

Adopted as the official Journal of the Canadian College of Medical Geneticists

## Contents

February 2024 Volume 61 Issue 2

### Phenotypes

- 103** Further characterisation of *ARX*-related disorders in females due to inherited or de novo variants  
*M Gras, S Heide, B Keren, S Valence, C Garel, S Whalen, A C Jansen, K Keymolen, K Stouffs, M Jemesson, C Poirsier, G Lesca, C Depienne, C Nava, A Rastetter, A Curie, L Cuisset, V Des Portes, M Mill, P Charles, C Mignot, D Héron*
- 109** Weill-Marchesani syndrome: natural history and genotype-phenotype correlations from 18 news cases and review of literature  
*P Marzin, S Rondeau, J-L Alessandri, K Dieterich, C le Goff, C Mahaut, S Mercier, C Michot, O Moldovan, G Miolo, M Rossi, J Van-Gils, C Francannet, M P Robert, J-P Jais, C Huber, V Comier-Daire*

### Genotype-phenotype correlations

- 117** *SMARCA4* mutation causes human otosclerosis and a similar phenotype in mice  
*M Drabkin, M M Jean, Y Noy, D Halperin, Y Yogev, O Wormser, R Proskovskii-Ohayon, V Dolgin, N Levaot, V Brumfeld, S Ovadia, M Kishner, U Kazenell, K B Avraham, I Shelef, O S Birk*
- 125** Mutation in mitral valve prolapse susceptible gene *DCHS1* causes familial mitral annular disjunction  
*N Zhou, Q Zhao, R Li, R Cheng, Q Wu, J Cheng, Y Chen*
- 132** Further delineation of the rare GDACCF (global developmental delay, absent or hypoplastic corpus callosum, dysmorphic facies syndrome): genotype and phenotype of 22 patients with *ZNF148* mutations  
*K Szalacson, C M Lourenco, B L Callewaert, D Geneviève, F Rouxel, D Morin, A-S Denommé-Pichon, A Vitobello, W G Patterson, R Louie, F Pinto e Vairo, E Klee, C Kaivavar, R H Gavrilova, K E Agre, S Jacquemont, J Khadijé, J Giltay, K van Gassen, G Merő, E Gerkes, B W Van Bon, T Rinne, R Pfundt, H G Brunner, O Caluseriu, U Grasshoff, M Kehrer, T B Haacke, M M Khelifa, A K Bergmann, A M Cueto-González, A C Martorell, S Ramachandrapa, L B Sawyer, P Fasel, D Braun, A Isis, A Superli-Furga, V McNiven, D Chitayat, S A Ahmed, H Brennenstuhl, E MC Schwaibolf, G Battisti, B Pammentier, S J C Stevens*

### Cancer genetics

- 142** Co-design of patient information leaflets for germline predisposition to cancer: recommendations for clinical practice from the UK Cancer Genetics Group (UKCGG), Cancer Research UK (CRUK) funded CanGene-CanVar Programme and the Association of Genetic Nurse Counsellors (AGNC)  
*K Kohut, B Speight, J Young, R Way, J Wiggins, L Monje-García, D M Eccles, C Foster, L Turner, K Snape, H Hanson, on behalf of the CanGene-CanVar Patient Reference Panel, on behalf of the Consensus Meeting Participants*
- 150** Integrating a Polygenic Risk Score into a clinical setting would impact risk predictions in familial breast cancer  
*P Baliakas, A R Munters, A Kämpe, B Tesi, M-L Bondeson, C Ladenvall, D Eriksson*

- 155** Recurrent *BRCAC2* exon 3 deletion in Assyrian families  
*R Hodan, K Kingham, A W Kurian*
- 158** Neurofibromatosis type 1 mosaicism in patients with constitutional mismatch repair deficiency  
*L Guerrini-Rousseau, E Pasmant, M Muleris, S Abbou, T Adam-De-Baumais, L Brugieres, O Cabaret, C Colas, S Cotteret, P Decq, C Dufour, E Guillerm, E Rouleau, P Varlet, S Zili, D Vidaud, J Grill*

### Novel disease loci

- 163** Evidence of a genetic background predisposing to complex regional pain syndrome type 1  
*S S Shaikh, A Goebel, M C Lee, M S Nahorski, N Shenker, Y Pamela, I Drissi, C Brown, G Ison, M F Shaikh, A Kuttikat, W A Woods, A Dixit, K Stouffer, M CH Clarke, D K Menon, C G Woods*
- 171** *TBX20* loss-of-function variants in families with left ventricular non-compaction cardiomyopathy  
*Y Chang, J Wacker, J Ingles, I Macciocia, I King, The Australian Genomics Cardiovascular Disorders Flagship, C Semsarian, J McGaughran, R G Weintraub, R D Bagnall*

### Screening

- 176** Changing the standardised obstetric care by expanded carrier screening and counselling: a multicentre prospective cohort study  
*H-Y Chen, S-Y Lin, J-C Shih, J Kang, Y-Y Tai, S W Shaw, K-C Chen, K Mai, C-N Lee*

### Diagnostics

- 182** Updates on diagnostic criteria for hereditary haemorrhagic telangiectasia in the light of whole genome sequencing of 'gene-negative' individuals recruited to the 100 000 Genomes Project  
*C L Shovlin, F I Almaghouth, A Alsafi, N Coote, C Rennie, G MF Wallace, F S Govani, G E Research Consortium*
- 186** Diagnostic genome sequencing improves diagnostic yield: a prospective single-centre study in 1000 patients with inherited eye diseases  
*N Weisschuh, P Mazzola, T Zuleger, K Schaeferhoff, L Kihlewein, F Kortüm, D Witt, A Liebmann, R Fall, L Pohl, M Reith, L G Stülth, M Bertrand, A Müller, N Casadei, O Kelemen, C Kelbsch, C Kernstock, P Richter, F Sadler, G Demidov, L Schütz, J Admard, M Sturm, U Grasshoff, F Tonagel, T Heinrich, F Nasser, B Wissinger, S Ossowski, S Kohl, O Riess, K Stingl, T B Haacke*

### Genome-wide studies

- 196** Association between genetic polymorphisms and risk of adolescent idiopathic scoliosis in case-control studies: a systematic review  
*E Terhune, P Heyn, C Piper, C Wethey, A Monley, M Cuevas, N Hadley Miller*
