brachydyphactyly type A1 and evidence for a third locus, 42

In frame fibrillin-1 gene deletion in autosomal dominant Weill-Marchesani syndrome, 34

Mutational and gross deletion study of the MEF2 gene and correlation with clinical features in Spanish patients, e72

Novel ENAM mutation responsible for autosomal recessive amelogenesis imperfecta and localised enamel defects, 900

gene discovery, Disruption of a novel member of a sodium/hydrogen exchanger family and DOCK3 is associated with an attention deficit hyperactivity disorder-like phenotype, 733

gene dosage, Diagnosis of gene dosage alterations at the PMP22 gene using MAPH, e123

gene expression, Microarray analysis of gene/transcript expression in Prader-Willi syndrome: deletion versus UPD, 568

Wolcott-Rallison syndrome: pathogenic insights into neonatal diabetes from new mutation and expression studies of EIF2AK3, 685

gene mutation, Novel sarcoglycan gene mutations in a large cohort of Italian patients, e67

gene promoter, Single nucleotide polymorphic alleles in the 5’ region of the RET proto-oncogene define a risk haplotype in Hirschsprung’s disease, 714

gene rearrangement, Application of haplotype pair analysis for the identification of hemizygous loci, 346

gene silencing, Silencing of CDKN1C (p53XIP) is associated with hypomethylation at K-VDM1 in Beckwith-Wiedemann syndrome, 797

gene-infectious agent interactions, Does apolipoprotein E polymorphism influence susceptibility to malaria?, 348

gene dosage, Prevalence of family histories of breast cancer in the general population and the incidence of related seeking of health care, e83

genes, Association of genetic variants of the HDL receptor, SR-B1, with abnormal lipids in women with coronary artery disease, 453

gene counselling, Little value from including cousins in individual risk assessment of hereditary breast cancer: a simulation study, e25

Mutation analysis in the MECP2 gene and gene counselling for Rett syndrome, 380

Non-random transmission of mutant alleles to female offspring of BRCA1 carriers in Poland, 719

gene-centric disease, A copper treatable Menkes disease mutation associated with defective trafficking of a functional Menkes copper ATPase, 290

Genetic heterogeneity, Gamma-D crystallin gene (CRYGD) mutation causes autosomal dominant congenital cerebral cataracts, 262

identification of hemizygous loci, 340

Mutational and gross deletion study of the MEF2 gene and correlation with clinical features in Spanish patients, e72

Novel ENAM mutation responsible for autosomal recessive amelogenesis imperfecta and localised enamel defects, 900

gene isolate, A Thr368His RPE65 founder mutation is associated with variable expression and progression of early onset retinal dystrophy in 10 families of a genetically isolated population, 709

Inbreeding and risk of late onset complex disease, 925

gene linkage, A genome scan for developmental dyslexia confirms linkage to chromosome 2p11 and suggests a new locus on 7q32, 340

gene-centric screening, Quality of life in a family based genetic cascade screening programme for familial hypercholesterolaemia: a longitudinal study among participants, e3

gene testing, Cancer surveillance is often inadequate in people at high risk for colorectal cancer, e54

gene variant, Effect of the peroxisome proliferator activated receptor-γ gene PPARγ2 variant on body mass index: a meta-analysis, 773

gene-centric, A second heterozygous MDR3 nonsense mutation associated with intrahepatic cholestasis of pregnancy, e32

Canine tricuspid valve malformation, a model of human Ebstein anomaly, maps to dog chromosome 9, 320

Genetic study of transthyretin amyloid neuropathies: carrier risks among French and Portuguese families, e120

Melatonin supplementation for severe and intractable sleep disturbance in young people with genetically determined developmental disabilities: short review and commentary, 793

The genetics of inherited macular dystrophies, 641

genetinurinary malformations, Early onset asymmetrical intrauterine growth retardation with fetal hypokinesia and variable expression of acral and genetinurinary malformations: a new lethal MCA syndrome, e1

genetic imprinting, Angelman syndrome: a review of the clinical and genetic aspects, 87

Genetic refinement and physical mapping of a biparental complete hydatidiform mole locus on chromosome 19q13.4., e95
The imprinted region on human chromosome 7q32 extends to the carboxypeptidase A gene cluster: an imprinted candidate for Silver-Russell syndrome, 249

**genomic rearrangements**, Genomic rearrangements of MSH6 contribute to the genetic predisposition in suspected hereditary non-polyposis colorectal cancer syndrome, 250

**genomic variants**, Searching for genomic variants in the MESTIT1 transcript in Silver-Russell syndrome patients, e65

**genotype-phenotype**, Genotype-phenotype correlations for cataracts in neurofibromatosis 2, 758

High frequency of novel germline mutations in the VHL gene in the heterogeneous population of Brazil, e31

**genotype-phenotype correlation**, Distinctive audiometric profile associated with DFNB2 alleles of TECTA, 360

Genotype-phenotype correlations in 35 Brazilian families with sarcoglycanopathies including the description of three novel mutations, e12

Independent NF1 mutations in two large families with spinal neurofibromatosis, 122

Multicolour FISH fine mapping unravels an insertion as a complex chromosomal rearrangement involving six breakpoints and a 5.89 Mb large deletion, e60

Partial deletion of the critical 1.5 Mbp interval in Williams-Beuren syndrome, e99

Spectrum of NSD1 mutations in Sotos and Weaver syndromes, 436

The use of genotype-phenotype correlations in mutation analysis for the long QT syndrome, 141

**genotype-phenotype relationship**, Evaluation of genotype-phenotype correlations in neurofibromatosis type 1, e109

**germ cells**, Y chromosome haplotypes and testicular cancer in the German population, e20

**germ line mutation**, Cancer risk in 348 French MSH2 or MLH1 gene carriers, 208

γ-crystallin, Gamma-D crystallin gene (CRYGD) mutation causes autosomal dominant congenital cataract, 262

GLA8, A novel GLA8 mutation in an Iranian family with progressive autosomal dominant congenital nuclear cataract, e124

**GJB2**, Contribution of connexin26 (GJB2) mutations and founder effect to non-syndromic hearing loss in India, e68

**GLA deficiency**, Fabry disease: molecular studies in Italian patients and X inactivation analysis in manifesting carriers, e103

**glaucoma**, Expression of cell surface transmembrane carbonic anhydrase genes CA9 and CA12 in the human eye: overexpression of CA12 (CAIXII) in glaucoma, 257

Nail patella syndrome: a review of the phenotype aided by developmental biology, 153

Prevalence of optineurin sequence variants in adult primary open angle glaucoma: implications for diagnostic testing, e101

The M98K variant of the OPTINEURIN (OPTN) gene modifies initial intraocular pressure in patients with primary open angle glaucoma, 842

**glomerulonephritis**, Association of the CD14 gene –159C polymorphism with progression of IgA nephropathy, 104

GLRA1, A novel mutation (R218Q) at the boundary between the N-terminal and the first transmembrane domain of the glycine receptor in a case of sporadic hyperkplexia, e71

**Glutathione transferase**, Patient with bilateral periventricular nodular heterotopia and polymicrogyria with apparently balanced reciprocal translocation t(1;6)(p12;p12.2) that interrupts the manniosidase alpha, class 1A, and glutathione S-transferase A2 genes, e128

**glycerol kinase**, A complex deletion-inversion-deletion event results in a chimeric IL1RAPL1-dystrophin transcript and a contiguous gene deletion syndrome, 127

