Chromosomal rearrangements

Clinical significance of copy number variations in the 11p15.5 imprinting control regions: new cases and review of the literature
M Begemann, S Spengler, M Gogiel, U Grasshoff, M Bonin, R C Retz, A Dufke, T Spier, T Eggermann

Complex traits

Gene expression as a quantitative trait: what about translation?
C Polychronakos

Closing the case of APOE in multiple sclerosis: no association with disease risk in over 29 000 subjects

New disease loci

Exome sequencing identifies a COL14A1 mutation in a large Chinese pedigree with punctate palmoplantar keratoderma

Genotype-phenotype correlations

Recessive germ line SDHA and SDHB mutations causing leukodystrophy and isolated mitochondrial complex II deficiency
C L Alston, J E Davison, F Meini, F H van der Westhuizen, L He, H-T Hong-Do, A C Peto, P Gussen, P Giuffrini, J Ferrero, E Wassmer, R McFarland, R W Taylor

Mitochondrial genetics

Complex I deficiency: clinical features, biochemistry and molecular genetics
E Fassone, S Reitman

Therapeutics

Miglustat as a therapeutic agent: prospects and caveats
R E Vener, S A Iglesias

Copy-number variation

Deletion of the 3q26 region including the EVI1 and MDS1 genes in a neonate with congenital thrombocytopenia and subsequent aplastic anaemia
M Nielsen, C L Vermont, E Attes, C A L Roverkamp, F van Herwegen, G W E Santen, M H Bremgen

Cancer genetics

Prediction of breast cancer risk by genetic risk factors, overall and by hormone receptor status

Miscellaneous

Correction

September 2012 Volume 49 Issue 9

Contents

Mitochondrial genetices

578 Complex I deficiency: clinical features, biochemistry and molecular genetics
E Fassone, S Reitman

Therapeutics

591 Miglustat as a therapeutic agent: prospects and caveats
R E Vener, S A Iglesias

Copy-number variation

598 Deletion of the 3q26 region including the EVI1 and MDS1 genes in a neonate with congenital thrombocytopenia and subsequent aplastic anaemia
M Nielsen, C L Vermont, E Attes, C A L Roverkamp, F van Herwegen, G W E Santen, M H Bremgen

Cancer genetics

601 Prediction of breast cancer risk by genetic risk factors, overall and by hormone receptor status

Miscellaneous

597 Correction