**glycine receptor**, A novel mutation (R218Q) at the boundary between the N-terminal and the first transmembrane domain of the glycine receptor in a case of sporadic hyperkplexia, e71

**gonadosomatic mosaicism**, Mitotic recombination mediated by the JIAZF1 (KIAA0160) gene causing somatic mosaicism and a new type of constitutional NF1 microdeletion in two children of a mosaic female with only few manifestations, 520

**Greenberg dysplasia**, Greenberg dysplasia (HEM) and lethal X linked dominant Conradi-Hünermann chondrodysplasia punctata (CDPX2): presentation of two cases with overlapping phenotype, e129

Greenberg/HEM skeletal dysplasia, Congenital abnormalities reported in Pelger-Huet homozgyosity as compared to Greenberg/HEM dysplasia: highly variable expression of allelic phenotypes, 937

**GRM8**, The metabotropic glutamate receptor 8 gene at 7q31: partial duplication and possible association with autism, e42

**groove hormone**, Is growth hormone treatment beneficial or harmful in Costello syndrome?, e74

**H2AX**, Absence of constitutional H2AX gene mutations in 101 hereditary breast cancer families, e51

**haem oxygenase-1**, Relationship between microsatellite polymorphism in the haem oxygenase-1 gene promoter and longevity of the normal Japanese population, 146

**haemochromatosis gene**, Haemochromatosis (HFE) gene C282Y mutation and the risk of coronary artery disease and myocardial infarction: a study in 1279 patients undergoing coronary angiography, e58

**Haemolytic uremic syndrome**, Haemolytic uremic syndrome and mutations of the factor H gene: a registry-based study of German speaking countries, 676

**hair root**, FMRF expression studies in blood and hair roots in a fragile X family with methylhydrosomal mosaics, 535

**hair roots**, Predictive testing for cognitive functioning in female carriers of the fragile X syndrome using hair root analysis, 377

**hand-foot-genital syndrome**, A novel duplication in the NOX13 gene in a family with atypical hand-foot-genital syndrome, e49

**haploinsufficiency**, Sotos syndrome and haploinsufficiency of NSD1: clinical features of intragenic mutations and submicroscopic deletions, 283

**haplotype**, A common IL-1 complex haplotype is associated with an increased risk of atopy, e66

Application of haplotype pair analysis for the identification of hemizygous loci, 346

**haplotypes**, Chinese patients with sporadic Hirschsprung’s disease are predominately represented by a single RET haplotype, e122

**haptoglobin**, Haptoglobin and its association with the HELLP syndrome, 214

**hearing**, Genetic homogeneity and phenotypic variability among Ashkenazi Jews with Usher syndrome type III, 767

**hearing impairment**, Heteroplasmy for the 1555A>G mutation in the mitochondrial 12S rRNA gene in six Spanish families with non-syndromic hearing loss, 632

Uniparental disomy of chromosome 13q causing homzygosity for the 35delG mutation in the gene encoding connexin26 (GJB2) results in prelingual hearing impairment in two unrelated Spanish patients, 636

**hearing loss**, Clinical and immunohistochemical evidence for an X linked retinitis pigmentosa syndrome with recurrent infections and hearing loss in association with an RPGR mutation, e118

Mapping of a new autosomal dominant non-syndromic hearing loss locus (DFN1A3) to chromosome 2p12, 278

RPGR mutation associated with retinitis pigmentosa, impaired hearing, and sinorespiratory infections, 609

**height**, Confirmation linkage study in support of the X chromosome harbouring a QTL underlying human height variation, 825

**HELP syndrome**, Haptoglobin and its association with the HELLP syndrome, 214

**HEM**, Greenberg dysplasia (HEM) and lethal X linked dominant Conradi-Hünermann chondrodysplasia punctata (CDP2X): presentation of two cases with overlapping phenotype, e129

**hereditary breast cancer**, The BRCA2 variant 8204G>A is a splicing mutation and results in an in frame deletion of the gene, e23

**hereditary breast-ovarian cancer**, Carrier risk status changes resulting from mutation testing in hereditary non-polyposis colorectal cancer and hereditary breast-ovarian cancer, 591

**hereditary cancer syndrome**, Demographic and phenotypic features of 70 families segregating Barrett’s oesophagus and oesophageal adenocarcinoma, 651

**hereditary haemorrhagic telangiectasia**, Hereditary haemorrhagic telangiectasia: a questionnaire based study to delineate the different phenotypes caused by endoglin and ALK1 mutations, 585

Molecular and functional analysis identifies ALK-1 as the predominant gene in the hereditary haemorrhagic telangiectasia, 865

**hereditary leiomyomatosis and renal cell cancer (HLRCC)**, No fumarate hydratase (FH) mutations in hereditary prostate cancer, e19
hereditary motor and sensory neuropathies, Phenotypic and genetic exploration of severe demyelinating and secondary axonal neuropathies resulting from GDAP1 nonsense and splicing mutations, e87

hereditary non-polyposis colorectal cancer, Cancer surveillance is often inadequate in people at high risk for colorectal cancer, e54 Carrier risk status changes resulting from mutation testing in hereditary non-polyposis colorectal cancer and hereditary breast-ovarian cancer, S91 Experience of discharge from colonoscopy of mutation negative HNPPC family members, e55

hereditary pancreatitis, SPINK1 mutations and phenotypic expression in patients with pancreas associated with trypsinogen mutations, e40

hereditary prostate cancer (HRPCA), No fumarate hydratase (FH) mutations in hereditary prostate cancer, e19

hereditary spastic paraplegia, Meta-analysis of age at onset in spastic-associated hereditary spastic paraplegia provides no evidence for a correlation with mutational class, e106

Science in motion: common molecular pathological themes emerge in the hereditary spastic paraplegies, e81

hereditary xanthinuria, Hereditary xanthinuria type II associated with mental delay, autism, cortical renal cysts, nephrocalcinosis, osteopenia, and hair and teeth defects, e121

heterogeneity, New approaches to investigating heterogeneity in complex traits, 553

heterozygous null allele, Evidence of autosomal dominant Leber congenital amaurosis (LCA) underlain by a CRX heterozygous null allele, e90

high resolution breakpoint mapping, Multicolour FISH fine mapping unravels as a component of a chromosomal rearrangement involving six breakpoints and a 5.89 Mb large deletion, e60

high resolution mapping, A familial unbalanced subtelomeric translocation resulting in monosomy 6q27–qter, e48

Hirschsprung disease, Investigation of germline GFRA4 mutations and evaluation of the involvement of GFRA1, GFRA2, GFRA3, and GFRA4 sequence variants in Hirschsprung disease, e18

Hirschsprung’s disease, Chinese patients with sporadic Hirschsprung’s disease are predominately represented by a single RET haplotype, e122

Single nucleotide polymorphic alleles in the 5’ region of the RET proto-oncogene define a risk haplotype in Hirschsprung’s disease, 714

histone, Absence of constitutional H2AX gene mutations in 101 hereditary breast cancer families, e51

history of neurofibromatosis, From Aldrovandi’s “Homuncio” (1592) to Buffon’s girl (1749) and the “Wart Man” of Tilessius (1793): antique illustrations of mosaicism in neurofibromatosis?, 227

HLA class I polymorphism, Significant frequency deviation of the class I polymorphism HLA-A10 in schizophrenic patients, 217

HLA immunogenetics, Significant frequency deviation of the class I polymorphism HLA-A10 in schizophrenic patients, 217

hMSH6, Genetic rearrangements of hMSH6 contribute to the genetic predisposition in suspected hereditary non-polyposis colorectal cancer syndrome, 597

HNPPC, Frequent genomic disorganisation of MLH1 in hereditary non-polyposis colorectal cancer (HNPPC) screened by RT-PCR on paraffin treated samples, e30

Genomic rearrangements of hMSH6 contribute to the genetic predisposition in suspected hereditary non-polyposis colorectal cancer syndrome, 597

HNPP, Diagnosis of gene dosage alterations at the PMP22 gene using MAPH, e123

HNSCC, Differential targets of CpG island hypermethylation in primary and metastatic head and neck squamous cell carcinoma (HNSCC), 25

Holt-Oram syndrome, Mutations at the SALL4 locus on chromosome 20 result in a range of clinically overlapping phenotypes, including Okihiro syndrome, Holt-Oram syndrome, acro-renal-ocular syndrome, and patients previously reported to represent thalidomide embryopathy, 473

Novel TBX5 mutations and molecular mechanism for Holt-Oram syndrome, e59

homeobox, Complete sequencing shows a role for MSX1 in non-syndromic cleft lip and palate, 399

homozgygosity, Inbreeding and risk of late onset complex disease, 925

homozygosity mapping, Genetic mapping of a new Lofara progressive myoclonus epilepsy locus (EPM2B) on 6p22, 671

Homozygosity mapping of a Desbuquois dysplasia locus to chromosome 17q25.3, 282

Homozygosity mapping of a gene for arterial tortuosity syndrome to chromosome 20q13, 747

Mapping of a new locus for autosomal recessive non-syndromic mental retardation in the chromosomal region 19p13.12-p13.2: further genetic heterogeneity, 729

HOXA13, A novel duplication in the HOXA13 gene in a family with atypical hand-foot-genital syndrome, e49

HPT-JT, HRPT2 mutations are associated with malignancy in sporadic parathyroid tumours, 657

HRPT2, HRPT2 mutations are associated with malignancy in sporadic parathyroid tumours, 657

hyperparathyroidism, HRPT2 mutations are associated with malignancy in sporadic parathyroid tumours, 657

hyprophillaemia, The severe form of type I hyprophillaemia results from homozygous inactivation of the PRODH gene, e7

hypersermented neutrophils, Hypogonadotrophic hypogonadism, short stature, cerebellar ataxia, rod-cone retinal dystrophy, and hyserperedmented neutrophils: a novel disorder or a new variant of Boucher-Neuhauser syndrome?, e2

hypertrophic cardiomyopathy, Comparison of fluorescent SSCP and denaturing HPLC analysis with direct sequencing for mutation screening in hypertrophic cardiomyopathy, e59

hycocomplementemia, Haemolytic uraemic syndrome and mutations of the factor H gene: a registry-based study of German speaking countries, 676

hypodonia, A unique form of hypodonia seen in Vietnamese patients: clinical and molecular analysis, e79

hypogonadism, Hypogonadotrophic hypogonadism, short stature, cerebellar ataxia, rod-cone retinal dystrophy, and hypersermented neutrophils: a novel disorder or a new variant of Boucher-Neuhauser syndrome?, e2

hypophosphatasia, Molecular study of three cases of chondrohypophosphatasia resulting from homozygosity for mutations in the tissue non-specific alkaline phosphatase gene, 605

hypoplasdias, A novel duplication in the HOXA13 gene in a family with atypical hand-foot-genital syndrome, e49

IB, High frequency of T9 and CFTR mutations in children with idiopathic bronchiectasis, 530

ICS1, Beckwith-Wiedemann syndrome and assisted reproduction technology (ART), 62

idiopathic congenital central hypoventilation syndrome, Association of germline mutations and polymorphisms of the RET proto-oncogene with idiopathic congenital central hypoventilation syndrome in 33 patients, e10

IgA nephropathy, Gender specific association of aldosterone synthase gene polymorphism with renal survival in patients with IgA nephropathy, 372

Renoprotective efficacy of renin–angiotensin inhibitors in IgA nephropathy is influenced by ACE A2350G polymorphism, e130

IH, Identification of a mutation in the Indian Hedgehog (IHH) gene causing brachydyactyly type A1 and evidence for a third locus, 42

IH gene, Mild brachydyactyly type A1 maps to chromosome 2q35-q36 and is caused by a novel IHH mutation in a three generation family, 132

IL-10, Inflammation, genetics, and longevity: further studies on the protective effects in men of IL-10 –308 promoter SNP and its interaction with TNFα –308 promoter SNP, 296

immunodeficiency, Short-limbed dwarfism with bowel, combined immune deficiency, and late onset aplastic anaemia caused by novel mutations in the RMRP gene, 761

imprinting, Beckwith-Wiedemann syndrome and assisted reproduction technology (ART), 62

Death in adults with Prader-Willi syndrome may be correlated with maternal uniparental disomy, e63

Microarray analysis of gene/transcript expression in Prader-Willi syndrome: deletion versus UPD, 568

impulsivity, A novel pericentric inversion of chromosome 3 cosegregates with a developmental-behavioural phenotype, e15

Disruption of a novel member of a sodium hydrogen exchanger family and DOCK3 is associated with an attention deficit hyperactivity disorder-like phenotype, 733

inbreeding, Inbreeding and risk of late onset complex disease, 925

myoinositol, Genetic variation analysis of MLF, TFAP2A, and CSK in patients with neural tube defects, e43
myotonic dystrophy, A RNA thesis mutation causing mitochondrial myopathy clinically resembling myotonic dystrophy, 752
N-acetylglucosamine-6-sulphatase, Sanfilippo syndrome type D: identification of the first mutation in the N-acetylglucosamine-6-sulphatase gene, 192
NADH, The mitochondrial DNA G13513A MELAS mutation in the NADH dehydrogenase 5 gene is a frequent cause of Leigh-like syndrome with isolated complex I deficiency, 188
nail patella syndrome, Nail patella syndrome: a review of the phenotype aided by developmental biology, 153
neocentromere, Analphoid de novo marker chromosome inv dup(3)(q28qter) with neocentromere in a dysmorphic and developmentally retarded girl, e27
neural tube defects, Geographical and ethnic variation of the 677C>T allele of 5,10-methylenetetrahydrofolate reductase (MTHFR): findings from over 7000 newborns from 16 areas world wide, 619
neurobeachin, The neurobeachin gene is disrupted by a translocation in a patient with idiopathic autism, 352
neurocristopathy, Investigation of germline GFRA4 mutations and a patient with involvement of GFRA1, GFRA2, GFRA3, and GFRA4 sequence variants in Hirschsprung disease, e18
neuroferritinopathy, Neuroferritinopathy in a French family with late onset dominant dystonia, e69
neurofibroma, Identification of a splice acceptor site mutation in NF1 in a patient with anovel deletion/duplication and high mutant load, e102
neurofibromas, Evaluation of genotype-phenotype correlations in neurofibromatosis type 1, e109
neurofibromatosis 2, Genotype-phenotype correlations for cataracts in neurofibromatosis 2, 758
Somatic mosaicism in neurofibromatosis 2: prevalence and risk of disease transmission to offspring, 459
neurofibromatosis 2 (NF2), Molecular study of frequency of mosaicism in neurofibromatosis 2 patients with bilateral vestibular schwannomas, 109
neurofibromatosis type 1, From Aldrovandi’s “Homuncio” (1592) to Buffon’s girl (1749) and the “Wort Man” of Tileius (1793): antique illustrations of mosaicism in neurofibromatosis?, 227
Independent NF1 mutations in two large families with spinal neurofibromatosis, 122
Recurrent mutations in the NF1 gene are common among neurofibromatosis type 1 patients, e82
neuromuscular junction, Possible founder effect of rapsyn N88K mutation and identification of novel rapsyn mutations in congenital myasthenic syndromes, e81
neuronal migration defect, Neuronal migration defect in a BRCAl gene carrier: possible focial nullisomy?, e24
neuropathy, Diagnosis of gene dosage alterations at the PMP22 gene using MAPH, e123
neuropenia, Diagnostic criteria, clinical characteristics, and natural history of Cohen syndrome, 233
new approaches, New approaches to investigating heterogeneity in complex traits, 553
NF1, Evaluation of genotype-phenotype correlations in neurofibromatosis type 1, e109
Heterogeneity of breakpoints in non-LCR-mediated large constitutional deletions of the 17q11.2 NF1 tumour suppressor region, e116
Identification of a mutation that perturbs NF1 gene splicing using genomic DNA samples and a minigene assay, 220
NF1 mutations and clinical spectrum in patients with spinal neurofibromas, 368
Recurrent mutations in the NF1 gene are common among neurofibromatosis type 1 patients, e82
NF1 microdeletion, Mitotic recombination mediated by the JJAZF1 (KIAA0160) gene causing somatic mosaicism and a new type of constitutional NF1 microdeletion in two children of a mosaic female with only few manifestations, 520
NF1 mutation, NF1 mutations and clinical spectrum in patients with spinal neurofibromas, 368
NF2, Genotype-phenotype correlations for cataracts in neurofibromatosis 2, 758
Identification of recurrent regions of chromosome loss and gain in vestibular schwannomas using comparative genomic hybridisation, 802
Neurofibromatosis 2 in a patient with a de novo balanced reciprocal translocation 46,X,i(22)(p11.2;q11.2), e68
NF2 mutations, Somatic mosaicism in neurofibromatosis 2: prevalence and risk of disease transmission to offspring, 459
non-carrier, Experience of discharge from colonoscopy of mutation negative HNPCC family members, e55
non-specific mental retardation, Rare polymorphic variants of the AGTR2 gene in boys with non-specific mental retardation, 357
non-specific X linked mental retardation, A third MRX family (MRX68) is the result of mutation in the long chain fatty acid CoA ligase 4 (FACL4) gene: proposal of a rapid enzymatic assay for screening mentally retarded patients, 11
nonsyndromic mental retardation, Mapping of a new locus for autosomal recessive non-syndromic mental retardation in the chromosomal region 19p13.12-p13.2: further genetic heterogeneity, 729
nonsyndromic sensorineural hearing loss, DFNA49, a novel locus for autosomal dominant non-syndromic hearing loss, maps proximal to DFNA7/DFN1M1 region on chromosome 1q21-q23, 832
Noonan syndrome, Correlation between PTPN11 gene mutations and congenital heart defects in Noonan and LEOPARD syndromes, 704
Notch signalling pathway, Novel mutations in DL3L2, a somatogenec gene encoding a ligand for the Notch signalling pathway, cause a consistent pattern of abnormal vertebral segmentation in spondylocostal dysostosis, 333
novel mtDNA deletion, Compensatory amplification of mtDNA in a patient with anovel deletion/duplication and high mutant load, e125
NSD1, Familial Sotos syndrome is caused by a novel 1 bp deletion of the NSD1 gene, 51
Identification of eight novel NSD1 mutations in Sotos syndrome, e126
Sotos syndrome and haploinsufficiency of NSD1: clinical features of intragenic mutations and submicroscopic deleqtions, 285
Spectrum of NSD1 mutations in Sotos and Weaver syndromes, 436
N-terminal domain, A novel mutation (R218Q) at the boundary between the N-terminal and the first transmembrane domain of the glycine receptor in a case of sporadic hyperekplexia, e71
NYS4, Familial vestibulocerebellar disorder maps to chromosome 13q31-q33: a new nystagmus locus, 33
nystagmus, Familial vestibulocerebellar disorder maps to chromosome 13q31-q33: a new nystagmus locus, 33
obesity, APOE and TGF-β1 genes are associated with obesity phenotypes, 918
Cryptic terminal deletion of chromosome 9q34: a novel cause of syndromic obesity in childhood?, 300
Effect of the peroxisome proliferator activated receptor-γ gene Pro12Ala variant on body mass index: a meta-analysis, 773
Okishio syndrome, Mutations at the SALL4 locus on chromosome 20 result in a range of clinically overlapping phenotypes, including Okishio syndrome, Holt-Oram syndrome, acro-renal-ocular
syndrome, and patients previously reported to represent thalidomide embryopathy, 473

oligophrenin-1, Mutations in the oligophrenin-1 gene (OPHN1) cause X

linked congenital cerebellar hypoplasia, 441

OLR1, Association of 3'-UTR polymorphisms of the oxidised LDL receptor

1 (OLR1) gene with Alzheimer’s disease, 424

OLR1/LOX 1, Association of single nucleotide polymorphisms in the oxidised LDL receptor

1 (OLR1) gene in patients with acute myocardial infarction, 933

oncogene, Chromosome 2 (2p16) abnormalities in Carney complex

 tumors, 268

apismodyplasia, Clinical, radiological, and chondro-osseous findings in

apismodyplasia: a survey of a series of 12 unreported cases, 195

optic atrophy, Frequency of rare mitochondrial DNA mutations in

patients with suspected Leber’s hereditary optic neuropathy, e85

The role of APOE in the phenotypic expression of Leber hereditary

optic neuropathy, e41

OPTINEURIN, The M98K variant of the OPTINEURIN (OPTN) gene

modifies initial intracranial pressure in patients with primary open

gleaucoma, 842

optineurin mutations, Prevalence of optineurin sequence variants in

adult primary open angle glaucoma: implications for diagnostic

testing, e101

ophysiation, Clinical, radiological, and chondro-osseous findings in

apismodyplasia: a survey of a series of 12 unreported cases, 195

osteoporosis, A phenotype of CALL deficiency: a novel genetic

explanation for inherited infantile osteoporosis with distal renal

tubular acidosis, 115

otociliary emissions, Non-syndromic recessive auditory neuropathy is the

result of mutations in the otoferlin (OTOF) gene, 45

ototelin, Non-syndromic recessive auditory neuropathy is the result of

mutations in the otoferlin (OTOF) gene, 45

ovarian cancer, Sensitivity of BRCA1/2 mutation testing in 466 breast/

ovarian cancer families, e107

overgrowth, Sotos syndrome and haploinsufficiency of NSD1: clinical

features of intragenic mutations and submicroscopic deletions, 285

overgrowth syndromes, Spectrum of NSD1 mutations in Sotos and

Weaver syndromes, 436

oxidative stress, Effect of TNF and LTA polymorphisms on biological

markers of response to oxidative stimuli in coal miners: a model of

gene-environment interaction, 96

Haptoglobin and its association with the HELLP syndrome, 214

P53, Germiline TP53 mutations in breast cancer families with multiple

primary cancers: is TP53 a modifier of BRCA1?, e34

P63, P63 mutations are not a major cause of non-syndromic split

foot/malformation, 55

palladium, Partial hexosomal 15pter→15q13 including SNRPN and

D15S10: first molecular cytogenetically proven case report, e28

palmoplantar keratoderma, Identification of a locus for type I

punctate palmoplantar keratoderma, 195

pancreatic cancer, Identification of a splice acceptor site mutation in

P63 in a patient with pancreatic cancer, e53

pancreatic cancer, A novel duplication in the<br>

PKD1 gene in a family with atypical hand-foot-genital syndrome, e49

polycystic kidney disease, Large deletion causing the TSC2-PKD1

coregene syndrome, e28

polycystic kidney disease, A twofold increase in BRCA1 mutation related prostate

cancer among Ashkenazi Israelis is not associated with distinct

histopathology, 787

PAX2 gene, Distal trisomy 6p and 20q owing to the concurrent

transposition of distal 6p and 20q to the 22q telomere: a genomic

polymerism?, e94

PAX9, A unique form of hypodontia seen in Vietnamese patients: clinical

and molecular analysis, e79

PCP locus, No fumarate hydratase (FH) mutations in hereditary

prostate cancer, e19

Pelger-Huet homoyzogosity, Congenital abnormalities reported in

Pelger-Huet homoyzogosity as compared to Greenberg/HEMA

dysplasia: highly variable expression of olfactory phenotypes, 937

Pended syndrome, Origins and frequencies of SLC26A4 (PDS)

mutations in east and south Asians: global implications for the

epidemiology of deafness, 242

penetration, Genetic study of transferritin amyloid neuropathies: carrier

risks among French and Portuguese families, e120

SPINK1 mutations and phenotypic expression in patients with

pancreatitis associated with trypsinogen mutations, e40

periventricular nodular heterotopia, Patient with bilateral

periventricular nodular heterotopia and polymicrogyria with

apparently balanced reciprocal translocation t(1,6)(p12;p12.2) that

interrupts the mannosidase alpha, class 1A, and glutathione S-

transferase A2 genes, e128

peroxisome proliferator activated receptor-γ, Effect of the peroxisome

proliferator activated receptor-γ gene Pro12Ala variant on body

mass index: a meta-analysis, 773

Peutz-Jeghers syndrome, Lautger-Hunziker syndrome: an important

differential diagnosis for Peutz-Jeghers syndrome, e77

phaeochromocytoma, Hereditary phaeochromocytoma and

paragangliomas: a study of five susceptibility genes, e75

phenotype, The genetics of inherited macular dystrophies, 641

phenotype/genotype correlation, Hereditary haemorrhagic
teleangiectasia: a questionnaire based study to delineate the different

phenotypes caused by endoglin and ALK1 mutations, 585

phenotype-genotype correlations, Telomeric 22q13 deletions resulting from

rings, simple deletions and translocations: cytogenetic,

molecular, and clinical analyses of 32 new observations, 690

PHF6, Novel PHF6 mutation p.D333del causes Börjeson-Forssman-

Lehmann syndrome, e50

physical mapping, Disruption of a novel member of a sodium/hydrogen

exchanger family and DOCK3 is associated with an attention deficit

hyperactivity disorder-like phenotype, 733

pigmentary retinopathy, Diagnostic criteria, clinical characteristics, and

natural history of Cohen syndrome, 233

PIK3CG, Association of INPP1, PIK3CG, and TSC2 gene variants with

autistic disorder: implications for phosphatidylinositol signalling in

autism, e119

PMP22, Diagnosis of gene dosage alterations at the PMP22 gene using

MAPH, e123

pneumonocytosis, Effect of TNF and LTA polymorphisms on biological

markers of response to oxidative stimuli in coal miners: a model of

gene-environment interaction, 96

poly Q in AIB1, Somatic instability of the DNA sequences encoding the

polymeric polyglutamine tract of the AIB1 gene, 885

polyglutamine tract, A novel duplication in the HOXA13 gene in a family

with atypical hand-foot-genital syndrome, e49

polycystic kidney disease, Large deletion causing the TSC2-PKD1

coregene syndrome, e28

polycystic kidney disease, A common variant in the

ABCA1 gene is associated with

hypercholesterolaemia, 163

Polyacrylglycopia, Patient with bilateral periventricular nodular

heterotopia and polyacrylglycopia with apparently balanced reciprocal

translocation t(1,6)(p12;p12.2) that interrupts the mannosidase alpha, class 1A, and glutathione S-transferase A2

genes, e128

polymorphism, A common variant in the ABCA1 gene is associated with

a lower risk for premature coronary heart disease in familial

hypercholesterolaemia, 163

Polyacrylglycopia, Patient with bilateral periventricular nodular

heterotopia and polyacrylglycopia with apparently balanced reciprocal

translocation t(1,6)(p12;p12.2) that interrupts the mannosidase alpha, class 1A, and glutathione S-transferase A2

genes, e128

polymorphism, A common variant in the ABCA1 gene is associated with

a lower risk for premature coronary heart disease in familial

hypercholesterolaemia, 163

Association of 3'-UTR polymorphisms of the oxidised LDL receptor 1

(OLR1) gene with Alzheimer’s disease, 424

Association of germline mutations and polymorphisms of the RET

proto-oncogene with idiopathic congenital central hypventilation

syndrome in 33 patients, e10
Association of the CD14 gene −159C polymorphism with progression of IgA nephropathy, 104
Germline TP53 mutations in breast cancer families with multiple primary cancers: is TP53 a modifier of BRCA1?, e34
Maternal 677CT/1298AC genotype of the MTHFR gene as a risk factor for deep vein, e64
Renoprotective efficacy of renin-angiotensin inhibitors in IgA nephropathy is influenced by ACE A2350G polymorphism, e130
Ser19→Trp polymorphism within the apolipoprotein AV gene in hypertriglyceridaemic people, e105
population, Geographical and ethnic variation of the 677C>T allele of 5,10-methyleneonobutylurate reductase (MTHFR); findings from over 7000 newborns from 16 areas worldwide, 619
population based register, Patients with the R133C mutation: is their phenotype different from patients with Rett syndrome with other mutations?, e52
positional cloning, The neurobeachin gene is disrupted by a translocation in a patient with idiopathic autism, 352
practice guidelines, Little value from including cousins in individual risk assessment of hereditary breast cancer: a simulation study, e25
Prader-Willi, Prader-Willi syndrome: the psychopathological phenotype in uniparental disomy, e112
Prader-Willi syndrome, Chromosome 15 maternal uniparental disomy and psychosis in Prader-Willi syndrome, 72
Exclusion of maternal uniparental disomy of chromosome 14 in patients referred for Prader-Willi syndrome using a multiplex methylation polymerase chain reaction assay, e46
Microarray analysis of gene/transcript expression in Prader-Willi syndrome: deletion versus UPD, 568
Prader-Willi/Angelman syndrome, A supernumerary marker chromosome 15 tetrasomic for the Prader-Willi/Angelman syndrome critical region in a patient with a severe phenotype, e84
predisposition, Y chromosome haplotypes and testicular cancer in the English population, e20
pre-eclampsia, Haptoglobin and its association with the HELLP syndrome, 214
pregnancy, A second heterozygous MDR3 nonsense mutation associated with intrahepatic cholestasis of pregnancy, e32
ABCR4 gene sequence variation in women with intrahepatic cholestasis of pregnancy, e70
premature epimecephalosy fusion, Acrocapitofemoral dysplasia: an autosomal recessive skeletal dysplasia with cone shaped epiphyses in the hands and hips, 201
pre-mRNA, Identification of a mutation that perturbs NF1 gene splicing using genomic DNA samples and a minigene assay, 220
prenatal diagnosis, Rapid, high throughput prenatal detection of aneuploidy using a novel quantitative method (MLPA), 907
pre-test probability assessment, Pre-test prediction models of Prader-Willi syndrome: the psychopathological phenotype in uniparental disomy, e112
primary congenital glaucoma, CYP1B1 gene analysis in primary congenital glaucoma in Indonesian and European patients, e9
primary congenital lymphoedema, Identification of eight novel VEGFR-3 mutations in families with primary congenital lymphoedema, 697
primary tumour, Differential targets of Cpg island hypermethylation in primary and metastatic head and neck squamous cell carcinoma (HNSCC), 25
PRODH, The severe form of type I hyperprolinaemia results from homozygous inactivation of the PRODH gene, e7
progression, Association of the CD14 gene −159C polymorphism with progression of IgA nephropathy, 104
promoter polymorphism, Promoter polymorphisms of the CD14 gene in Italian patients with coeliac disease, e108
prostate cancer, A twofold increase in BRCA mutation related prostate cancer among Ashkenazi Israelis is not associated with distinctive histopathology, e787
A Y chromosomal influence on prostate cancer risk: the multi-ethnic cohort study, 815
BRCA1 and BRCA2 mutations have no major role in predisposition to prostate cancer in Finland, 998
RNASEL mutations in hereditary prostate cancer, e21
The RNASEL R471delAAGG allele and prostate cancer in Ashkenazi Jewish men, e22
protease, Pathogenic mutations but not polymorphisms in congenital and childhood onset autosomal recessive deafness disrupt the proteolytic activity of TMPRSS3, 629
protein trafficking, A copper treatable Menkes disease mutation associated with defective trafficking of a functional Menkes copper ATPase, 290
Protest syndrome, PTEN hamartoma tumour syndrome: variability of an entity, e11
Protest-like syndrome, PTEN hamartoma tumour syndrome: variability of an entity, e111
proton pump, A phenocopy of CALI deficiency: a novel genetic explanation for inherited infantile osteopetrosis with distal renal tubular acidosis, 115
pseudo-TORCH syndrome, Cere encephalitis is allelic with Aicardi-Goutieres syndrome: implications for the pathogenesis of disorders of interferon alpha metabolism, 1183
psoriasis, Haplotype analysis of distantly related populations implicates corneodesmosin in psoriasis susceptibility, 447
PSORS1, Haplotype analysis of distantly related populations implicates corneodesmosin in psoriasis susceptibility, 447
psychiatric disorders, Disruption of the neuronal PAS3 gene in a family affected with schizophrenia, 325
psychiatric gene, Disruption of the neuronal PAS3 gene in a family affected with schizophrenia, 325
psychological impact, Quality of life in a family based genetic cascade screening programme for familial hypercholesterolaemia: a longitudinal study among participants, e3
psychosis, Chromosome 15 maternal uniparental disomy and psychosis in Prader-Willi syndrome, 72
Prader-Willi syndrome: the psychopathological phenotype in uniparental disomy, e112
PTEN, De novo germline PTEN mutation in a man with Thermite-Duches disease which arose on the paternal chromosome and was transmitted to his child with polydactyly and Worman bones, e92
PTEN hamartoma tumour syndrome, PTEN hamartoma tumour syndrome: variability of an entity, e11
PTP11, Correlation between PTP11 gene mutations and congenital heart defects in Noonan and LEOPARD syndromes, 704
pulmonary hypertension, Molecular and functional analysis identifies ALK-1 as the predominant cause of pulmonary hypertension related to hereditary haemorrhagic telangiectasia, 865
puromycin, Frequent genomic disorganisation of MHL1 in hereditary non-polyposis colorectal cancer (HNPCC) screened by RT-PCR on puromycin treated samples, e30
quality of life, Quality of life in a family based genetic cascade screening programme for familial hypercholesterolaemia: a longitudinal study among participants, e3
ragged red fibres, A RNAseH gene mutation causing mitochondrial myopathy clinically resembling myotonic dystrophy, 752
Rapp–Hodgkin syndrome, Rapp-Hodgkin and AEC syndromes due to a new frameshift mutation in the TP63 gene, e133
RAPSN, Possible founder effect of rapsyn N88K mutation and identification of novel rapsyn mutations in congenital myasthenic syndromes, 81
rapsyn, Possible founder effect of rapsyn N88K mutation and identification of novel rapsyn mutations in congenital myasthenic syndromes, 81
RBMY, The human Y chromosome’s azoospermia factor b (AZFb) region: sequence, structure, and deletion analysis in infertile men, 18
RDA, Appraisal of genetic and epigenetic congruity of a monozygotic twin pair discordant for schizophrenia, e16
reading disability, A genome scan for developmental dyslexia confirms linkage to chromosome 2p11 and suggests a new locus on 7q32, 340
receptors, Association of genetic variants in the HDL receptor, SR-B1, with abnormal lipids in women with coronary artery disease, 453
recessive, Molecular pathology and genetics of congenital hepatoportal fibrosing syndromes, 311
recessive non-syndromic hearing loss, Non-syndromic recessive auditory neuropathy is the result of mutations in the ofotolin (OTOF) gene, 45
recessive mutation, Reccurrent mutations in the NFI gene are common in familial myotonic dystrophy, e62
renal, Analysis of the Birt–Hogg–Dubé (BHD) tumour suppressor gene in sporadic renal cell carcinoma and colorectal cancer, 820
renal failure, Nail patella syndrome: a review of the phenotype aided by developmental biology, 153
renal tubular acidosis, A phenocopy of CAI deficiency: a novel genetic explanation for inherited infantile osteopetrosis with distal renal tubular acidosis, 115

Rendu-Osler-Weber, Autosomal dominant hereditary benign telengectasia maps to the CMT1 locus for capillary malformation on chromosome 5q14, 849

repeat elements, Characterisation of repeat and palindrome elements in patients harbouring single deletions of mitochondrial DNA, e86

respiratory chain deficiency, A tRNAAla mutation causing mitochondrial repeat elements, 752

respiratory tract infections, Clinical and immunohistochemical evidence for an X linked retinitis pigmentosa syndrome with recurrent infections and hearing loss in association with an RPGR mutation, e118

retinitis pigmentosa, Investigation of germine GFRA4 mutations and evaluation of the involvement of GFRA1, GFRA2, GFRA3, and GFRA4 sequence variants in Hirschsprung disease, e18

retinopathy, Chinese patients with sporadic Hirschsprung’s disease are predominantly represented by a single RET haplotype, e122

RET proto-oncogene, Association of germline mutations and polymorphisms of the RET proto-oncogene with idiopathic congenital central hypoventilation syndrome in 33 patients, e10

single nucleotide polymorphic alleles in the 5′ region of the RET proto-oncogene define a risk haplotype in Hirschsprung’s disease, 714

retinitis pigmentosa, Chinese patients with sporadic Hirschsprung’s disease are predominantly represented by a single RET haplotype, e122

retinopathy, Chinese patients with sporadic Hirschsprung’s disease are predominantly represented by a single RET haplotype, e122

retinitis pigmentosa, Chinese patients with sporadic Hirschsprung’s disease are predominantly represented by a single RET haplotype, e122

retinopathy, Chinese patients with sporadic Hirschsprung’s disease are predominantly represented by a single RET haplotype, e122

retinopathy, Chinese patients with sporadic Hirschsprung’s disease are predominantly represented by a single RET haplotype, e122
sequencing for mutation screening in hypertrophic cardiomyopathy, e59

SIP1, Characterisation of deletions of the ZFHXB1 region and genotype-phenotype analysis in Mowat-Wilson syndrome, 601

site-specific reversion, In vivo reversion to normal of inherited mutations in humans, 721

skin prick test, A common IL-1 complex haplotype is associated with an increased risk of atopy, e66

SLC26A4, Origins and frequencies of SLC26A4 (PDS) mutations in east and south Asians: global implications for the epidemiology of deafness, 242

sleep, β₂-adrenergic antagonists and melatonin reset the clock and restore sleep in a circadian disorder, Smith-Magenis syndrome, 74

Melatonin supplementation for severe and intractable sleep disturbance in young people with genetically determined developmental disabilities: short review and commentary, 793

SLFN gene cluster, Heterogeneity of breakpoints in non-LCR-mediated large constitutional deletions of the 17q11.2 NF1 tumour suppressor region, e116

SMA, Prevalence of SMN1 deletion and duplication in carrier and normal populations: implication for genetic counselling, e39

Smith-Magenis syndrome, β₂-adrenergic antagonists and melatonin reset the clock and restore sleep in a circadian disorder, Smith-Magenis syndrome, 74

SMN quantification, Prevalence of SMN1 deletion and duplication in carrier and normal populations: implication for genetic counselling, e39

SMN1 deletion, Prevalence of SMN1 deletion and duplication in carrier and normal populations: implication for genetic counselling, e39

SMN1 duplication, Prevalence of SMN1 deletion and duplication in carrier and normal populations: implication for genetic counselling, e39

SNPs, Association of single nucleotide polymorphisms in the oxidised LDL receptor 1 (OLR1) gene in patients with acute myocardial infarction, 933

somatic mosaicism, In vivo reversion to normal of inherited mutations in humans, 721

somitogenesis, Novel mutations in DLL3, a somitogenesis gene encoding a ligand for the Notch signalling pathway, cause a consistent pattern of abnormal vertebral segmentation in spondylocostal dysostosis, 333

Sotos syndrome, Identification of eight novel NSD1 mutations in Sotos syndrome, e126

Sotos syndrome and haploinsufficiency of NSD1: clinical features of intragenic mutations and submicroscopic deletions, 285

Southern blot, Mutational and gross deletion study of the MEN1 gene and correlation with clinical features in Spanish patients, e72

spasticity, Progressive cerebellocerebral atrophy: a new syndrome with spinocerebellar ataxia, e103

spasticin, Meta-analysis of age at onset in spastin-associated hereditary spastic paraplegia: no evidence for a correlation with mutational class, e106

Science in motion: common molecular pathological themes emerge in the hereditary spastic paraplegias, 81

spatial impairment, Using case study comparisons to explore genotype-phenotype correlations in Williams-Beuren syndrome, 136

spina bifida, Genetic variation analysis of MLR, IFP2A, and CSK in patients with neural tube defects, e43

spinal neurofibromatosis, Heterogeneity of breakpoints in non-LCR-mediated large constitutional deletions of the 17q11.2 NF1 tumour suppressor region, e116

spinal neurofibromatosis, Independent NF1 mutations in two large families with spinal neurofibromatosis, 122

spinal tumours, NF1 mutations and clinical spectrum in patients with spinal neurofibromas, 368

SPINK1, SPINK1 mutations and phenotypic expression in patients with pancreatitis associated with trypsinogen mutations, e40

splice mutation, The BRCA2 variant 8204G>A is a splicing mutation and results in an in frame deletion of the gene, e23

splicing, Identification of a mutation that perturbs NF1 gene splicing using genomic DNA samples and a minigene assay, 220

splicing defect, Recurrent mutations in the NF1 gene are common among neurofibromatosis type 1 patients, e82

splicing mutation, Transcript analysis of the cystic fibrosis splicing mutation 1525-1G>A shows use of multiple alternative splicing sites and suggests a putative role of exonic splicing enhancers, e88

split hand/foot malformation, P63 mutations are not a major cause of non-syndromic split hand/foot malformation, 55

spondylocostal dysostosis, Novel mutations in DLL3, a somitogenesis gene encoding a ligand for the Notch signalling pathway, cause a consistent pattern of abnormal vertebral segmentation in spondylocostal dysostosis, 333

startle disease, A novel mutation (R218Q) at the boundary between the N-terminal and the first transmembrane domain of the glycin receptor in a case of sporadic hyperkplexia, e71

steroid 21-hydroxylase deficiency, Mapping of a de novo unequal crossover causing a deletion of the steroid 21-hydroxylase (CYP21A2) gene and a non-functional hybrid hoxc5-X (TNXB) gene, e53

sterol pathway, Greenberg dysplasia (HEM) and lethal X linked dominant Conradi-Hünermann chondrodysplasia punctata (CDXP2): presentation of two cases with overlapping phenotype, e129

submicroscopic deletion, Telomeres: a diagnosis at the end of the chromosomes, 385

subtelomeric cryptic rearrangement, Distal trisomy 6p and 20q owing to the concurrent transposition of distal 6p and 20q to the 22q telomere: a genomic polymorphism?, e94

subtelomeric rearrangements, A familial unbalanced subtelomeric translocation resulting in monosomy 6q22-qter, e48

sulphate transporter, Recessive multiple ephalopolydactyly (rMED): phenotype delineation in eighteen homozygotes for DTDST mutation R279W, 65

supernumerary chromosome, A supernumerary marker chromosome 15 tetrasomic for the Prader-Willi/Angelman syndrome critical region in a patient with a severe phenotype, e68

supernumerary marker chromosome (SMC), Partial hexasomy 15pter→15q13 including SNRPN and D1S510: first molecular cytogenetically proven case report, e28

susceptibility, Does apolipoprotein E polymorphism influence susceptibility to malaria?, 348

susceptibility allele, CHEK2 1100delC and colorectal cancer, e110

susceptibility genes, Hereditary phaeochromocytomas and paragangliomas: a study of five susceptibility genes, e75

syndrome, Molecular characterisation of the 22q13 deletion syndrome supports the role of haploinsufficiency of SHANK3/PROSAP2 in the major neurological symptoms, 755

syndromic Hirschsprung disease, Characterisation of deletions of the ZFHXB1 region and genotype-phenotype analysis in Mowat-Wilson syndrome, 601

synonymous codon change, A synonymous codon change in the LMNA gene alters mRNA splicing and causes limb girdle muscular dystrophy type 1B, e115

Tay-Sachs disease, A genetic screening programme for Tay-Sachs disease and cystic fibrosis for Australian Jewish high school students, e45

TBX5, Novel TBX5 mutations and molecular mechanism for Holt-Oram syndrome, e29

TDT, The metabolic glutamate receptor 8 gene at 7q31: partial duplication and possible association with autism, e42

TECTA, Distinctive audiometric profile associated with DFNB21 alleles of TECTA, 360

tectorial membrane, Distinctive audiometric profile associated with DFNB21 alleles of TECTA, 360

telomere, Telomeric 22q13 deletions resulting from rings, simple deletions, and translocations: cytogenetic, molecular, and clinical analyses of 32 new observations, 690

telomeres, Telomeres: a diagnosis at the end of the chromosomes, 385

telomeric rearrangement, Cryptic terminal deletion of chromosome 9q34: a novel cause of syndromic obesity in childhood?, 300

testicular cancer, Y chromosome haplotypes and testicular cancer in the English population, e20

tetrasomy, A supernumerary marker chromosome 15 tetrasomic for the Prader-Willi/Angelman syndrome critical region in a patient with a severe phenotype, e84

TFP2A, Genetic variation analysis of MLP, IFP2A, and CSK in patients with neural tube defects, e43

TGFβ3, Linkage and linkage disequilibrium searched for between non-syndromic deafness and four candidate loci, 464

TGFβ, Molecular and functional analysis identifies ALK-1 as the predominant cause of pulmonary hypertension related to hereditary haemorrhagic telangiectasia, 865

www.jmedgenet.com
TNF-α genes are associated with obesity phenotypes, 918

**TNF-α pathway**. Germline mutations in the TNF-α and Wnt signalling pathways are a rare cause of the “multiple” adenoma phenotype, 925

**TNF-α receptors**. Visceral manifestations in hereditary haemorrhagic telangiectasia type 2, 494

**thalidomide**. Mutations at the SALL4 locus on chromosome 20 result in a range of clinically overlapping phenotypes, including Okihiro syndrome, Holt-Oram syndrome, acro-renal-ocular syndrome, and patients previously reported to represent thalidomide embryopathy, 473

**TMPRSS3**. Pathogenic mutations but not polymorphisms in congenital talipes equinovarus: a model of gene-environment interaction, 530

**TNF-α and Inflammation**. Mutations in the TNF-α gene sequence variants in a single assay: implications for genetic testing, 533

**uncultured amniocytes**. Rapid, high throughput prenatal detection of aneuploidy using a novel quantitative method (MLPA), 907

**uniparental disomy**. Comprehensive microsatellite marker analysis confirms previous report of segmental maternal heterodisomy of chromosome 14, 626

Death in adults with Prader-Willi syndrome may be correlated with maternal uniparental disomy, 623

Exclusion of maternal uniparental disomy of chromosome 14 in patients referred for Prader-Willi syndrome using a multiplex methylation polymerase chain reaction assay, 646

Paternal uniparental disomy in monozygotic twins discordant for hemihypertrophy, 223

**uniparental disomy 13**. Uniparental disomy of chromosome 13q causing homozgyosity for the 35delG mutation in the gene encoding connexin26 (CGB2) results in prelingual hearing impairment in two unrelated Spanish patients, 636

**UPD, Prader-Willi syndrome**. The psychopathological phenotype in uniparental disomy, 612

**UPD(14)**. Comprehensive microsatellite marker analysis contradicts previous report of segmental maternal heterodisomy of chromosome 14, 626

**USHA2**. Mutations in USHA2 in Spanish patients with autosomal recessive retinitis pigmentosa: high prevalence and phenotypic variation, 8

**Usher syndrome**. Clinical and immunohistochemical evidence for an X linked retinitis pigmentosa syndrome with recurrent infections and hearing loss in association with an RPRG mutation, 618

Genetic homogeneity and phenotypic variability among Ashkenazi Jews with Usher syndrome type III, 767

** usherin**. Mutations in USHA2 in Spanish patients with autosomal recessive retinitis pigmentosa: high prevalence and phenotypic variation, 8

**validation**. Evaluation of breast cancer risk assessment packages in the family history evaluation and screening programme, 807

**valves**. Canine tricuspid valve malformation, a model of human Ebstein anomaly, maps to dog chromosome 9, 320

**variable outcome**. Clinical, radiological, and chondro-osseous findings in opsismodysplasia: survey of a series of 12 unreported cases, 320

**vascular disorder**. Visceral manifestations in hereditary haemorrhagic telangiectasia type 2, 494

VEGFR-3. Identification of eight novel VEGFR-3 mutations in families with primary congenital lymphoedema, 697

**vestibular schwannoma**. Neurofibromatosis 2 in a patient with a de novo balanced reciprocal translocation 46,XY,i(2;12)(p11;2;12), 682

Somatic mosaicism in neurofibromatosis 2: prevalence and risk of disease transmission to offspring, 459

**VHL gene**. High frequency of novel germline mutations in the VHL gene in the heterogeneous population of Brazil, 631

**visceral manifestations**. Visceral manifestations in hereditary haemorrhagic telangiectasia type 2, 494

**visuopsensory and visuomotoric abilities**. Unusual cognitive and behavioural profile in a Williams syndrome patient with atypical 7q11.23 deletion, 526

**Walker-Warburg syndrome**. A homozgyous nonsense mutation in the Fukutin gene causes a Walker-Warburg syndrome phenotype, 845

**Weill-Marchesani syndrome**. In frame fibrillin-1 gene deletion in autosomal dominant Weill-Marchesani syndrome, 34

**Williams syndrome**. Unusual cognitive and behavioural profile in a Williams syndrome patient with atypical 7q11.23 deletion, 526

**Williams-Beuren syndrome**. Partial deletion of the critical 1.5 Mb interval in Williams-Beuren syndrome, 699

Using case study comparisons to explore genotype-phenotype correlations in Williams-Beuren syndrome, 136

**willingness to pay**. Genetic information but not termination: pregnant women’s attitudes and willingness to pay for carrier screening for deafness genes, 880

**Wnt pathway**. Germline mutations in the TGF-β and Wnt signalling pathways are a rare cause of the “multiple” adenoma phenotype, 353

two dimensional scanning. Rapid, inexpensive scanning for all possible BRCA1 and BRCA2 gene sequence variants in a single assay: implications for genetic testing, 353
X, Neurofibromatosis 2 in a patient with a de novo balanced reciprocal translocation 46,X,t(X;22)(p11.2;q11.2), 682
X: autosome translocation, Partial trisomy 10q with mild phenotype caused by an unbalanced X:10 translocation, e61
X chromosome, Confirmation linkage study in support of the X chromosome harbouring a QTL underlying human height variation, 825
Identification of a 650 kb duplication at the X chromosome breakpoint in a patient with 46,X,t(X;8)(q28;q12) and non-syndromic mental retardation, 169
X inactivation, Fabry disease: molecular studies in Italian patients and X inactivation analysis in manifesting carriers, e103
Neurofibromatosis 2 in a patient with a de novo balanced reciprocal translocation 46,X,t(X;22)(p11.2;q11.2), 682
Partial trisomy 10q with mild phenotype caused by an unbalanced X:10 translocation, e61
X linked cone-rod dystrophy, A new genetic locus for X linked progressive cone-rod dystrophy, 418
X linked mental retardation, Rare polymorphic variants of the AGTR2 gene in boys with non-specific mental retardation, 357
X linked retinitis pigmentosa, RPRGR mutation associated with retinitis pigmentosa, impaired hearing, and sinorespiratory infections, 609
Y chromosome, A Y chromosomal influence on prostate cancer risk: the multi-ethnic cohort study, 815
The human Y chromosome’s azoospermia factor b (AZFb) region: sequence, structure, and deletion analysis in infertile men, 18
Y chromosome haplotypes, Y chromosome haplotypes and testicular cancer in the English population, e20
ZFHX1B, Characterisation of deletions of the ZFHX1B region and genotype-phenotype analysis in Mowat-Wilson syndrome, 601
